Major Features of South Florida's Water System

- **River Channelization** ■
- **Herbert Hoover Dike** ■
- **Water Conservation Areas** ■
- **Protective Levees** ■
 - Everglades Agricultural Area
 - Lower East Coast
- **Drainage Network** ■
 - Regional Canals
 - Salinity Structures
- **Today's expanded system includes:**
 - 16 Counties (8.7 million people)
 - 2,100 miles of canals
 - 2,800 miles of levees
 - 1,000+ Water Control Structures

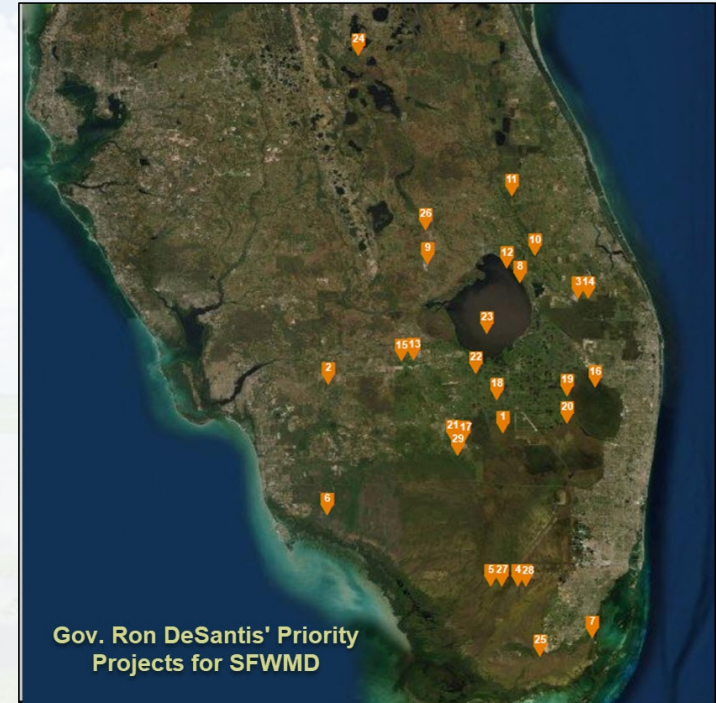

Flood Control Changed the Ecosystem

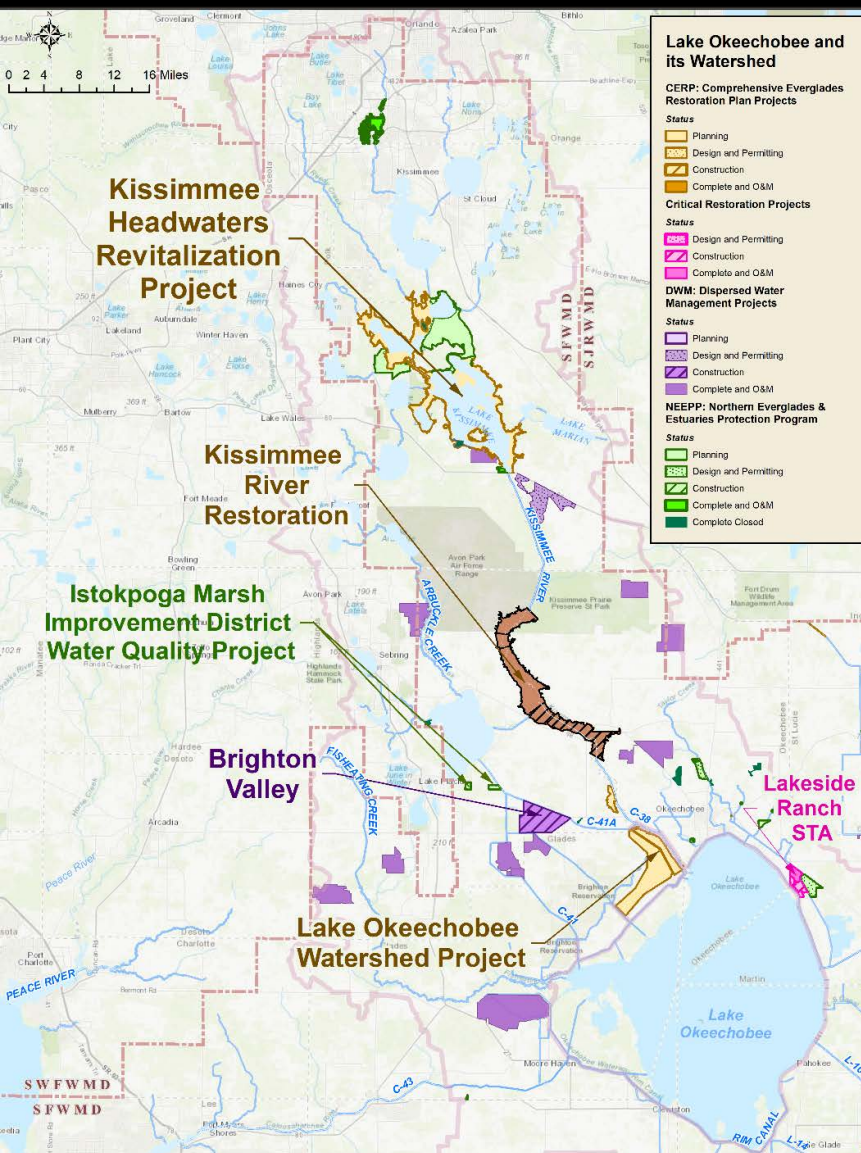

Blue-Green Algae Hurt South Florida's Communities and Economy

Governor DeSantis' Executive Order and Priority Restoration Projects

- Expedite projects to restore the Everglades and improve water quality

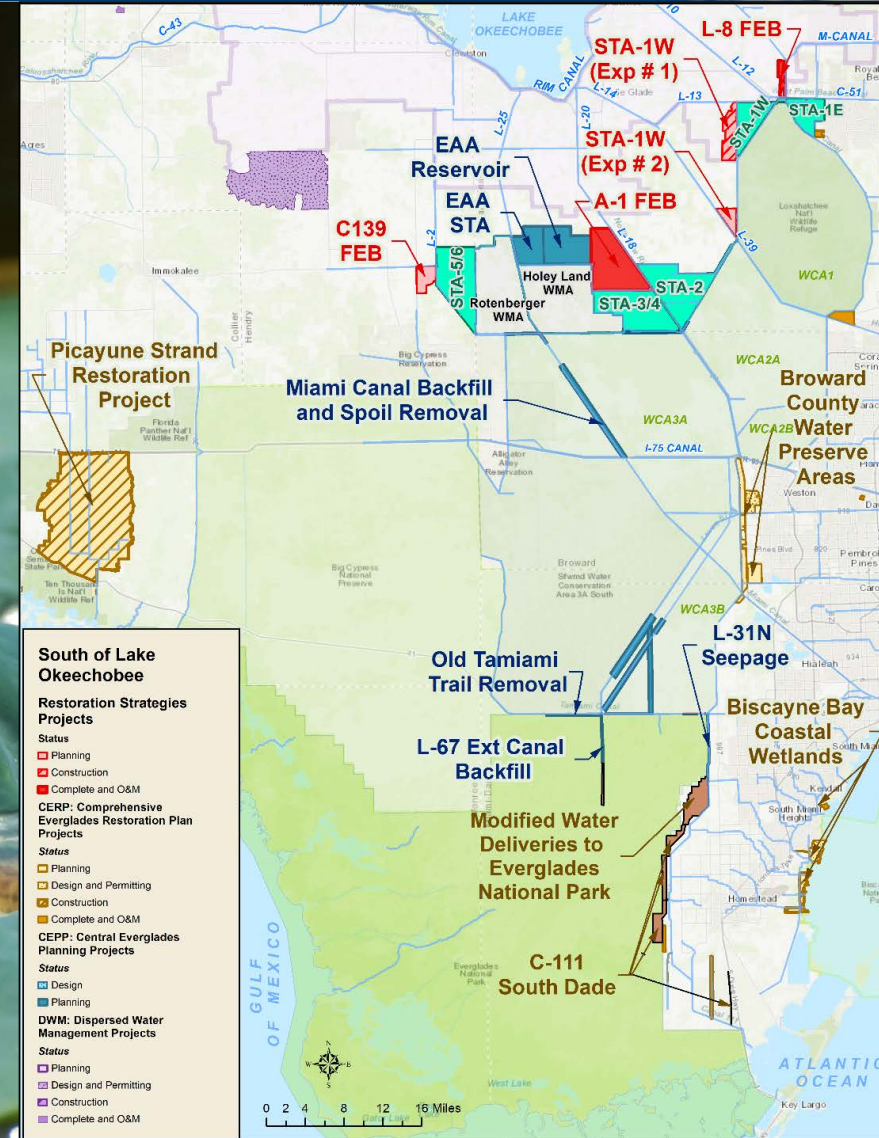

Lake Okeechobee & Watershed

- Kissimmee River Restoration
- Lake Okeechobee Watershed Restoration Project
- Dispersed Water Management public-private partnerships
- Lakeside Ranch Stormwater Treatment Area

South of Lake Okeechobee

- Dozens of projects underway to send more water south
 - EAA Reservoir
 - Restoration Strategies
 - Tamiami Trail
 - C-111 South Dade Project

Everglades Restoration is Working

The Miami Herald

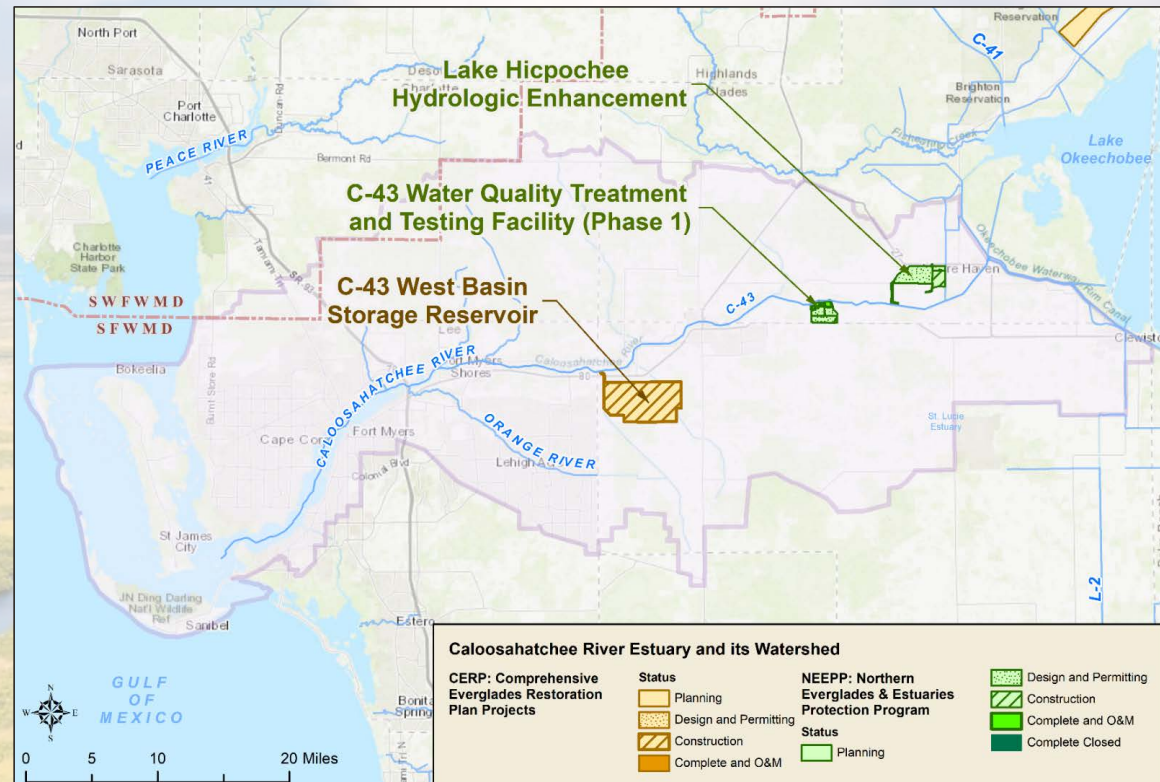

South Florida wading birds
nested like crazy in 2018, a
great sign for the Everglades

SOUTH FLORIDA SunSentinel

Record number of wading
bird nest is sign of hope
for Everglades

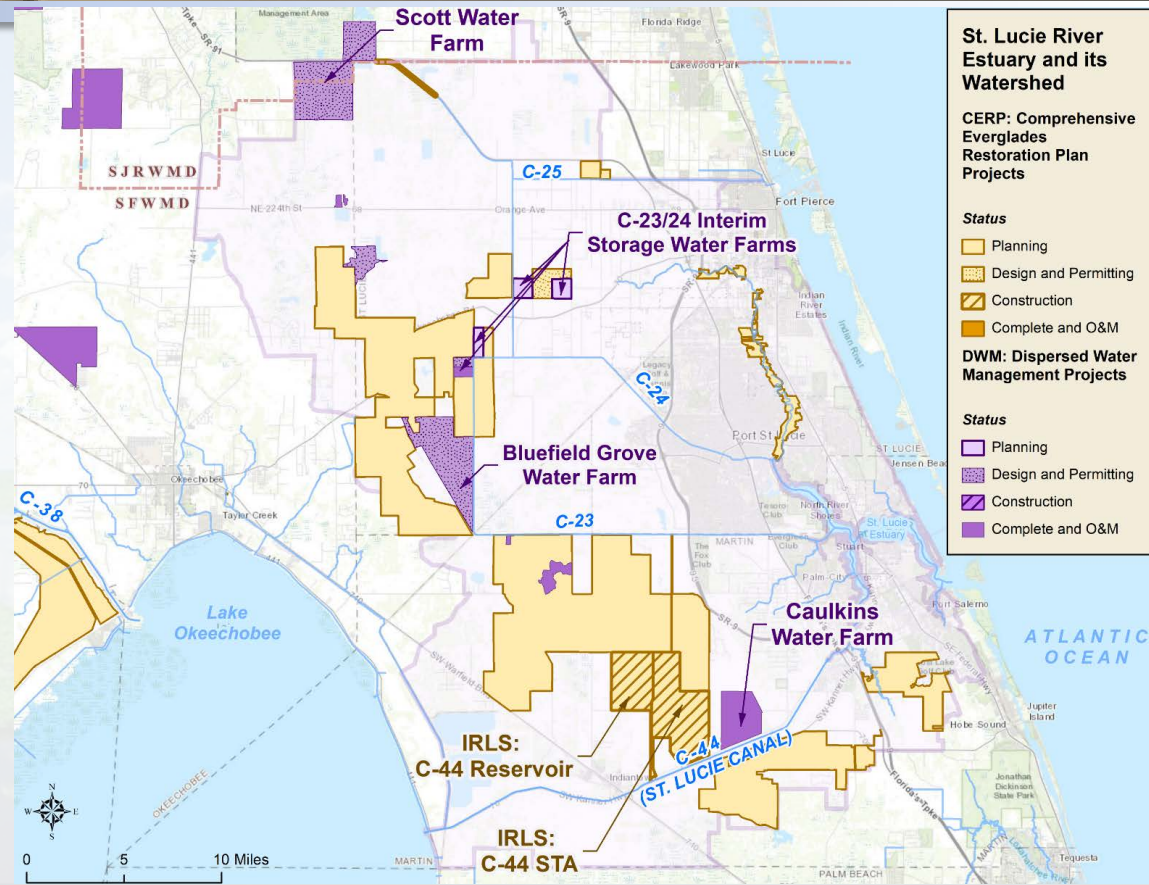

Caloosahatchee River & Estuary

- Caloosahatchee Reservoir
- Caloosahatchee Reservoir Water Quality Feature
- Lake Hicpochee Hydrologic Enhancement

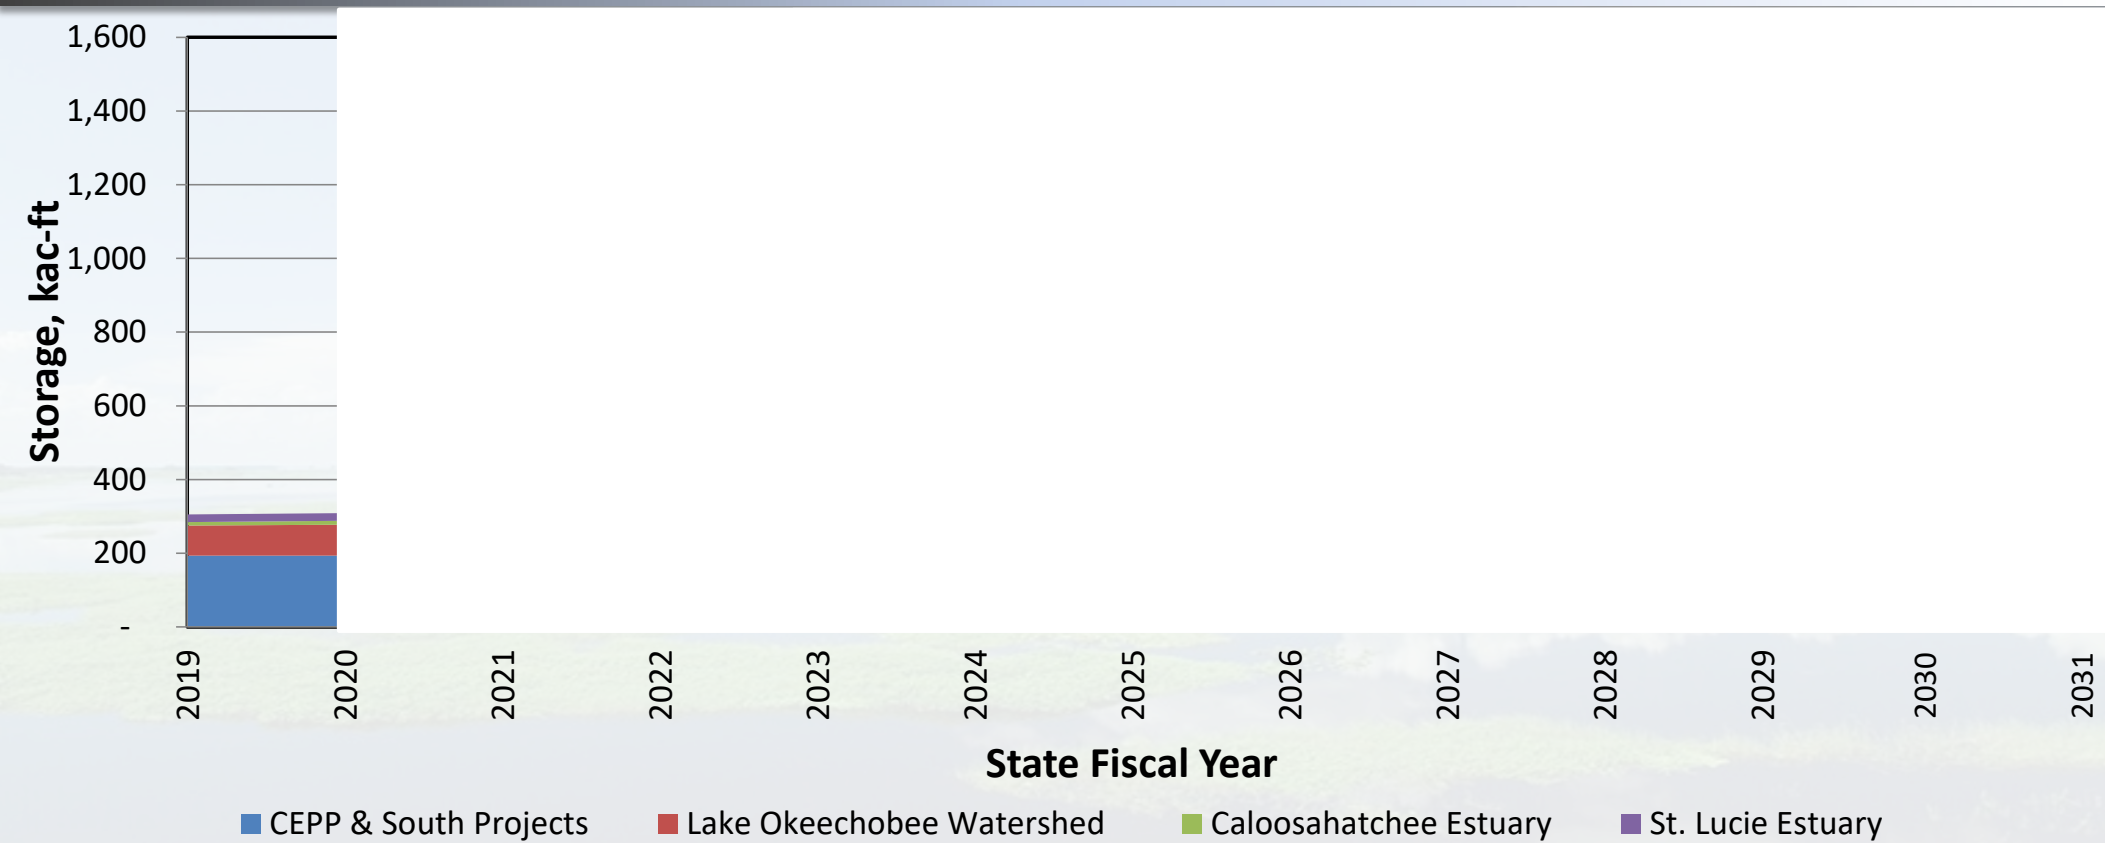

St. Lucie Estuary

- C-44 Reservoir and Stormwater Treatment Area
- Caulkins Water Farm

Annual Storage Capacity by Region

S-001 (10/14/14)

The State of the Florida Citrus Industry and CRAFT

*Presented to
Appropriations Subcommittee on Agriculture, Environment and General Government*

November 6, 2019

*Presented by
Michael W. Sparks, Florida Citrus Mutual*

The Past Decade Has Been Difficult...

The Most Challenging in the History of Florida Citrus

- Invasive Pest & Diseases
- Hurricane Irma – September 10, 2017
- Significant production loss
- Falling orange juice consumption
- Increased Imports, Large Inventories
- Downward Pressure on Grower Returns

Florida Citrus is at a Crossroads!

Impact of Huanglongbing & Hurricane Irma on the Florida Orange Crop

Season	Boxes	Bearing Acres
2007-08	170,200,000	463,900
2009-10	133,700,000	451,100
2011-12	146,700,000	433,400
2013-14	104,700,000	418,700
2015-16	81,700,000	378,000
2017-18	45,050,000	361,800
2018-19	71,750,000	392,515
2019-20 (F)	74,000,000	392,515

Huanglongbing, HLB, or Citrus Greening

- No single factor has contributed more to the decline in citrus production than HLB
- Bacterial disease spread by the Asian Citrus Psyllid
- Attacks a tree's vascular system and reduces fruit production to unsustainable levels in just a few years
- The solution may be a combination of research findings and not one “silver bullet” answer
- All commercial citrus groves with mature trees have been infected by HLB
- Tree mortality now exceeds tree replanting rates
- Grower production costs have tripled while utilizing a “mixed bag” strategy and focusing on increased production from existing groves

Photo courtesy of UF/IFAS

Florida Citrus...

We Are Down but Not Out; Don't Write Our Obituary!

- Provides more than 50,000 jobs
- Citrus forms the backbone of many communities throughout the state's interior
- Total economic impact \$7.2B annually

- Orange juice is still the most popular fruit juice among U.S. consumers with per capita consumption dwarfing other fruit juices.
- Popularity is not only bolstered by great taste but we are also the most nutrient dense juice packed with Vitamin C, potassium and folic acid

The Future of Florida Citrus Will be Found in Research

- Florida citrus growers in 2008 formed the Citrus Research and Development Foundation (CRDF), which is funded by self-imposed taxes on growers as well as supplemental general revenue appropriations. The CRDF's mission is to advance research to ensure the survival of Florida's citrus industry.
- More than 100 research projects are currently underway across the globe.
- The Florida citrus industry and state and federal government have spent more than \$260 million
 - \$148 million by CRDF
- We are seeing results.

\$74 million	Growers
\$52 million	General Revenue
\$22 million	Other

Photo courtesy of University of Florida/IFAS

Basic Research Breakthroughs

- **Horticulture:** Variety improvement teams have developed new rootstocks and scions that are ready to be field-tested for HLB tolerance/resistance.
- **Entomology:** An understanding of transmission of the HLB bacteria by the Asian citrus psyllid (ACP) is ready to be developed into a successful management program.
- **Pathology:** Recent understanding of the below-ground pathology to improve root health will lead to better control of soil-borne root pathogens and pests of citrus with HLB.

Photos courtesy of USDA

CRAFT is Moving Research to the Field

- The future of the Florida citrus industry now relies on moving these laboratory breakthroughs into the grove.
- CRAFT (Citrus Research and Field Trials)
 - Will Craft the Future of Florida Citrus
 - Grower-Driven, Adoption Research
 - Includes Experimental Designs
- 2019 research program includes large-scale grower field trials (2,046 acres in first year) utilizing management tools for new plantings, including grove design, planting preparation, pest management, and post-planting production practices.
 - Cost analysis
 - Six year data collection and evaluations
 - Communication of successful field trials
- The goal is to provide growers with the confidence to replant and rebuild the Florida citrus industry to a level that will sustain existing infrastructure and ultimately drive expansion.

Citrus Research and Field Trials

CRAFT

- Program Elements
 - Utilize a combination of BMPs to combat the negative effects of HLB and ACP
 - Menu Approach – Grower Driven

- Detailed, consistent data collection
 - Partner with USDA-ARS (National Program)
 - Quarterly Production Information
 - Productivity Reports
 - Quality and Quantity of fruit from test blocks

- Application Date closed October 15, 2019

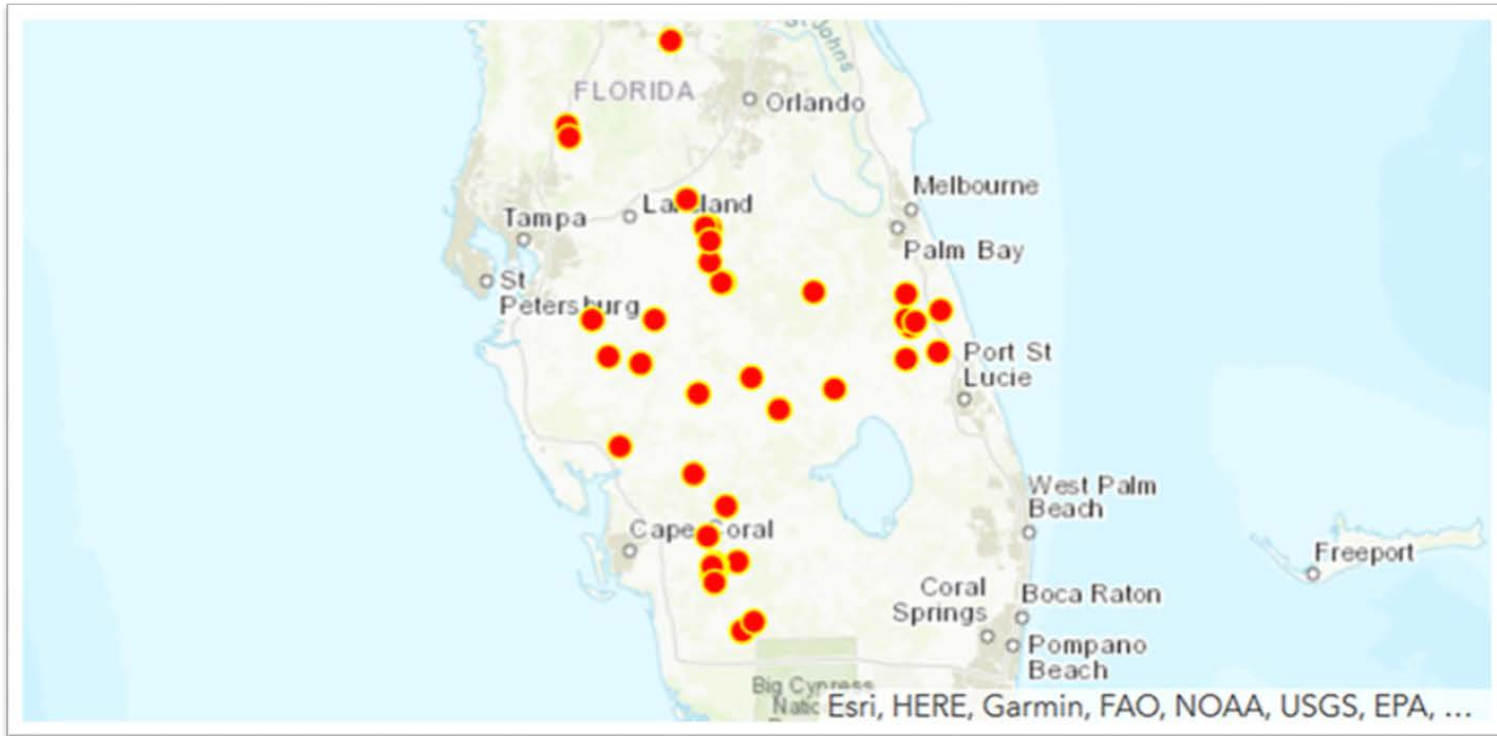

Citrus Research and Field Trials

CRAFT

- CRAFT Foundation (Established August 2019)
 - DSO of FDACS
 - Stakeholder Board of Directors
 - Technical Working Group
 - Limited Scope
- Multiple revenue sources and excellent financial support
- Grower Agreements will provide clear, transparent contract terms and payments
- Trees in the Ground
 - January – May, 2020

2019-20 CRAFT Participation

2,046 acres around all citrus-producing regions in Florida

- 1618 solid blocks acres
- 428 re-set acres in established groves

2019-20 CRAFT Participation

Variety

Orange Grapefruit

Solid Set vs. ReSet

Solid Set

Solid Set Acreage

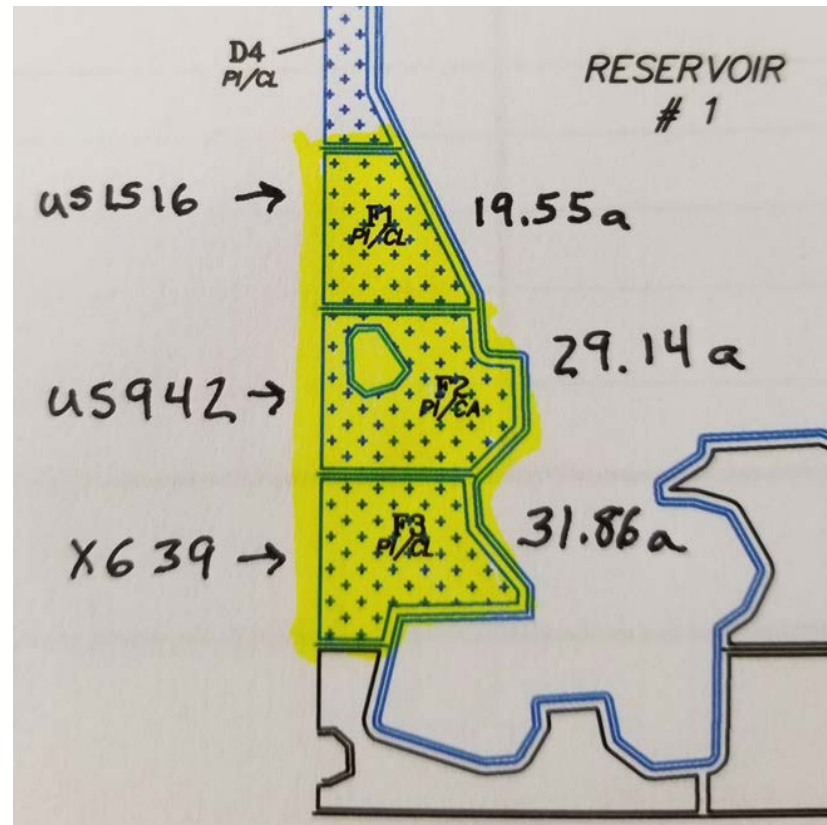

<20 acres 21-40 acres 41-60 acres
61-80 acres 81-100 acres

2019-20 CRAFT Participation

- Participating groves in 16 counties
- Those counties represent 98% of Florida citrus production

2019-20 CRAFT Participation Rootstock and Scions

2019-20 CRAFT Participation High Density Plantings

	STANDARD DENSITY	CRAFT PROJECTS
GRAPEFRUIT	120	174
ORANGE	176	373

2019-20 CRAFT Participation Psyllid Control

- Independent Field Testing and Ground Truthing
- Fertigation

2019-20 CRAFT Participation

Considerations of Soil & Nutrition

- Time-Released Fertilizer and Nutritionals
- UF/IFAS Nutritional Management Program
- Production Records
- Ground Truthing

Moving Forward with CRAFT

- Florida citrus growers are appreciative of the support they have received from the State of Florida and USDA Partners.

- We know that the continued partnership is absolutely necessary for us to be able to transform and regrow the Florida citrus industry.
 - USDA/APHIS – MAC \$ 5.0 Million (2 years)
 - USDA/APHIS – CHRP \$ 2.2 Million (2 years)
 - State of Florida \$ 2.0 Million (1 year)
 - Grower \$11.0 Million (1 year)
 - \$20.2 Million

2019-20 CRAFT Participation Year One

2019-20 CRAFT Participation Year Six

Thank You!

UF/IFAS Industrial Hemp Pilot Project Workshops

The UF/IFAS Industrial Hemp Pilot Project has established a hemp research program through state and federal authorization. Cultivation and variety trials of industrial hemp began in spring 2019 at UF/IFAS research facilities. The UF/IFAS Hemp Workshop and Field Day series will summarize the early research efforts and results regarding hemp cultivation, variety trials, and invasion risk assessment at UF. Registration will be open until space is filled.

Workshops 8:30 a.m. - 12 noon | \$30 (includes lunch)
Field Visits 1:30 p.m. - 4:00 p.m. | \$10

July 30, 2019
UF/IFAS Extension Straughn Professional Development Center, Gainesville, Florida (seating capacity 200)
Field visit: Agronomy Forage Research Unit, Hague, Florida (limited to 200)
To register: <https://tinyurl.com/HempPilot-GNV2019>

August 2, 2019
UF/IFAS Extension Miami-Dade Homestead office (seating limited to 100)
Field visit: UF/IFAS Tropical Research and Education Center, Homestead, Florida (limited to 200)
To register: <https://tinyurl.com/HempPilot-MIA2019>

August 16, 2019
UF/IFAS Mid-Florida Research and Education Center, Apopka, Florida (seating limited to 100)
Field visit (limited to 200)
To register: <https://tinyurl.com/HempPilot-Apopka2019>

All UF/IFAS industrial hemp research plots have restricted access. Visitors are allowed access only with prior approval and accompanied by a UF/IFAS representative. Location addresses will be provided to registered participants prior to the workshops and field visits.

Hemp's healing potential has Florida farmers high on the now-legal crop

- ✓ Continued research
- ✓ Connected with Floridians
- ✓ Formed Hemp Advisory Council
- ✓ Collaborated with sister agencies
- ✓ **Preparing FDACS staff**

Department Preparedness

Each FDACS division is preparing employees for their role in the hemp program.

Division of Food Safety and Division of Agricultural Environmental Services labs have prepared methodology and protocols for testing levels of delta-9 THC in hemp products including tinctures, edibles, harvested crop and more.

Billy Meeks, Division of Agricultural Environmental Services, shown with a High Pressure Liquid Chromatograph (HPLC) which can detect the amount of various cannabinoids in animal feed and vegetative hemp sample matrices.

Looking Ahead

1. Education
2. Automation of permit process
3. Continued collaboration with FDLE
4. Development of best management practices
5. FFF membership / “Made with Florida Hemp”

My Benefits

FRESH FROM FLORIDA

PAYING MEMBERS

For \$50/ year, you will receive:

- Exclusive use of the “Fresh From Florida” logo
- Customized metal 2’ X 3’ sign or banner
- Logo-incentive reimbursement opportunities on Florida-grown or harvested products
- Point-of-Purchase materials for Florida-grown products at retail
- Listing on trade leads shared with retailers and buyers
- Links to recipes and “Fresh From Florida” social media content
- Trade leads and exporting guidance and assistance
- Retail, wholesale and consumer campaigns drive awareness and consumption of Florida seafood and agricultural commodities
- Resource for local sourcing of agricultural, seafood and food products

To apply for membership go to WWW.FRESHFROMFLORIDA.COM/CANNABIS/
