## The Florida Senate Local Funding Initiative Request Fiscal Year 2023-2024

LFIR # 2123

#### a. What specific purpose or goal will be achieved by the funds requested?

The goal is to meet the rising mental health needs of the community by providing immediate access to services and continued follow up care. Florida ranks 42nd in mental health workforce availability which is witnessed by individuals not being able to get necessary and timely appointments in the community. The MHA takes on interns from several accredited college Master's programs and hires Registered Mental Health Interns going for licensure to fill the community disparities. By being a training facility, MHA increases the workforce to provide providers staffing needs to improve the access to therapeutic prevention and intervention and addressing the gaps that currently exist in our communities.

#### b. What activities and services will be provided to meet the intended purpose of these funds?

Provide free, immediate, same day mental health screenings regardless of income and insurance as screening services are non reimbursable by insurance companies. Additionally, the funds will be able to increase therapeutic and psychiatric services to residents of Indian River and surrounding counties targeting the impoverished and Asset Limited, Income Constrained, Employed (ALICE) population including those individuals and families who are under 300% of the poverty level and have no insurance or lack access and ability to pay for mental health care.

#### c. What direct services will be provided to citizens by the appropriation project?

Provide same day, walk-in mental health screenings free of charge which can include suicide risk assessments, violence risk assessments, safety planning, crisis support, and resource linkage. Focus on a therapy first model which promotes early intervention and prevention by providing therapy services, psychiatric care, support groups, community collaborations, and education. Adding the expansion of training and providing supervision of both Master's and Registered Interns with the focus on increasing skilled providers in the community.

#### d. Who is the target population served by this project? How many individuals are expected to be served?

The funds will be able to increase immediate and emerging mental health needs by providing screening, therapeutic and psychiatric services to residents of Indian River and surrounding counties targeting the impoverished and ALICE population (44%) (last reported 2020). In fact, 80% of MHAIRC clients are under 200% or below the poverty line. MHAIRC serves people of all ages and income levels, regardless if they are insured or able to pay. With additional funding, the MHAIRC will be able to serve a minimum of 15% additional patients and provide 2,000 more services to the community.

### e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Having immediate access to mental health care provides timely prevention and intervention of symptoms exacerbating which could lead to a higher level of care. This includes: Baker Acts, incarceration, emergency room visits, or inpatient admissions. Increasing the availability of mental health professionals in the workforce to meet the needs that are increasing in communities with wait times that currently can be several weeks. By having same-day screenings, a cost-avoidance of \$3.48 million was produced. With additional funding, the MHAIRC will be able to serve a minimum of 1,400 patients and provide 1,700 additional hours of prevention and intervention services to the community.

### f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Return any portions of funds for which the performance standards are not met or deliverables not received.
