10. Has the entity requesting this project received any federal assistance related to the COVID-19 pandemic?

The Florida Senate Local Funding Initiative Request Fiscal Year 2023-2024

LFIR # 2742

No	
If yes, indic	cate the amount of funds received and what the funds were used for.

Complete questions 11 and 12 for Fixed Capital Outlay Projects

- 11. Status of Construction
 - a. What is the current phase of the project?

Planning	ODesign	Construction

b. Is the project "shovel ready" (i.e permitted)?

c. What is the estimated start date of construction?

05/03/2021

Yes

d. What is the estimated completion date of construction?

02/03/2025

12. List the owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

The City of Miami's owns this section of E Flagler Street. The City of Miami's Public Works Department maintains this section of E Flagler Street. The City of Miami's Office of Capital Improvements is managing the current construction project underway. The Miami Downtown Development Authority (Miami DDA) is an independent agency of the City of Miami, and the Miami DDA actively advocates for the economic development within this corridor.

14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

15.

The Florida Senate Local Funding Initiative Request Fiscal Year 2023-2024

LFIR # 2742

In recent decades, the Flagler Street corridor in Downtown Miami has been in desperate need of renovation and not attractive to potential new development. Thus, specific purpose or goal of this project is to draw more people to the corridor, activate the sidewalks with retail and expanded outdoor dining, and stimulate the vertical development of the historic corridor.

Currently there is a \$5 million dollar shortfall in the total project budget, and we are requesting additional funding to complete the fifth and final phase of the project, Phase E, which is approximately 800 linear feet and runs from Miami Ave to W 1st Ave.

b. What activities and services will be provided to meet the intended purpose of these funds?

At the core of Downtown Miami, Flagler Street has been the economic, entertainment and political hub of Miami-Dade County since the City was founded in 1896. In recent decades, the Flagler Street corridor has been in desperate need of renovation and not attractive to potential new development. Thus, specific purpose or goal of this project is to draw more people to the corridor, activate the sidewalks with retail and expanded outdoor dining, and stimulate the vertical development of the historic corridor. The City of Miami, Miami-Dade County and the Miami DDA have assembled \$25.47 million in funding towards this \$32.7 million project. Utility companies such as FP&L and Teco Gas have been concurrently installing upgrades to their existing utilities at no expense to the City or the project.

c. What direct services will be provided to citizens by the appropriation project?

This project will deliver an enriched pedestrian experience for residents, businesses and visitors with expanded sidewalks, large shade trees, outdoor café dining, improved LED lighting, signage, public art, and seating. Existing drainage systems will also be upgraded to prevent flooding of streets and sidewalks. We aim to improve the quality of life through a safer and more attractive shared space providing opportunities to increase patronage to existing businesses, attract new businesses, spur economic growth, and make Flagler Street a Downtown Miami cultural and commercial destination once again.

d. Who is the target population served by this project? How many individuals are expected to be served?

In revitalizing and improving Flagler Street, the project will fulfill the expectations of over 115,000 area residents, 250,000 workers, and thousands of visitors who desire the advantages of a dynamic urban center. Downtown has emerged as a popular tourist destination with nearly 6 million tourist and visitors. In terms of demographics, the Miami DDA serves a diverse population, with a diversity index of 73.1. The number of households in the Greater Downtown more than doubled between 2000 and 2014 and trends anticipate adding more than 12,000 new residents within the next five years, with the strongest growth in households in the urban core area.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

A 2014 economic impact analysis of the Project estimated that reconstruction of Flagler Street would generate approximately 2,080 new direct jobs within five years after reconstruction was completed, along with an additional 1,940 new jobs from indirect and induced economic effects – a total impact of 4,020 additional jobs, resulting in \$610 million of gross revenues to local business establishments, \$236 million of additional personal income (after tax and adjusted for inflation) for local residents and an increase of \$406 million to the County's Gross Regional Product. The economic impacts were estimated utilizing the South Florida Multi-regional REMI Model, a dynamic econometric model developed by Regional Economic Models, Inc. (REMI). This model and similar models of other metro areas are widely used for conducting similar economic impact analysis.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

None anticipated.
