COMMITTEE SUBSTITUTE - Substantial Changes

I. Summary:

CS/SB 114 creates 31 honorary designations of transportation facilities around the state and directs the Florida Department of Transportation to erect suitable markers designating the transportation facilities. The bill also amends two previously enacted designations.

The expected fiscal impact to erect the designation markers required under the bill is \$33,000.

II. Present Situation:

Section 334.071, F.S., provides that legislative designations of transportation facilities are for honorary or memorial purposes, or to distinguish a particular facility. Such designations are not to be construed as requiring any action by local governments or private parties regarding the changing of any street signs, mailing addresses, or 911 emergency telephone number system listings, unless the legislation specifically provides for such changes.¹

When the Legislature establishes road or bridge designations, the Florida Department of Transportation (FDOT) is required to place markers only at the termini specified for each highway segment or bridge designated by the law creating the designation, and to erect any other markers it deems appropriate for the transportation facility.²

¹ Section 334.071(1), F.S.

² Section 334.071(2), F.S.

The FDOT may not erect the markers for honorary road or bridge designations unless the affected city or county commission enacts a resolution supporting the designation. When the designated road or bridge segment is located in more than one city or county, resolutions supporting the designations must be passed by each affected local government prior to the erection of the markers.³

III. Effect of Proposed Changes:

Section 1 of the bill creates the following 31 honorary transportation facility designations around the state and directs the FDOT to erect suitable markers for each of the designations:

The graves are in a potter’s field that was part of the five-acre Woodlawn Cemetery, established in the 1920s because blacks during segregation were not allowed to bury their loved ones in the main cemeteries. The state now owns some of that land, which it uses as a right-of-way for the highway. Only a chain-link fence separates the neglected, decaying markers from the road... The cemetery is eligible for listing with the National Register of Historic Places.

The article quotes a county commissioner: “We need to ensure that there is some memorialization of what is there, a historic site that means a lot to a lot of people.”⁴
