Section 22. Section 582.02, Florida Statutes, is amended to read:

582.02 Legislative policy and findings; purpose of districts—

(1) It is the policy of the Legislature to promote the appropriate and efficient use of soil and water resources, protect water quality, prevent floodwater and sediment damage, preserve wildlife, protect public lands, and protect and promote the health, safety, and general welfare of the people of this state.

(2) The Legislature finds that the farm, forest, and grazing lands; green spaces; recreational areas; and natural areas of the state are among the basic assets of the state and the conservation preservation of these lands is necessary to protect and promote the health, safety, and general welfare of its people and is in the public interest; improper land use practices have caused and have contributed to, and are now causing and contributing to a progressively more serious erosion...
of the farm and grazing lands of this state by fire, wind and
water; the breaking of natural grass, plant, and forest cover
has interfered with the natural factors of soil stabilization,
causing loosening of soil and exhaustion of humus, and
developing a soil condition that favors erosion; the top soil is
being burned, washed and blown out of fields and pastures; there
has been an accelerated washing of sloping fields; these
processes of erosion by fire, wind and water speed up with
removal of absorptive topsoil, causing exposure of less
absorptive and less protective but more erosive subsoil; failure
by any landowner or occupier to conserve the soil and control
erosion upon her or his lands causes destruction by burning,
washing and blowing of soil and water from her or his lands onto
other lands and makes the conservation of soil and control
erosion of such other lands difficult or impossible.

(3) The Legislature further finds that to ensure the
preservation of the state’s farm, forest, and grazing lands;
green spaces; recreational areas; and natural areas, and to
conserve, protect, and use soil and water resources, it is
necessary that appropriate land and water resources protection
practices be implemented.

(4) The purpose of the soil and water conservation
districts is to provide assistance, guidance, and education to
landowners, land occupiers, the agricultural industry, and the
general public in implementing land and water resource
protection practices. The Legislature intends for soil and water
conservation districts to work in conjunction with federal, 
state, and local agencies in all matters that implement the 
provisions of this chapter.
