1. Title of Project: City of Delray Beach Reclaimed Water System Expansion
2. Senate Sponsor: Kevin Rader
3. Date of Submission: 01/24/2018
4. Project/Program Description:

   This project is a part of our Reclaimed Water Master Plan, and expands our existing system into Area 9 of our service area. It will provide an alternative water resource for landscape irrigation instead of using resource limited potable water. When completed, the City will be able to connect existing high irrigation use customers/ public facilities to the reclaimed water system for irrigation purposes. This alternative water supply reduces the demand on the potable water system, which reduces the demand from the regulated surficial aquifer wells. Part of our water resource strategy is to reduce dependence on the surficial aquifer over time through developing alternative water supplies like reclaimed water. This project is also part of our ocean outfall elimination plan to reduce/eliminate dependence on our ocean outfall, used for disposal of treated wastewater.

5. State Agency Contacted? No
   a. If yes, which state agency?
   b. If no, which is the most appropriate state agency to place an appropriation for the issue being requested? Department of Environmental Protection

The Florida Senate

Local Funding Initiative Request - Fiscal Year 2018-2019

a. Has funding been provided in a previous state budget for this activity?  No
b. In the previous 5 fiscal years, how many years was funding provided? (Optional)
c. What is the most recent fiscal year the project was funded?
d. Were the funds provided in the most recent fiscal year subsequently vetoed?
e. Complete the following Worksheet.

10. Is future-year funding likely to be requested?

No

11. Program Performance:

a. What is the specific purpose or goal that will be achieved by the funds requested?

The funds will be used to expand our reclaimed water system. This alternative water supply (reclaimed water) reduces the demand on the potable water system, reducing demand from the limited, highly regulated, and environmentally sensitive surficial aquifer wells. Part of our water resource strategy is to reduce dependence on the surficial aquifer over time through developing alternative water supplies like reclaimed water. The project also part of our ocean outfall elimination plant to reduce/eliminate dependence on our ocean outfall, used to dispose of treated wastewater.

b. What are the activities and services that will be provided to meet the intended purpose of these funds?

Constructions costs for expanding the reclaimed water.

c. How will the funds be expended?

d. **What are the direct services to be provided to citizens by the appropriations project?**

   It will provide an alternative water resource for landscape irrigation, replacing potable water coming from a resource limited well field. It also reduces potential treated wastewater discharge through our ocean outfall.

e. **Who is the target population served by this project? How many individuals are expected to be served?**

   The target neighborhood is the "Set" and will initially serve large irrigation users, primarily governmental facilities such as Fire Station #1 and Spady Elementary but will be made available to customers along the route.

f. **What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?**

   Reduced dependence on environmentally sensitive/limited groundwater resources using this reclaimed water, an alternative water supply resource and reduced dependence on ocean outfall for treated wastewater. Provides an alternative water supply to customers for irrigation.

g. **What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?**

   None
