Notwithstanding this subsection, an entity shall be deemed a clinic and must be licensed under this part in order to receive reimbursement under the Florida Motor Vehicle No-Fault Law, ss. 627.730-627.7405, unless exempted under s. 627.736(5)(h).

Section 60. Paragraph (a) of subsection (2) of section 408.033, Florida Statutes, is amended to read:

408.033 Local and state health planning.—

Present paragraphs (f) through (l) of subsection (3) of section 408.036, Florida Statutes, are redesignated as paragraphs (e) through (k), respectively, present paragraphs (o) through (t) of that subsection are redesignated as paragraphs (l) through (q), respectively, and present paragraphs (e), (m), (n), and (p) of that subsection are amended, to read:

408.036 Projects subject to review; exemptions.—
(3) EXEMPTIONS.—Upon request, the following projects are subject to exemption from the provisions of subsection (1):

(m)1. For the provision of adult open-heart services in a hospital located within the boundaries of a health service planning district, as defined in s. 408.032(5), which has
experienced an annual net out-migration of at least 600 per 2060 

heart surgery cases for 3 consecutive years according to the 2061 

most recent data reported to the agency, and the district's 2062 

population per licensed and operational open-heart programs 2063 
exceeds the state average of population per licensed and operational open-heart programs by at least 25 percent. All 2064 

hospitals within a health service planning district which meet 2065 

the criteria referenced in subparagraphs 2.a.-h. shall be 2066 
eligible for this exemption on July 1, 2004, and shall 2067 
receive the exemption upon filing for it and subject to the following:

编码： Words struck out are deletions; words underlined are additions.

A hospital that has received a notice of intent to grant a certificate of need for the establishment of an open-heart surgery program is entitled to receive a letter of exemption for the establishment of an adult open-heart surgery program upon filing a request for exemption and complying with the criteria enumerated in sub-subparagraphs 2.a.-h. A hospital that has not received a notice of intent to grant a certificate of need or a final order of the agency granting a certificate of need for the establishment of an open-heart surgery program is entitled to immediately commence operation of the program.
when the application for exemption submitted under this paragraph complies with the following criteria:

a. The applicant must certify that it will meet and continuously maintain the minimum licensure requirements adopted by the agency governing adult open-heart programs, including the most current guidelines of the American College of Cardiology and American Heart Association Guidelines for Adult Open Heart Programs.

b. The applicant must certify that it will maintain sufficient appropriate equipment and health personnel to ensure quality and safety.

c. The applicant must certify that it will maintain appropriate times of operation and protocols to ensure availability and appropriate referrals in the event of emergencies.

d. The applicant can demonstrate that it has discharged at least 300 inpatients with a principal diagnosis of ischemic heart disease for the most recent 12-month period as reported to the agency.

e. The applicant is a general acute care hospital that is in operation for 3 years or more.

f. The applicant is performing more than 300 diagnostic cardiac catheterization procedures per year, combined inpatient and outpatient.

g. The applicant’s payor mix at a minimum reflects the community average for Medicaid, charity care, and self-pay patients or the applicant must certify that it will provide a minimum of 5 percent of Medicaid, charity care, and self-pay to open-heart-surgery patients.
h. If the applicant fails to meet the established criteria for open-heart programs or fails to reach 300 surgeries per year by the end of its third year of operation, it must show cause why its exemption should not be revoked.

3. By December 31, 2004, and annually thereafter, the agency shall submit a report to the Legislature providing information concerning the number of requests for exemption it has received under this paragraph during the calendar year and the number of exemptions it has granted or denied during the calendar year.

(n) For the provision of percutaneous coronary intervention for patients presenting with emergency myocardial infarctions in a hospital without an approved adult open-heart-surgery program. In addition to any other documentation required by the agency, a request for an exemption submitted under this paragraph must comply with the following:

1. The applicant must certify that it will meet and continuously maintain the requirements adopted by the agency for the provision of these services. These licensure requirements shall be adopted by rule and must be consistent with the guidelines published by the American College of Cardiology and the American Heart Association for the provision of percutaneous coronary interventions in hospitals without adult open-heart services. At a minimum, the rules must require the following:

   a. Cardiologists must be experienced interventionalists who have performed a minimum of 75 interventions within the previous 12 months.

   b. The hospital must provide a minimum of 36 emergency interventions annually in order to continue to provide the
The hospital must offer sufficient physician, nursing, and laboratory staff to provide the services 24 hours a day, 7 days a week.

d. Nursing and technical staff must have demonstrated experience in handling acutely ill patients requiring intervention based on previous experience in dedicated interventional laboratories or surgical centers.

e. Cardiac care nursing staff must be adept in hemodynamic monitoring and Intra-aortic Balloon Pump (IABP) management.

f. Formalized written transfer agreements must be developed with a hospital with an adult open-heart-surgery program, and written transport protocols must be in place to ensure safe and efficient transfer of a patient within 60 minutes. Transfer and transport agreements must be reviewed and tested, with appropriate documentation maintained at least every 3 months. However, a hospital located more than 100 road miles from the closest Level II adult cardiovascular services program does not need to meet the 60-minute transfer time protocol if the hospital demonstrates that it has a formalized, written transfer agreement with a hospital that has a Level II program. The agreement must include written transport protocols that ensure the safe and efficient transfer of a patient, taking into consideration the patient’s clinical and physical characteristics, road and weather conditions, and viability of ground and air ambulance service to transfer the patient.

g. Hospitals implementing the service must first undertake a training program of 3 to 6 months’ duration, which includes establishing standards and testing logistics, creating quality...
assessment and error management practices, and formalizing
patient-selection criteria.

2. The applicant must certify that it will use at all times
the patient-selection criteria for the performance of primary
angioplasty at hospitals without adult open heart surgery
programs issued by the American College of Cardiology and the
American Heart Association. At a minimum, these criteria would
provide for the following:
   a. Avoidance of interventions in hemodynamically stable
      patients who have identified symptoms or medical histories.
   b. Transfer of patients who have a history of coronary
disease and clinical presentation of hemodynamic instability.

3. The applicant must agree to submit a quarterly report to
the agency detailing patient characteristics, treatment, and
outcomes for all patients receiving emergency percutaneous
coronary interventions pursuant to this paragraph. This report
must be submitted within 15 days after the close of each
calendar quarter.

4. The exemption provided by this paragraph does not apply
unless the agency determines that the hospital has taken all
necessary steps to be in compliance with all requirements of
this paragraph, including the training program required under
sub-subparagraph 1.g.

5. Failure of the hospital to continuously comply with the
requirements of sub-subparagraphs 1.e.-f. and subparagraphs 2.
and 3. will result in the immediate expiration of this
exemption.

6. Failure of the hospital to meet the volume requirements
of sub-subparagraphs 1.a. and b. within 18 months after the
program begins offering the service will result in the immediate
expiration of the exemption.

If the exemption for this service expires under subparagraph 5.
or subparagraph 6., the agency may not grant another exemption
for this service to the same hospital for 2 years and then only
upon a showing that the hospital will remain in compliance with
the requirements of this paragraph through a demonstration of
corrections to the deficiencies that caused expiration of the
exemption. Compliance with the requirements of this paragraph
includes compliance with the rules adopted pursuant to this
paragraph.

(m) (p) For replacement of a licensed nursing home on the
same site, or within 5 miles of the same site if within the same
subdistrict, if the number of licensed beds does not increase
except as permitted under paragraph (e) (f).

Section 62. Paragraph (b) of subsection (3) of section
408.0361, Florida Statutes, is amended to read:

408.0361 Cardiovascular services and burn unit licensure.—
(3) In establishing rules for adult cardiovascular
services, the agency shall include provisions that allow for:

(b) 1. For a hospital seeking a Level I program,
demonstration that, for the most recent 12-month period as
reported to the agency, it has provided a minimum of 300 adult
inpatient and outpatient diagnostic cardiac catheterizations or,
for the most recent 12-month period, has discharged or
transferred at least 300 patients with the principal
diagnosis of ischemic heart disease and that it has a
formalized, written transfer agreement with a hospital that has
a Level II program, including written transport protocols to ensure safe and efficient transfer of a patient within 60 minutes.

2.a. A hospital located more than 100 road miles from the closest Level II adult cardiovascular services program does not need to meet the diagnostic cardiac catheterization volume and ischemic heart disease diagnosis volume requirements in subparagraph 1., if the hospital demonstrates that it has, for the most recent 12-month period as reported to the agency, provided a minimum of 100 adult inpatient and outpatient diagnostic cardiac catheterizations or that, for the most recent 12-month period, it has discharged or transferred at least 300 patients with the principal diagnosis of ischemic heart disease.

b. However, A hospital located more than 100 road miles from the closest Level II adult cardiovascular services program does not need to meet the 60-minute transfer time protocol requirement in subparagraph 1., if the hospital demonstrates that it has a formalized, written transfer agreement with a hospital that has a Level II program. The agreement must include written transport protocols to ensure the safe and efficient transfer of a patient, taking into consideration the patient’s clinical and physical characteristics, road and weather conditions, and viability of ground and air ambulance service to transfer the patient.

3. At a minimum, the rules for adult cardiovascular services must require nursing and technical staff to have demonstrated experience in handling acutely ill patients requiring intervention, based on the staff member’s previous experience in dedicated cardiac interventional laboratories or
surgical centers. If a staff member’s previous experience is in a dedicated cardiac interventional laboratory at a hospital that does not have an approved adult open-heart-surgery program, the staff member’s previous experience qualifies only if, at the time the staff member acquired his or her experience, the dedicated cardiac interventional laboratory:

a. Had an annual volume of 500 or more percutaneous cardiac intervention procedures;

b. Achieved a demonstrated success rate of 95 percent or greater for percutaneous cardiac intervention procedures;

c. Experienced a complication rate of less than 5 percent for percutaneous cardiac intervention procedures; and

d. Performed diverse cardiac procedures, including, but not limited to, balloon angioplasty and stenting, rotational atherectomy, cutting balloon atheroma remodeling, and procedures relating to left ventricular support capability.

Such data may be based on internal financial reports which are certified to be complete and accurate by the provider. However, hospitals’ actual financial experience shall be their audited actual experience. Every nursing home shall submit to the agency, in a format designated by the agency, a statistical profile of the nursing home residents. The agency, in conjunction with the Department of Elderly Affairs and the Department of Health, shall review these statistical profiles and develop recommendations for the types of residents who might more appropriately be placed in their homes or other noninstitutional settings.

(8) Upon application for initial licensure or change of ownership licensure, the applicant shall furnish satisfactory proof of the applicant’s financial ability to operate in accordance with the requirements of this part, authorizing statutes, and applicable rules. The agency shall establish standards for this purpose, including information concerning the applicant’s controlling interests. The agency shall also establish documentation requirements, to be completed by each applicant, that show anticipated provider revenues and expenditures, the basis for financing the anticipated cash-flow requirements of the provider, and an applicant’s access to contingency financing. A current certificate of authority, pursuant to chapter 651, may be provided as proof of financial ability to operate. The agency may require a licensee to provide proof of financial ability to operate at any time if there is evidence of financial instability, including, but not limited to, unpaid expenses necessary for the basic operations of the provider. A licenseholder may not advertise or hold out to the public that he or she holds a license for other than that for which he or she actually holds the license.

(2) The operation or maintenance of an unlicensed provider or the performance of any services that require licensure without proper licensure is a violation of this part and authorizing statutes. Unlicensed activity constitutes harm that materially affects the health, safety, and welfare of clients, and constitutes abuse and neglect, as defined in s. 415.102. If after receiving notification from the agency, such person or entity fails to cease operation and apply for a license under this part and authorizing statutes, the person or entity shall be subject to penalties as prescribed by authorizing statutes and applicable rules. Each day of continued operation is a separate offense.

(4) Any person or entity that fails to cease operation after agency notification may be fined $1,000 for each day of noncompliance.

(5) When a controlling interest or licensee has an interest in more than one provider and fails to license a provider rendering services that require licensure, the agency may revoke all licenses, and impose actions under s. 408.814, and regardless of correction, impose a fine of $1,000 per day, unless otherwise specified by authorizing statutes, against each licensee until such time as the appropriate license is obtained or the unlicensed activity ceases for the unlicensed operation.

(6) In addition to granting injunctive relief pursuant to subsection (2), if the agency determines that a person or entity is operating or maintaining a provider without obtaining a license and determines that a condition exists that poses a threat to the health, safety, or welfare of a client of the provider, the person or entity is subject to the same actions and fines imposed against a licensee as specified in this part, authorizing statutes, and agency rules.

(7) Any person aware of the operation of an unlicensed provider must report that provider to the agency.

Any service under this section shall be provided only when medically necessary and in accordance with state and federal law.

Mandatory services rendered by providers in mobile units to Medicaid recipients may be restricted by the agency. Nothing in this section shall be construed to prevent or limit the agency from adjusting fees, reimbursement rates, lengths of stay, number of visits, number of services, or any other adjustments necessary to comply with the availability of moneys and any
limitations or directions provided for in the General Appropriations Act or chapter 216.

(7) INDEPENDENT LABORATORY SERVICES.—The agency shall pay for medically necessary diagnostic laboratory procedures ordered by a licensed physician or other licensed practitioner of the healing arts which are provided for a recipient in a laboratory that meets the requirements for Medicare participation and is appropriately certified by the Centers for Medicare and Medicaid Services under the federal Clinical Laboratory Improvement Amendments and the federal rules adopted thereunder licensed under chapter 483, if required.

409.9116 Disproportionate share/financial assistance program for rural hospitals.—In addition to the payments made under s. 409.911, the Agency for Health Care Administration shall administer a federally matched disproportionate share program and a state-funded financial assistance program for statutory rural hospitals. The agency shall make disproportionate share payments to statutory rural hospitals that qualify for such payments and financial assistance payments
to statutory rural hospitals that do not qualify for disproportionate share payments. The disproportionate share program payments shall be limited by and conform with federal requirements. Funds shall be distributed quarterly in each fiscal year for which an appropriation is made. Notwithstanding the provisions of s. 409.915, counties are exempt from contributing toward the cost of this special reimbursement for hospitals serving a disproportionate share of low-income patients.

(6) This section applies only to hospitals that were defined as statutory rural hospitals, or their successor-in-interest hospital, prior to January 1, 2001. Any additional hospital that is defined as a statutory rural hospital, or its successor-in-interest hospital, on or after January 1, 2001, is not eligible for programs under this section unless additional funds are appropriated each fiscal year specifically to the rural hospital disproportionate share and financial assistance programs in an amount necessary to prevent any hospital, or its successor-in-interest hospital, eligible for the programs prior to January 1, 2001, from incurring a reduction in payments because of the eligibility of an additional hospital to participate in the programs. A hospital, or its successor-in-interest hospital, which received funds pursuant to this section before January 1, 2001, and which qualifies under s. 395.602(2)(b) or s. 395.602(2)(e), shall be included in the programs under this section and is not required to seek additional appropriations under this subsection.

Section 78. Paragraphs (a) and (b) of subsection (1) of section 409.975, Florida Statutes, are amended to read:
409.975 Managed care plan accountability.—In addition to the requirements of s. 409.967, plans and providers participating in the managed medical assistance program shall comply with the requirements of this section.

(1) PROVIDER NETWORKS.—Managed care plans must develop and maintain provider networks that meet the medical needs of their enrollees in accordance with standards established pursuant to s. 409.967(2)(c). Except as provided in this section, managed care plans may limit the providers in their networks based on credentials, quality indicators, and price.

(a) Plans must include all providers in the region that are classified by the agency as essential Medicaid providers, unless the agency approves, in writing, an alternative arrangement for securing the types of services offered by the essential providers. Providers are essential for serving Medicaid enrollees if they offer services that are not available from any other provider within a reasonable access standard, or if they provided a substantial share of the total units of a particular service used by Medicaid patients within the region during the last 3 years and the combined capacity of other service providers in the region is insufficient to meet the total needs of the Medicaid patients. The agency may not classify physicians and other practitioners as essential providers. The agency, at a minimum, shall determine which providers in the following categories are essential Medicaid providers:

1. Federally qualified health centers.
2. Statutory teaching hospitals as defined in s. 408.07(44) s. 408.07(45).
3. Hospitals that are trauma centers as defined in s.
395.4001(14).

4. Hospitals located at least 25 miles from any other hospital with similar services.

Managed care plans that have not contracted with all essential providers in the region as of the first date of recipient enrollment, or with whom an essential provider has terminated its contract, must negotiate in good faith with such essential providers for 1 year or until an agreement is reached, whichever is first. Payments for services rendered by a nonparticipating essential provider shall be made at the applicable Medicaid rate as of the first day of the contract between the agency and the plan. A rate schedule for all essential providers shall be attached to the contract between the agency and the plan. After 1 year, managed care plans that are unable to contract with essential providers shall notify the agency and propose an alternative arrangement for securing the essential services for Medicaid enrollees. The arrangement must rely on contracts with other participating providers, regardless of whether those providers are located within the same region as the nonparticipating essential service provider. If the alternative arrangement is approved by the agency, payments to nonparticipating essential providers after the date of the agency’s approval shall equal 90 percent of the applicable Medicaid rate. Except for payment for emergency services, if the alternative arrangement is not approved by the agency, payment to nonparticipating essential providers shall equal 110 percent of the applicable Medicaid rate.

(b) Certain providers are statewide resources and essential
providers for all managed care plans in all regions. All managed care plans must include these essential providers in their networks. Statewide essential providers include:

1. Faculty plans of Florida medical schools.
2. Regional perinatal intensive care centers as defined in s. 383.16(2).
3. Hospitals licensed as specialty children’s hospitals as defined in s. 395.002(27) s. 395.002(28).
4. Accredited and integrated systems serving medically complex children which comprise separately licensed, but commonly owned, health care providers delivering at least the following services: medical group home, in-home and outpatient nursing care and therapies, pharmacy services, durable medical equipment, and Prescribed Pediatric Extended Care.

Managed care plans that have not contracted with all statewide essential providers in all regions as of the first date of recipient enrollment must continue to negotiate in good faith. Payments to physicians on the faculty of nonparticipating Florida medical schools shall be made at the applicable Medicaid rate. Payments for services rendered by regional perinatal intensive care centers shall be made at the applicable Medicaid rate as of the first day of the contract between the agency and the plan. Except for payments for emergency services, payments to nonparticipating specialty children’s hospitals shall equal the highest rate established by contract between that provider and any other Medicaid managed care plan.
