**11. Program Performance:**

**a. What is the specific purpose or goal that will be achieved by the funds requested?**

The implementation of the project will reduce the direct land overflow of the stormwater runoff without any pre-treatment. The surface water quality will be improved as the proposed system will provide pre-treatment to the Stormwater runoff before discharging into the surface waterbody. Environmental benefit will be achieved by improving the surface waterbody. Alleviate the ponding on the street and will improve public safety Will reduce maintenance/resurfacing frequency of the road.

**b. What are the activities and services that will be provided to meet the intended purpose of these funds?**

The specific purpose or goal of the project is citywide drainage improvements and also to enhance the compliance with NPDES permit requirements from the State of Florida.

**c. What are the direct services to be provided to citizens by the appropriations project?**

The implementation of the project will reduce the direct land overflow of the stormwater runoff without any pre-treatment. The surface water quality will be improved as the proposed system will provide pre-treatment to the Stormwater runoff before discharging into the surface waterbody. Environmental benefit will be achieved by improving the surface waterbody. Alleviate the ponding on the street and will improve public safety Will reduce maintenance/resurfacing frequency of the road.

**d. Who is the target population served by this project? How many individuals are expected to be served?**

The City of Lauderdale Lakes population is 35k. This project will enhance safety which ultimately will benefit beyond the immediate population to include travel-thru population.

**e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?**

Will enhance compliance with NPDES permit with the State of Florida Department of Environmental Protection as it will reduce the water pollution and/or improve water quality. The improvements will result visible outcome as the ponding occurrences and/or ponding duration on the street will be significantly reduced or alleviated.
