365	From the funds in Specific Appropriations 2246 through 2257, the Department of Economic Opportunity shall determine whether any funds provided for specific workforce programs, projects or initiatives are not an allowable use of federal funds. If the department finds that any project or initiative for which funds are specifically appropriated in this act is not an allowable use of federal funds, the department shall notify the Executive Office of the Governor, the chair of the Senate Committee on Budget and the chair of the House Appropriations Committee.	From the funds in Specific Appropriations 2246 through 2257, no federal or state funds shall be used to pay for space being leased by a Regional Workforce Board, Workforce Florida, Inc., or the Department of Economic Opportunity if it has been determined by whichever entity is the lessee that there is no longer a need for the leased space. All leases, and performance and obligations under the leases, are subject to and contingent upon an annual appropriation by the Florida Legislature. In the event that such annual appropriation does not occur, or in the alternative, there is either a reduction in funding from the prior annual appropriation or the entity which is the lessee determines that the annual appropriation is insufficient to meet the requirements of the leases, then the lessee has the right to terminate the lease upon written notice by the lessee and the lessee shall have no further obligations under the contracts.

From the funds in Specific Appropriations 2267 through 2272, any expenditure from the Temporary Assistance for Needy Families (TANF) Block Grant must be expended in accordance with the requirements and limitations of Part A of Title IV of the Social Security Act, as amended, or any other applicable federal requirement or limitation. Before any funds are released by the Department of Children and Family Services, each provider shall identify the number of clients to be served and certify their eligibility under Part A of Title IV of the Social Security Act. Funds may not be released for services to any clients except those so identified and certified.

The agency head or a designee shall certify that controls are in place to ensure that such funds are expended in accordance with the requirements and limitations of federal law and that reporting requirements of federal law are met. It shall be the responsibility of any entity to which such funds are appropriated to obtain the required certification prior to any expenditure of funds.

From the funds in Specific Appropriations 2267 through 2272, no federal or state funds shall be used to pay for space being leased by a Regional Workforce Board, Workforce Florida, Inc., or the Department of Economic Opportunity if it has been determined by whichever entity is the lessee that there is no longer a need for the leased space. The study shall provide recommendations for strategies specific to each rural community. Besides employing the existing statutory incentive programs and the statutorily authorized criteria waivers for those programs in rural areas, the study shall identify alternative means of enticing businesses to locate or expand in rural areas. Alternative means may include increased incentive amounts, reduced incentive performance metrics, newly proposed incentives, and newly proposed ways to eliminate non-financial barriers to business expansion in rural areas, such as permitting barriers, workforce needs or needed transportation improvements. The study shall take into account local incentive programs as well as the existing state statutory incentive programs. EFI may use the annual data reported to the Office of Economic and Demographic research pursuant to sections 125.045 and 166.021, Florida Statutes, related to incentives given to businesses, and the information reported directly to EFI related to the community inventory under section 288.912, Florida Statutes. The strategies developed shall include the most effective and efficient methods of coordinating and employing the resources and planning efforts of all of the entities identified in section 288.0656(6)(a), Florida Statutes, as Rural Economic Development Initiative agencies. The study shall specifically identify and rank both the impediments deemed most problematic and the inducements deemed most effective as they relate to promoting economic growth in each rural community. The study should also recommend the types and characteristics of businesses that should be priority targets for economic development in each rural community. EFI shall submit the study and recommendations no later than December 1, 2012, to the chair of the Senate Budget Committee and the chair of the House Appropriations Committee. The DEO shall also include in the annual incentives report required pursuant to section 288.907, Florida Statutes, on December 30, 2012, detailed information showing geographic distribution of incentive contracts, specifically showing the difference between rural and non rural communities and the industry type for such projects.

## Conference Senate Offer #1 Line Item #16:

### Amendment Language:

420.5071 Assessment of need for affordable housing.-

(1) The corporation shall develop an allocation system that seeks to secure an equitable distribution of multifamily rental housing competitively financed by the corporation across all counties in the state, taking into consideration the most recent needs assessment studies prepared by the Shimberg Center for housing Studies at the University of Florida. Such assessment shall provide the most recent county level data on rental households at or below 60 percent of area median income that are cost burdened as a result of paying more than 40 percent of their income for housing and utility costs. The data prepared by the Shimberg Center for Housing Studies shall be used by the corporation to establish the statewide level of effort for multifamily affordable housing financed by the corporation. If the Shimberg Center should cease to produce such data, the corporation shall rely on another reputable third party data source.

(2) The level of effort analysis prepared by the corporation shall also be conducted for each county. Any counties which fall below the statewide level of effort defined in (1) shall be deemed lower level of effort counties, and any counties which fall above the statewide level of effort shall be deemed higher level of effort counties. The corporation will determine the number of units needed to raise the percentage of each county with a lower level of effort to equal the statewide level of effort. That number of units shall be deemed that county's level of effort gap. The corporation shall provide scoring and review criteria to ensure that developments in counties with a level of effort gap are funded before developments in counties with no level of effort gap.

(3) In implementing this goal, the corporation shall take into consideration the rental housing needs of geographic groups as provided in s. 420.5087(1), and demographic groups including the elderly as defined in s. 420.503(15), farmworkers as defined in s. 420.503(18), homeless persons as defined in s. 420.621(5), persons with special needs as defined in s. 420.0004(13), and extremely low income persons as defined in s. 420.0004(9), which may vary from the level of effort findings in (2). Using the criteria in s. 420.5087(6), the corporation shall ensure that applications for development are not funded in all or parts of any county where there is no demonstrated market demand for such units.

(4) The corporation shall adopt rules to implement the provisions of this section.
