The Florida Senate
Local Funding Initiative Request
Fiscal Year 2020-2021

1. **Project Title**: Sopchoppy- Elevated Water Tank

2. **Senate Sponsor**: Bill Montford

3. **Date of Request**: 11/13/2019

4. **Project/Program Description**
   This project consists of surveying, geotechnical services, design, permitting, bidding, project administration and observation during construction and construction of a 300,000 gallon elevated tank for the SE region of the Sopchoppy service area. Currently, there is no storage in this region of increased institutional, commercial and residential growth. The new tank will be optimally located and sized to enhance public safety through increased storage capacity, improved water system pressures and fire protection for the upcoming construction of the Wakulla County branch of the Tallahassee Community College, future commercial growth along the highway corridors and future residential developments in the SE service area. With these improvements, the institutional and commercial growth would enhance the economic development within the region. An added benefit would be a regional improvement through increased pressures and flow into neighboring Panacea via a recently completed interconnect.

5. **State Agency to receive requested funds**: Department of Environmental Protection
   **State Agency contacted?**: Yes

Total State Funds Requested (must equal total from question #6) 975,000
11. **Program Performance**

a. What specific purpose or goal will be achieved by the funds requested?

   The specific purpose to be achieved would be the enhancement of public safety through increased water system pressures and fire flows.

b. What activities and services will be provided to meet the intended purpose of these funds?

   Surveying, geotechnical services, design, permitting, bidding, project administration during construction, construction observation and the construction of a 300,000 gallon elevated tank for the southeast region of Sopchoppy.

c. What direct services will be provided to citizens by the appropriation project?

   The existing and future customer base within this region would experience better water pressures and have improved fire flows.

d. Who is the target population served by this project? How many individuals are expected to be served?

   Approximately 5,500 drinking water customers.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

   The expected benefit would be increase water system pressures and fire flow capabilities. This can be measured through monitoring system pressures and fire flow testing of fire hydrants.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

   Other than the standard penalties included in construction documents, no other penalties would be assessed.
12. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

The City of Sopchoppy Water System would be the owner of the facilities upon completion of the project and would be the facility operators as well.
