## Local Funding Initiative Request

### Fiscal Year 2020-2021

LFIR # 2011

1. **Project Title**
2. **Senate Sponsor**
3. **Date of Request**

4. **Project/Program Description**

The City of Bowling Green has experienced high wastewater plant influent flows during rain events as the result of inflow and infiltration (I/I) to the City's sanitary sewer system. These additional I/I flows take up the capacity of the City's wastewater treatment plant and results in additional expenditures to treat the higher wastewater plant flows. There have been overflows during heavy rain events, which have been reported to the FDEP. The City desires to conduct a Sanitary Sewer Evaluation Study to identify the source of the I/I flows.

## 11. Program Performance

- a. What specific purpose or goal will be achieved by the funds requested?

Determine the source of excessive I/I flows that have been observed at the City's wastewater treatment plant.

- b. What activities and services will be provided to meet the intended purpose of these funds?

Conduct a Sanitary Sewer Evaluation Study (SSES).

- c. What direct services will be provided to citizens by the appropriation project?

After the source of excessive I/I is identified and corrected, flows to the City's wastewater treatment plant will be reduced, which will reduce utility system operation costs. This will help to keep utility rates down.

- d. Who is the target population served by this project? How many individuals are expected to be served?

Residents of the City of Bowling Green (population 2,900)

- e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The SSES will identify sources of I/I into the City's wastewater collection system. After the sources of I/I are corrected, this will result in overall reduced flows to the City's wastewater treatment plant. The City's operating costs will consequently be reduced, which will be passed on to residents in the form of reduced sewer rates. There are also benefits to the environment, as the risk of sewer overflows will be lessened. This outcome will ultimately be measured by observation of wastewater treatment plant flows.

- f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Payment of costs for developing the SSES could be withheld if a proper SSES Report is not delivered in a timely manner.
