

The Florida Senate
BILL ANALYSIS AND FISCAL IMPACT STATEMENT

(This document is based on the provisions contained in the legislation as of the latest date listed below.)

Prepared By: The Professional Staff of the Committee on Banking and Insurance

BILL: CS/SB 530

INTRODUCER: Banking and Insurance Committee and Senator Steube

SUBJECT: Health Insurance

DATE: March 27, 2017

REVISED: _____

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1.	Johnson	Knudson	BI	Fav/CS
2.			JU	
3.			RC	

Please see Section IX. for Additional Information:

COMMITTEE SUBSTITUTE - Substantial Changes

I. Summary:

CS/SB 530 revises provisions of the Insurance Code relating to prior authorization and step therapy or fail first protocols. The bill creates an expedited, standard process for the approval or denial of prior authorizations and protocol exceptions, which provides greater transparency for consumers and providers regarding policies and procedures.

Under prior authorization, a health care provider is required to seek approval from an insurer before a patient may receive a health care service under the plan. Step therapy or fail first protocols for medical treatment or prescription drugs coverage require an insured or enrollee to try a certain drug or treatment, before receiving coverage for another drug or medical treatment. However, timely access to health care can be a significant issue for anyone with an illness, but it is particularly critical for individuals who have conditions with the potential to cause death, disability, or serious discomfort unless treated with the most appropriate medical care.

The bill:

- Requires a health insurer (which means a health insurer, health maintenance organization (HMO), or Medicaid managed care plan), or pharmacy benefit manager (PBM) on behalf of a health insurer to authorize or deny a prior authorization request or a protocol exception request or appeal of a denial in nonurgent care situation within 72 hours after receipt of a prior authorization form or protocol exception request. In urgent circumstances, such approval or denial is required within 24 hours.

- Provides greater transparency for consumers by requiring health insurers or PBMs to provide public access on its website to any current prior authorization requirements, restrictions, and forms on its website and in written or electronic form upon request. If a health insurer, or PBM intends to amend or implement a new prior authorization requirement or restriction, such entity must update the website 60 days prior to the effective date of the new requirement or restriction. Notification of the change must be provided to all insureds or enrollees using the affected service and to all contract providers who provide the affected services at least 60 days before the effective date.
- Requires a health insurer to grant a protocol exception request if certain conditions are met.
- Provides that if the health insurer authorizes the protocol exception request, the health insurer must specify the approved medical procedure, course of treatment, or prescription drug benefits.
- Requires that if the health insurer denies the protocol exception request, the health insurer must provide specified information, including the procedure to appeal the determination.

The fiscal impact on the Medicaid program is indeterminate. The State Group Insurance program indicates that the two fully-insured HMOs would incur an indeterminate negative impact. The provisions of the bill would not have a fiscal impact on the state's self-funded insurance plans.

II. Present Situation:

Regulation of Insurers and Health Maintenance Organizations in Florida

The Office of Insurance Regulation (OIR) licenses and regulates the activities of insurers, HMOs, and other risk-bearing entities.¹ The Agency for Health Care Administration (agency) regulates the quality of care provided by HMOs under part III of ch. 641, F.S. Before receiving a certificate of authority from the OIR, an HMO must receive a Health Care Provider Certificate from the agency.² As part of the certification process used by the agency, an HMO must provide information to demonstrate that the HMO has the ability to provide quality of care consistent with the prevailing standards of care.³

The Florida Insurance Code requires health insurers and HMOs to provide an outline of coverage or other information describing the benefits, coverages, and limitations of a policy or contract. This may include an outline of coverage describing the principal exclusions and limitations of the policy.⁴ Further, each contract, certificate, or member handbook of an HMO must delineate the services for which a subscriber is entitled and any limitations under the contract.⁵

Section 627.4234, F.S., requires a health insurance policy or health care services plan, which provides medical, hospital, or surgical expense coverage delivered or issued for delivery in this state to contain one or more of the following procedures or provisions to contain health insurance costs or cost increases:

- Coinsurance.

¹ Section 20.121(3)(a), F.S.

² Section 641.21(1), F.S.

³ Section 641.495, F.S.

⁴ Section 627.642, F.S.

⁵ Section 641.31(4), F.S.

- Deductible amounts.
- Utilization review.
- Audits of provider bills to verify that services and supplies billed were furnished and that proper charges were made.
- Scheduled benefits.
- Benefits for preadmission testing.
- Any lawful measure or combination of measures for which the insurer provides to the office information demonstrating that the measure or combination of measures is reasonably expected to have an effect toward containing health insurance costs or cost increases.

Pursuant to s. 627.42392, F.S., any health insurer (health insurer, HMO, Medicaid managed care plan) or pharmacy benefit manager, on behalf of the health insurer, that does not use an online prior authorization form must use a standardized prior authorization form adopted by the Financial Services Commission to obtain a prior authorization for a medical procedure, course of treatment, or prescription drug benefit. Such form must include all clinical documentation necessary for the health insurer to make a decision.

Florida's Statewide Medicaid Managed Care⁶

The Florida Medicaid program is a partnership between the federal and state governments. In Florida, the Agency for Health Care Administration (agency) oversees the Medicaid program.⁷ The Statewide Medicaid Managed Care (SMMC) program is comprised of the Managed Medical Assistance (MMA) program and the Long-term Care (LTC) managed care program. The agency contracts with managed care plans to provide services to eligible enrollees.⁸

Managed Care Covered Services

The benefit package offered by the MMA plans is comprehensive and covers all Medicaid state plan benefits (with very limited exceptions). This includes all medically necessary services for children. Most Florida Medicaid enrollees who are eligible for the full array of Florida Medicaid benefits are enrolled in an MMA plan. The agency maintains coverage policies for most Florida Medicaid services, which are incorporated by reference into Rule 59G-4, F.A.C. Florida Medicaid managed care plans cannot be more restrictive than these policies or the Florida Medicaid state plan (which is approved by the federal Centers for Medicare and Medicaid Services) in providing services to their enrollees.

Section 409.91195, F.S., establishes the Pharmaceutical and Therapeutics (P&T) committee within the agency for the development of a Florida Medicaid preferred drug list (PDL). The P&T committee meets quarterly, reviews all drug classes included in the formulary at least every 12 months, and may recommend additions to and deletions from the agency's Medicaid PDL,

⁶ Agency for Health Care Administration, Analysis of SB 530 (Feb. 22, 2017) (on file with Senate Committee on Banking and Insurance).

⁷ Part III of ch. 409, F.S., governs the Medicaid program.

⁸ A managed care plan that is eligible to provide services under the SMMC program must have a contract with the agency to provide services under the Medicaid program; be a health insurer, an exclusive provider organization or a HMO authorized under ch. 624, 627, or 641, F.S., respectively, or a provider service network authorized under s. 409.912(2), F.S., or an accountable care organization authorized under federal law. (s. 409.962, F.S.)

such that the PDL provides for medically appropriate drug therapies for Florida Medicaid recipients and an array of choices for prescribers within each therapeutic class. The agency also manages the federally required Medicaid Drug Utilization Board, which meets quarterly, develops, and reviews clinical prior authorization criteria, including step-therapy protocols for drugs that are not on the Medicaid PDL.

Florida Medicaid managed care plans serving MMA enrollees are required to provide all prescription drugs listed on the agency's PDL and otherwise covered by Medicaid.⁹ As such, the Florida Medicaid managed care plans have not implemented their own plan-specific formulary or PDL. The Florida Medicaid managed care plan's prior authorization criteria/protocols related to prescribed drugs cannot be more restrictive than the criteria established by the agency.

Prior Authorization Requirements

Florida Medicaid managed care plans may implement service authorization and utilization management requirements for the services they provide under the SMMC program. However, Florida Medicaid managed care plans are required to ensure that service authorization decisions are based on objective evidenced-based criteria; utilization management procedures are applied consistently; and all decisions to deny or limit a requested service are made by health care providers who have the appropriate clinical expertise in treating the enrollee's condition. The Florida Medicaid managed care plans are also required to adopt practice guidelines that are based on valid and reliable clinical evidence or a consensus of health care professionals in a particular field; consider the needs of the enrollees; are adopted in consultation with providers; and are reviewed and updated periodically, as appropriate.¹⁰

Florida Medicaid managed care plans must establish and maintain a utilization management system to monitor utilization of services, including an automated service authorization system for denials, service limitations and reductions of authorization. Section 627.42392, F.S., requires the use of a standard prior authorization form by health insurers. A health insurer that does not provide an electronic prior authorization process for use by its providers, is required to use the prior authorization form adopted by the Financial Services Commission for authorization of procedures, treatments, or prescription drugs. Currently, Medicaid managed care plans are required by contract to have electronic authorization processes, therefore they are exempt from this provision.

The SMMC contract requires managed care plans to authorize or deny a standard request for prior authorization for services other than prescribed drugs within 7 days, and authorize or deny an expedited request within 48 hours of receiving the request. Within 24 hours after receipt of a request, a managed care plan must respond to a request for prior authorization. The timeframe for standard authorization decisions can be extended up to 7 additional days if the enrollee or the

⁹ See Agency for Health Care Administration Pharmacy Policy available at http://ahca.myflorida.com/Medicaid/Policy_and_Quality/Policy/pharmacy_policy/index.shtml (last viewed Mar. 19, 2017).

¹⁰ These guidelines are consistent with requirements found in federal and state regulations (See 42 CFR s. 438.236(b)). All service authorization decisions made by the managed care plans must be consistent with the State's Medicaid medical necessity definition (Rule 59G-1.010, F.A.C).

provider requests an extension or the managed care plan justifies the need for additional information and describes how the extension is in the enrollee's interest.

Enrollee Materials and Services

Managed care plans are contractually required to notify enrollees via the enrollee handbook of any procedures for obtaining required services and authorization requirements, including any services available without prior authorization. All enrollee communications, including written materials, spoken scripts, and websites, must be at or near the fourth grade reading level. Managed care plans are required by contract to issue a provider handbook to all providers that includes prior authorization and referral procedures, including required forms. Managed care plans are required to keep all provider handbooks and bulletins up to date and in compliance with state and federal laws. The managed care plans must notify its enrollees in writing of any changes to covered services or service authorization protocols at least 30 days in advance of the change.

The managed care plan must send a written notice of adverse benefit determination to the enrollee to inform the enrollee about a decision to deny, reduce, suspend, or terminate a requested service and provide directions on how the enrollee may ask for a plan appeal to dispute the managed care plan's adverse benefit determination. The enrollee has 60 days after the plan's adverse benefit determination to ask for a plan appeal. For decisions that are appealed, the managed care plan must have a second health care professional who was neither involved in any previous level of review or decision-making, nor a subordinate of any such individual. The managed care plan then has 30 days from the date of the enrollee's request to make a final decision. The managed care plan has 72 hours to respond to the enrollee or his or her authorized representative's request for an expedited plan appeal. The enrollee must complete the plan appeal process before asking for a Medicaid fair hearing.

Florida' State Group Insurance Program

Under the authority of s. 110.123, F.S., the Department of Management Services (DMS), through the Division of State Group Insurance, administers the state group insurance program by providing employee benefits such as health, life, dental, and vision insurance products under a cafeteria plan consistent with s. 125, Internal Revenue Code. To administer the state group health insurance program, the DMS contracts with third party administrators, HMOs, and a PBM for the state employees' prescription drug program pursuant to s. 110.12315, F.S.

Contractually, health plans and contracted third party administrators are required to review urgent or emergency prior authorization requests within 24 hours of receipt and within 14 calendar days of initial receipt for routine requests. Current industry standards for a such a utilization review change notices to plan participants/enrollees is 30 days.¹¹

¹¹ Department of Management Services, *Analysis of SB 530* (Mar. 23, 2017) (on file with Senate Banking and Insurance Committee).

Federal Patient Protection and Affordable Care Act

Health Insurance Reforms

The federal Patient Protection and Affordable Care Act (PPACA) was signed into law on March 23, 2010.¹² The PPACA requires health insurers to make coverage available to all individuals and employers, without exclusions for preexisting conditions and without basing premiums on any health-related factors. The PPACA also mandates required essential health benefits,¹³ and other provisions.

The PPACA requires insurers and HMOs that offer qualified health plans (QHPs) to provide ten categories of essential health benefits (EHB), which includes prescription drugs.¹⁴ The federal Health Insurance Marketplace must certify such plans of an insurer or HMO.¹⁵ The federal deadline for insurers and HMOs to submit 2018 rates and forms to the Florida Office of Insurance Regulation is May 3, 2017.^{16,17}

Prescription Drug Coverage

For purposes of complying with the federal EHBs for prescription drugs, plans must include in their formulary drug list the greater of one drug for each U.S. Pharmacopeia (USP) category and class; or the same number of drugs in each USP category and class as the state's EHB benchmark plan. Plans must have a Pharmacy and Therapeutics Committee design formularies using scientific evidence that will include consideration of safety and efficacy, cover a range of drugs in a broad distribution of therapeutic categories and classes, and provide access to drugs that are included in broadly accepted treatment guidelines. The PPACA also requires plans to implement an internal appeals and independent external review process if an insured is denied coverage of a drug on the formulary.¹⁸

Plans are required to publish an up-to-date and complete list of all covered drugs on its formulary drug list, including any tiered structure and any restrictions on the way a drug can be obtained, in

¹² The Patient Protection and Affordable Care Act (Pub. L. No. 111–148) was enacted on March 23, 2010. The Health Care and Education Reconciliation Act of 2010 (Pub. L. No. 111–152), which amended and revised several provisions of the Patient Protection and Affordable Care Act, was enacted on March 30, 2010.

¹⁸ 45 C.F.R. s. 147.136.

a manner that is easily accessible to insureds, prospective insureds, the state, and the public.¹⁹ Restrictions include prior authorization, step therapy, quantity limits and access restrictions.²⁰

Cost Containment Measures Used by Insurers and HMOs

Insurers use many cost containment and utilization review strategies to manage medical and drug spending and patient safety. For example, plans may place utilization management requirements on the use of certain medical treatments or drugs on their formulary. Under prior authorization, a health care provider is required to seek approval from an insurer before a patient may receive a specified diagnostic or therapeutic treatment or specified prescription drugs under a plan. In some cases, plans require an insured to use a step therapy protocol for drugs or a medical treatment, which requires the insured to try one drug or medical procedure first to treat the medical condition before they will cover another drug or procedure for that condition.

III. Effect of Proposed Changes:

Section 1 revises s. 627.42392, F.S., relating to prior authorization by a health insurer. A health insurer means an authorized health insurer offering major medical or similar comprehensive coverage, a Medicaid managed care plan, or an HMO. The section provides a definition of the term, “urgent care situation,” which has the same meaning as in s. 627.42393, F.S. (see section 2, below).

A health insurer or a PBM on behalf of a health insurer is required to provide any current prior authorization requirements, restrictions, and forms on a publicly accessible website and in written or electronic format upon request. The requirements must be described in clear and easily understandable language. Further, the bill requires any clinical criteria to be described in language easily understandable by a provider.

If a health insurer or a PBM on behalf of a health insurer intends to amend or implement new prior authorization requirements or restrictions, health insurer or PBM must:

- Ensure that the new or amended requirements or restrictions have been available on the respective website at least 60 days before the effective date of the changes. This requirement does not apply to expansion of coverage.
- Provide notice to policyholders and providers who are affected by the changes at least 60 days before the effective date. Such notice may be delivered electronically or by other methods mutually agreed upon by the insured or provider.

These notice requirements do not apply to expansion of coverage.

Health insurers or PBMs on behalf of health insurers must approve or deny prior authorization requests in urgent and nonurgent care circumstances within 24 hours and 72 hours, respectively, after receipt of the prior authorization form. Notice must be given to the patient and the treating provider of the patient.

¹⁹ 45 C.F.R. s. 156.122(d).

²⁰ According to CMS, this formulary drug list website link should be the same direct formulary drug list link for obtaining information on prescription drug coverage in the Summary of Benefits Coverage, in accordance with 45 CFR s. 147.200(a)(2).

Section 2 creates s. 627.42393, F.S., relating to step therapy or fail first protocols. The bill defines the following terms:

- “Fail first protocol,” means a written protocol that specifies the order in which a certain medical procedure, prescription drugs or course of treatment must be used to treat an insured’s condition.
- “Health insurer” has the same meaning as provided in s. 627.42392, F.S. (see section 1, above).
- “Preceding prescription drug or medical treatment,” means a medical procedure, course of treatment, or prescription drug that must be used pursuant to a health insurer’s fail first protocol as a condition of coverage under a health insurance policy or HMO contract to treat an insured’s condition.
- “Protocol exception” means a determination by a health insurer that a fail first protocol is not medically appropriate or indicated for treatment of an insured’s condition; and the health insurer authorizes the use of another medical procedure, course of treatment, or prescription drug prescribed or recommended by the treating provider for the insured’s condition.
- “Urgent care situation” means an injury or condition of an insured which, if medical care and treatment is not provided earlier than the time generally considered by the medical profession to be reasonable for a nonurgent situation, in the opinion of the insured’s treating physician, would seriously jeopardize the insured’s life or health or ability to regain maximum function or subject the patient to severe pain that cannot be managed adequately.

A health insurer is required to publish on its website and provide to a written process to the insured and provider to request a protocol exception. The procedure must include the following:

- A description of the manner in which an insured may request a protocol exception.
- The manner and timeframe in which a health insurer is required to authorize or deny a protocol exception request or respond to an appeal to a health insurer’s authorization or denial of a request.
- The conditions in which the protocol exception request must be granted.

The health insurer must authorize or deny a protocol exception request or respond to an appeal of a health insurer’s authorization or denial of a request within 24 hours after receipt in an urgent care situation; or within 72 hours after receipt in a nonurgent care situation. The health insurer must provide a detailed written explanation of the reason for the denial, and the procedure to appeal the health insurer’s determination.

A health insurer must grant a protocol exception request if:

- A preceding prescription drug or medical treatment is contraindicated or will likely cause an adverse reaction or physical or mental harm to the insured;
- A preceding prescription drug is expected to be ineffective based on the medical history of the insured and the clinical evidence of the characteristics of the preceding prescription drug or medical treatment;
- The insured previously received a preceding prescription drug or another prescription drug or medical treatment that is in the same pharmacologic class or that has the same mechanism of action as a preceding prescription drug, respectively, and such drug or treatment lacked efficacy or effectiveness or adversely affected the insured; or

- The bill provides that a preceding prescription drug or medical treatment is not in the best interest of the insured because the insured's use of such drug or treatment is expected to
 - Cause a significant barrier to the insured's adherence to or compliance with the insured's plan of care;
 - Worsen the medical condition of the insured that exists simultaneously but independently with the condition under treatment; or
 - Decrease the ability of the insured to achieve or maintain his or her ability to perform daily activities.

The health insurer may request a copy of relevant documentation from the insured's medical record in support of a protocol exception request.

Section 3 provides that this act is effective July 1, 2017.

IV. Constitutional Issues:

A. Municipality/County Mandates Restrictions:

None.

B. Public Records/Open Meetings Issues:

None.

C. Trust Funds Restrictions:

None.

D. Constitutional Issues:

The bill revises provisions affecting persons who have or may have a contract with an insurer or HMO. In *Pomponio v. Claridge of Pompano Condominium, Inc.*,²¹ the Florida Supreme Court stated that some degree of flexibility has developed over the last century in interpreting the contract clause in order to ameliorate the harshness of the original rigid application used by the United States Supreme Court. The Florida Supreme Court invalidated a statute, as an unconstitutional impairment of contract, which required the deposit of rent into a court registry during litigation involving obligations under a contract lease. The court set forth several factors to be considered in balancing whether a state law has in fact operated as a substantial impairment of a contractual relationship, stating “[t]he severity of the impairment measures the height of the hurdle the state legislation must clear.”

The court stated that if there is minimal alteration of contractual obligations, the inquiry may end at its first stage. Severe impairment pushes the inquiry into a careful examination of the nature and purpose of the state legislation. The factors to be considered are whether:

²¹ *Pompano v. Claridge of Pompano Condominium, Inc.*, 378 So.2d 774 (Fla. 1979).

- The law was enacted to deal with a broad, generalized economic or social problem;
- The law operates in an area that was already subject to state regulation at the time the contract was entered into; and
- The effect on the contractual relationships is temporary or whether it is severe, permanent, immediate, and retroactive.

In *United States Fidelity & Guaranty Co. v. Department of Insurance*,²² the Florida Supreme Court followed *Pomponio* and said that the method requires a balancing of a person's interest to not have his or her contracts impaired, with the state's interest in exercising its legitimate police power. The court adopted the method used by the U.S. Supreme Court, in which the threshold inquiry is "whether the state law has, in fact, operated as a substantial impairment of a contractual relationship." The severity of the impairment increases the level of scrutiny.

Relevant to the extent of the impairment is whether the industry, the complaining party had entered, had been regulated in the past because if the party was already subject to regulation when the contract was entered, then it is understood that it would be subject to further legislation upon the same topic. If the state regulation constitutes a substantial impairment, the state must have a significant and legitimate public purpose and any adjustment of the rights and responsibilities of the contracting parties must be appropriate to the public purpose justifying the legislation.

V. Fiscal Impact Statement:

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

Implementation of the bill may give health care providers greater flexibility in prescribing medications to meet the unique medical needs of their patients and reduce the administrative burden associated with the prior authorization process and the current step therapy or fail first therapy protocols.

Insurers and HMOs may experience an indeterminate increase in costs associated with changes in the step therapy protocols provided in the bill. These cost increases are likely to pass through to the purchasers of health insurance, such as individuals and employers.

The provisions of the bill would not apply to self-insured health plans since plans are preempted from state regulation under the Employee Retirement Income Security Act of 1974.

²² *United States Fidelity & Guaranty Co. v. Department of Insurance*, 453 So.2d 1355 (Fla. 1984).

C. Government Sector Impact:**Division of State Group Insurance/DMS²³**

The fiscal impact of the bill is unknown. However, the bill would negatively impact the division's fully insured HMO vendors, Capital Health Plan (CHP) and Florida Health Care Plans (FHCP). The initial estimated fiscal impact for CHP would be \$450,000 annually. The FHCP was unable to provide a fiscal impact estimate. The provisions of the bill would not affect the state's self-funded insurance plans.

The requirement of a 60-day notice for utilization review changes may prevent timely changes when external or internal factors facilitate an urgent need for the change. The 60-day notice requirement could discourage utilization review changes all together, many of which are made to maintain or increase quality. Other changes are made to assist in the elimination of fraud, abuse and overuse of certain prescription drugs and medical treatments.

Medicaid²⁴

According to the agency, CS/SB 530 will have an indeterminate fiscal impact on the agency. The bill will require the agency to amend the SMMC contracts to modify the prior authorization requirements and the utilization review timeframes. The agency will use current agency resources to amend the contract. The bill will significantly affect the business (staffing, systems, etc.) and clinical operations of the Medicaid managed care plans. The bill requires the plans to shorten the time to review authorizations, which will increase the administrative costs.

The agency notes that the situations specified in the bill, for which a plan would be required to authorize a request for a "protocol exception," should already be contemplated in the plans' clinical/evidence based authorization criteria under the SMMC program and are factors addressed in the application of the State's Medicaid medical necessity definition. All Medicaid managed care plans must use the State's Medicaid medical necessity definition in their approval and denial of services. As such, it is unclear of the benefit achieved from applying the requirements related to the "protocol exception" to managed care plans furnishing services under the SMMC program, other than to add administrative requirements on the plans in an effort to expedite authorization decisions. The timely response standards for protocol exceptions will require the plans to increase their authorization staff and will result in an increase in administrative expenses. These increased costs will need to be reflected in the SMMC capitation rates as administrative expenses.

²³ Department of Management Services, *Senate Bill 530 Analysis* (Mar. 23, 2017) (on file with Senate Committee on Banking and Insurance).

²⁴ Agency for Health Care Administration, *Senate Bill 530 Analysis* (Feb. 22, 2017) (on file with the Senate Committee on Banking and Insurance).

VI. Technical Deficiencies:**Terms**

The provisions of section 1 of the bill apply to health insurers and pharmacy benefit managers on behalf of health insurers. The OIR regulates health insurers; however, PBMs are not licensed or regulated by the OIR. It is unclear whether the health insurer is responsible for the actions of the PBM. The OIR analysis of the bill expresses concern regarding enforcing PBM compliance with this bill.²⁵

Notice of Prior Authorization Changes

The bill requires health insurers or a PBM to provide at least 60 days' prior notice to insureds and physicians prior to implementing new requirements or restrictions to the prior authorization process. However, the bill does not allow for exceptions in circumstances where a drug or procedure is found to be hazardous or could result in harm to an insured.

VII. Related Issues:**Effective Date**

According to the OIR, the filing submission deadline for PPACA-compliant form and rate filings in the individual and small group market is May 3, 2017. This deadline is applicable for products sold on and off the exchange. However, the effective date of the bill is July 1, 2017. Many plans operate on a calendar year basis.

VIII. Statutes Affected:

This bill substantially amends section 627.4292 of the Florida Statutes.

This bill creates section 627.4293 of the Florida Statutes.

IX. Additional Information:

- A. **Committee Substitute – Statement of Substantial Changes:**
(Summarizing differences between the Committee Substitute and the prior version of the bill.)

Banking and Insurance Committee on March 27, 2015:

The CS:

- Revises definitions.
- Removes applicability of the provisions of the bill to utilization review entities.
- Revises procedures for prior authorization and fail first protocols.
- Shortens response time for health insurers to authorize or deny a prior authorization request or a fail first protocol exception request for nonurgent care situations from 3 business days to 72 hours.

²⁵ Office of Insurance Regulation, *2017 Agency Legislative Bill Analysis of SB 530* (February 2, 2017)(on file with the Senate Committee on Banking and Insurance).

This Senate Bill Analysis does not reflect the intent or official position of the bill's introducer or the Florida Senate.
