1. **Title of Project:** North Lauderdale C-14 Pump Station

2. **Senate Sponsor:** Perry Thurston

3. **Date of Submission:** 11/21/2017

4. **Project/Program Description:**
   
   C-14 Pump Station: For over 50 years, the City of North Lauderdale’s canal drainage network has drained to the North into the South Florida Water Management District’s (SFWMD) C-14 canal by two (2) 72” gravity pipes. These pipes have served the City well during rain events over the years. However, in recent times, storm events are more intense and prevalent and during the last few significant rain events, such as hurricanes Matthew and Irma, the internal canal levels have been high due to water coming back in from the C-14 canal. The reason for this is that neighboring municipalities turn on their pumps and raise the C-14 level. Eventually the C-14 water level stabilizes as this canal drains into the intercoastal through timed lock discharges controlled by SFWMD during low tides. These intense storm events cause major flooding issues on the roads and also in the back yards of residents who are adjacent to the City’s canals. Roads are closed for long periods of time after these events

5. **State Agency Contacted?** No
   
   a. If yes, which state agency?
   
   b. If no, which is the most appropriate state agency to place an appropriation for the issue being requested? Department of Environmental Protection

10. Is future-year funding likely to be requested?

   No

11. Program Performance:

   a. What is the specific purpose or goal that will be achieved by the funds requested?

   The specific purpose of the funds is to provide a drainage pump for the City in order to manage the canal levels in the City’s canal drainage network. Intense storm events cause major flooding issues on the roads and also cause property damage. The best way to protect the property of the citizens of North Lauderdale is to install the City’s own drainage pump structure that can lower the canal levels in the City’s canal drainage network discharging into the C-14 canal.

   b. What are the activities and services that will be provided to meet the intended purpose of these funds?

   Installation of the C-14 pump station

   c. How will the funds be expended?

d. What are the direct services to be provided to citizens by the appropriations project?
   Less flooding of the City’s roads and residential back yards that are adjacent to City canals.

e. Who is the target population served by this project? How many individuals are expected to be served?
   Citizens of North Lauderdale, 50%

f. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?
   Benefit will be less flooding events. Measured by number of flooding events.

g. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?
   10% retainage withheld; Performance bond
