**The Florida Senate**  
**Local Funding Initiative Request**  
**Fiscal Year 2020-2021**  

**LFIR # 1131**  

---

1. **Project Title**: Belle Glade Lake Okeechobee Watershed Area Stormwater Conveyance Improvements

2. **Senate Sponsor**: Kevin Rader

3. **Date of Request**: 11/01/2019

4. **Project/Program Description**:
   Design & construct stormwater conveyance in the NW/SW 3rd SW Ave. B Extension Corridor to prevent flooding, protect life, health, safety of residents, visitors, businesses, property & State waters. Keep citizens employed, businesses open & operating, maintaining revenues in financially disadvantaged community located in a Rural Area of Economic Opportunity within the Lake Okeechobee Watershed. Includes water quality/quantity regulations of FDEP/SFWMD. Flooding occurs during heavy rainfalls as experienced during Hurricane Irma. Project includes inlets & related drainage with related curbing & roadway reconstruction that will tie into the improved connection at SW Ave B. Construction of road on the muck (organic rich soil) requires floating a roadway over the muck or demucking to the depth of limestone rock, making roads more costly. Demucking provides a more stable & longer lasting platform for road & drainage systems.

5. **State Agency to receive requested funds**: Department of Environmental Protection  
   State Agency contacted? ☐ Yes ☐ No

6. **Amount of the Nonrecurring Request for Fiscal Year 2020-2021**

11. **Program Performance**

a. What specific purpose or goal will be achieved by the funds requested?

Purpose or goal that will be achieved is to design & construct the stormwater conveyance system in order to improve life, health & safety for the
citizens, visitors, residents & business community by providing safer transportation as the streets will drain properly, prevention of flooding to nearby
businesses & loss of revenues. Citizens stay employed when businesses are able to keep operating, reduction of property damage, & protection of
State waters with improved water quality components in this financially disadvantaged community located within the Lake Okeechobee Watershed
Basin. In addition, the project also addresses the water quality/quantity component of the permitting agencies of FDEP and SFWMD that includes the
reduction of TMDL’s, pollutants, phosphorus and nitrogen loads entering the State's water resources. Return on the State's investment is through the
stormwater utility at $150 per year, per ERU.

b. What activities and services will be provided to meet the intended purpose of these funds?

Activities & services provided from this funding include, but are not limited to, preliminary engineering, final design, and permitting, bidding, construction
project management, engineering during construction & construction services of the stormwater conveyance system that includes 640 feet with an
additional 350 feet with inlets & related drainage for 990 feet in total with related curbing. Reconstruction of the Hillsborough
drainage outfall; replacing pipe connections to the roadways, inlets, piping, curbing, & roadway reconstruction, which requires floating roadways over
the muck or demucking to the depth of the limestone rock.

c. What direct services will be provided to citizens by the appropriation project?

Once constructed, the direct services provided to citizens will be improved life, health & safety with safer transportation as the streets will drain
properly, the reduction in flooding of nearby businesses, keeping businesses open & operating, prevention of lost revenues & property damage, keeping citizens employed, improved stormwater flows & quality treatment. Protection of public health & the environment with the stormwater water
quality & quantity components. These apparatus collect the debris & trash, mineral oils & coolant from cars that can be carried by the stormwater runoff
that pollute the water, kill fish, frogs & other aquatic species. The debris can pose dangers for aquatic plants and wildlife. Birds & fish can be poisoned
by eating cigarette butts. The construction of the stormwater conveyance supports FDEP & SFWMD clean water standards for the Northern Everglades
Ecosystem & Lake Okeechobee.

d. Who is the target population served by this project? How many individuals are expected to be served?

The number of individuals expected to be served include the visitors, residents and businesses of the City of Belle Glade and the surrounding Lake
Okeechobee Region areas including Pahokee, South Bay and Canal Point, which exceeds 30,000.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will
be measured?

Expected benefit or outcome is improved life, health & safety for the State & its residents, citizens & visitors that includes improved stormwater flows &
quality water treatment, prevention of lost revenues, wages & property damage. Provides for safer transportation, protection of public health & the
environment & supports FDEP and SFWMD clean water standards for the Northern Everglades Ecosystem & Lake Okeechobee Watershed. Reduction
of TMDL’s, pollutants, phosphorus & nitrogen loads entering impaired State waters is achieved with the water quality/quantity components included
with this project that address & capture the debris & trash that can be carried by stormwater runoff directly into a conveyance system, a lake or canal.
Once there, the debris can pose dangers for aquatic plants & wildlife. Birds & fish can be poisoned by eating cigarette butts. Mineral oils & coolant from
cars pollute the water, kill fish, frogs, wildlife & aquatic species.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard
penalties for failing to meet deliverables or performance measures provided for in the contract?

Non payment of invoices; corrective action plan assessed per the terms of the agreement.
12. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

City of Belle Glade, the entity, owns the system.

13. **Requestor Contact Information**
   a. First Name Lomax
   b. Organization City of Belle Glade
   c. E-mail Address lharrelle@belleglade-fl.com
   d. Phone Number (561)992-1601

14. **Recipient Contact Information**
   a. Organization City of Belle Glade
   b. Municipality and County Palm Beach
   c. Organization Type
      - For-profit Entity
      - Non-Profit 501(c) (3)
      - Non-Profit 501(c) (4)
      - Local Entity
      - University or College
      - Other (please specify)
   d. First Name Beverly
   e. E-mail Address bscott@belleglade-fl.com
   f. Phone Number (561)9921601

15. **Lobbyist Contact Information**
   a. Name Connie Vanassche
   b. Firm Name CAS Governmental Services LLC
   c. E-mail Address cvgovser@gmail.com
   d. Phone Number (561)5120089
Please complete the questions below for Water Projects only.

16. Have you applied for alternative state funding?
   - Waste Water Revolving Loan
   - Drinking Water Revolving Loan
   - Small Community Wastewater Treatment Grant
   - Other (please specify) [N/A]

17. What is the population economic status?
   - Financially Disadvantaged Community (ch. 62-552, F.A.C.
   - Financially Disadvantaged Municipality (ch. 62-552, F.A.C.
   - Rural Area of Economic Concern
   - Rural Area of Opportunity (s. 288.0656, Florida Statutes)
   - N/A

18. What is the status of construction?
   - Not Ready

19. What percentage of the construction has been completed?
   - 0%

20. What is the estimated completion date of construction?
   - 12/31/2021

The information provided will be posted to the Florida Senate website for public viewing if sponsored by a Senator.
