## 14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The primary goal of the Continuum of Care program is to reduce recidivism. Since implementation of the Continuum of Care at GEO facilities, we have realized a reduction in recidivism year over year for those engaged in the program versus those that are not engaged. Other program goals are ensuring a successful reentry for participants through engagement with their local communities, which in turn will enhance public safety.

b. What activities and services will be provided to meet the intended purpose of these funds?

Core correctional practices training for facilities staff; evidence based in-prison rehabilitative programming for individuals who will be transitioning back into their community; post release support services for successful reintegration. All Continuum of Care Services are provided, pursuant to a contract with DMS, on a cost reimbursement basis with no profit or administrative fee.

LFIR # 2741

c. What direct services will be provided to citizens by the appropriation project?

Cognitive behavioral treatment programs; education and vocational training; substance abuse counseling and treatment; one-on-one transition support including individual cognitive behavioral therapy, and dedicated case management including a 24x7 call center and funded individual service packages for basic welfare and support via community resource referrals for up to one year.

d. Who is the target population served by this project? How many individuals are expected to be served?

The Continuum of Care program serves individuals while in-custody and post-release into the community. Currently, the program serves over 4,000 individuals in three facilities. Services are provided on a cost reimbursement basis with no profit or administrative fee.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

intervals. However, there are many ways to measure the various components of the program. For those in-custody, the Continuum of Care creates more positive environment and reduces safety risks. this is measured by reviewing discipline reports, SIRs/criminal thinking scales, formal grievances filed and staff complaint as a comparison over time. The Education/Vocation component can be measured by determining the total number of hours completed in each program and certifications granted for participants. Post-release participants education and employment status are measured at monthly intervals. The substance abuse component can be measured through urine analysis, SA hours and completion of urinalysis over time.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Penalties for failing to meet deliverables or performance measures are addressed in the existing contracts for each of the three facilities.
