Local Funding Initiative Request

Fiscal Year 2020-2021

LFIR # 2247

1. **Project Title**

2. **Senate Sponsor**

3. **Date of Request**

4. **Project/Program Description**

Roadway improvements to Southern D Road will improve a major access local road coming off a high speed, under construction, S-80 to an unimproved shell rock road that becomes impassable during rain events. Improvements will include guard rails to ensure increased public safety, a water main line for much needed fire hydrant service to a rural community, traffic calming speed tables, and drainage and erosion control, providing citizens and the Division of Forestry safer passage and increased response time.

11. Program Performance

- a. What specific purpose or goal will be achieved by the funds requested?

Roadway improvements to Southern D Road will improve a major access local road coming off a high speed, under construction, SR-80 to an unimproved shell rock road that becomes impassable during rain events. Improvements will include guard rails to ensure increased public safety, a water main line for much needed fire hydrant service to a rural community, traffic calming speed tables, and drainage and erosion control, providing citizens and the Division of Forestry safer passage and increased response time.

- b. What activities and services will be provided to meet the intended purpose of these funds?

Roadway improvements for Southern D Road will improve local road safety by installing guard rails, drainage, erosion control, and fire hydrant services to a rural population that is adjacent to and abutting existing SR-80 improvements where a traffic light is being installed.

- c. What direct services will be provided to citizens by the appropriation project?

Improved public safety will include installation of guard rails next to a wide section of canal, improved drainage, access, erosion control, and fire hydrant service to a major southern quadrant of the local community.

- d. Who is the target population served by this project? How many individuals are expected to be served?

Rural local agricultural community, rural equestrian community, citizens within the 3,400 population of the community, surrounding communities, and county population entering the southern end of town from SR-80, and visitors attending local farm fresh and ArgoTourism farms and events.

- e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The outcome of this project will include an improved road with improved public safety response time and improved public safety access, addition of fire hydrant systems, improved drainage, decreased and/or elimination of erosion to canal banks along roadway, and traffic calming. The methodology to measure this outcome will be shown in the decrease of public safety response times, the improved safety to the community, the improvement of protection of the canal banks, as well as improvement of access to the southern quadrant of this community.

- f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Liquidated damages will be included in contracts by the Town of Loxahatchee Groves for failure to meet deliverables or performance measures stated to contractors. Standard contract penalties for the contract between the town and state are sufficient.
