3. Date of Request

4. Project/Program Description

Riverside Dr. provides connectivity to over 40,000 people in Broward County and beyond. Connects over 4,000 local residents. Road services residential, commercial and low industrial facilities. The roadway provides the only other alternative to A1A as an evacuation route within its boundaries. The City's vision is to improve the existing drainage system and implement sea-level rising measures (i.e., valves, pumps, etc.) and prepare the roadway and neighborhood to withstand the impacts of future drainage events including King Tides, etc. There are insufficient sidewalks to provide a safe passage for children and residents. The project will address sidewalk connectivity. Street lighting is lacking and the public has voiced concern for safety. The City has partnered with the Florida Power and Light (FPL) to replace old and outdated sodium halide fixtures with new, more efficient LED-based units. The new lights will provide better coverage. Lastly, roadway alignment is crucial for safety.
