1. **Title of Project:** Haney Technical Center Industrial Pipefitting Funding Request

2. **Senate Sponsor:** George Gainer

3. **Date of Submission:** 10/10/2017

4. **Project/Program Description:**
   This $864,160 budget renovation request to create a new Industrial Pipefitting program will enable Haney to meet the anticipated growth needs of local industry due in part to a recent $10.5 billion U.S. Coast Guard contract. Local and regional industry partners have determined that this 600 hour program is a critical need in the area. A six month training period with low enrollment costs of less than $3500 would yield a large return on-investment for students. According to the Florida Department of Economic Opportunity, skilled workers in this field constitute one of the largest and highest paid construction occupations, and job opportunities should be very good. There are currently 624 workers employed regionally in this field with 400 projected job openings over the next eight years. The renovation will provide high-skill employment opportunities for our students and meet the needs of industry.

Input Amounts:

10. Is future-year funding likely to be requested?

No

11. Program Performance:

a. What is the specific purpose or goal that will be achieved by the funds requested?

In order to offer this much-needed program, current classroom and lab space requires retrofitting to provide industry-standard instruction and training for students. To convert the current space, new electrical systems would be added to support large power tools, new lighting, exhaust systems, safety equipment, and other upgrades would also be necessary. Additionally, we anticipate the purchase of equipment, materials, technology, and supplies to simulate workplace settings.

b. What are the activities and services that will be provided to meet the intended purpose of these funds?

With the renovation of this building, we can better meet the requested training needs of industry. Renovated facilities will allow a level of instruction to meet current industry standards. An Industrial Pipefitting program in collaboration with our extremely successful Welding Technology program will produce highly-skilled employees to fill job openings and boost the local economy.

c. How will the funds be expended?
