The Committee on Budget (Fasano) recommended the following:

**Senate Amendment (with title amendment)**

Delete lines 1266 - 1310 and insert:

(1)(e) It is the intent of the Legislature that insurers must provide savings to consumers who install or implement windstorm damage mitigation techniques, alterations, or solutions to their properties to prevent windstorm losses. A rate filing for residential property insurance must include actuarially reasonable discounts, credits, or other rate differentials, or appropriate reductions in deductibles, for properties on which fixtures or construction techniques demonstrated to reduce the amount of loss in a windstorm have
been installed or implemented. The fixtures or construction techniques must include, but are not to, fixtures or construction techniques that enhance roof strength, roof covering performance, roof-to-wall strength, wall-to-floor-to-foundation strength, opening protection, and window, door, and skylight strength. Credits, discounts, or other rate differentials, or appropriate reductions in deductibles, for fixtures and construction techniques that meet the minimum requirements of the Florida Building Code must be included in the rate filing. All insurance companies must make a rate filing that includes the credits, discounts, or other rate differentials or reductions in deductibles by February 28, 2003. By July 1, 2007, the office shall reevaluate the discounts, credits, other rate differentials, and appropriate reductions in deductibles for fixtures and construction techniques that meet the minimum requirements of the Florida Building Code, based upon actual experience or any other loss relativity studies available to the office. The office shall determine the discounts, credits, other rate differentials, and appropriate reductions in deductibles that reflect the full actuarial value of such revaluation, which may be used by insurers in rate filings.

And the title is amended as follows:
