## Local Funding Initiative Request

### Fiscal Year 2023-2024

LFIR # 1145

1. Project Title

2. Senate Sponsor

3. Date of Request

4. Project/Program Description

The wastewater system within the City is aging and the City is conducting inspection and rehabilitation of wastewater access structures within the City's gravity maintenance system to reduce inflow and infiltration issues related to deterioration of existing structures. State funds will be used to expedite the rehabilitation process to minimize the potential of environmental hazards caused by aging infrastructure, which could negatively impact the existing impaired water body, WBID 3270, also known as the C-14 "Cypress Creek" Canal.

### Fiscal Year 2023-2024

LFIR # 1145

The work will provide for wastewater access structure rehabilitation necessary for residents and businesses throughout Coconut Creek and Parkland and to ensure environmental hazards are not created by aging wastewater infrastructure, such as negatively impacting the existing impaired water body, WBID 3270, also known as the C-14 "Cypress Creek" Canal..

**b. What activities and services will be provided to meet the intended purpose of these funds?**

Wastewater infrastructure will be inspected and repaired or replaced as needed.

**c. What direct services will be provided to citizens by the appropriation project?**

This work will ensure continuous wastewater collection services to the residents and businesses of Coconut Creek and Parkland service areas.

**d. Who is the target population served by this project? How many individuals are expected to be served?**

The City of Coconut Creek's service area includes the majority of the City's residents and businesses as well as a large portion of residents and businesses in the City of Parkland. The City has an estimated population of 57,833 residents.

**e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?**

Expediting inspections and repairs will mitigate exfiltration of wastewater into the groundwater due to aging infrastructure, which could negatively impact the existing impaired water body, WBID 3270, also known as the C-14 "Cypress Creek" Canal. The expected benefits of the project include continuous wastewater collection services within the area directly served and safeguarding our regional environment and natural resources for residents, tourists, and future generations. This would be measured by the inflow and infiltration, measured internally.

**f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?**

Failure to meet deliverables or performance measures could result in forfeiture of funds.
