## I. Summary:

Senate Bill 102 apportions the state into 28 single-member Congressional districts as required by the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions.

## II. Present Situation:

The 2020 Census revealed an unequal distribution of population growth across Florida's Congressional districts. Therefore, districts must be adjusted to comply with the "one person, one vote" principle such that each district must be substantially equal in total population.[1]

According to the 2020 Census, 21,538,187 people resided in Florida as of April 1, 2020. That represents a population growth of 2,736,877 people from 2010 to 2020, approximately a 15 percent increase. Due to the population growth within the last decade, Florida is apportioned an additional congressional seat, increasing its representation to 28.[2]

Table 1 below shows the changes in population for each of Florida's current congressional and state legislative districts and their respective ideal populations.

[1] *See Reynolds v. Sims*, 377 U.S. 533, 568 (1964).

**Table 1. Florida Congressional and State Legislative Districts Summary 2010 – 2020**

| Florida Fast Facts | 2010 | 2020 | Difference |
|---|---|---|---|
| Statewide Population | 18,801,310 | 21,538,187 | +2,736,877 |
| Number of Congressional Seats | 27 | 28 | +1 seat |
| Congressional District Ideal Population | 696,345 | 769,221 | +72,876 |
| Florida House of Representatives District Ideal Population *(based on 120 seats)* | 156,678 | 179,485 | +22,807 |
| Florida Senate District Ideal Population *(based on 40 seats)* | 470,033 | 538,455 | +68,422 |

According to the 2020 Census, the congressional district with the largest population has 955,602 people (186,381 more than the ideal), and the congressional district with the smallest population has 727,465 people (41,756 less than ideal).

**Background**

The terms "redistricting" and "reapportionment" are often used interchangeably to describe the process of redrawing Congressional and state legislative district boundaries after each decennial census. Redrawing districts is necessary to accommodate population growth and shifts, ensuring that each district contains equal or nearly equal populations in compliance with applicable state and federal law.

The U.S. Constitution requires the apportionment of the U.S. House of Representatives after each decennial census to distribute each of the U.S. House of Representatives' 435 seats between the 50 states and to equalize population between districts within each state.[3]

**The 2020 Census**

Established by the U.S. Constitution, the census has been conducted every 10 years by the United States Census Bureau since 1790 to determine the number of people living in the United States. Article I, s. 2 of the U.S. Constitution states that "The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct.[4]

Florida is one of 21 states that explicitly requires the use of census data for redistricting.[5] Article X, s. 8 of the Florida Constitution designates each decennial census of the state taken by the

United States as the official census of the state.[6] Florida Statutes also designate the most recent federally conducted decennial census as the official census for redistricting.[7]

Public Law (P.L.) 94-171 requires the Census Bureau to provide states the opportunity to identify the small area geography for which data is needed to conduct legislative and congressional redistricting. The law also requires the U.S. Census Bureau to furnish these tabulations of population to each state, at the county, tract, block group, and block levels, within one year of Census Day.[8]

Title 13, U.S. Code requires that the state-level apportionment population counts be delivered to the President of the United States within 9 months of the census date. In the 2020, 2010, and most 20th century censuses, the census date has been April 1, meaning that the statutory deadline for delivering the counts to the President is December 31 of the census year.[9]

The delivery of 2020 Census results was delayed due to several factors affecting the Census Bureau's collection and processing, including the COVID-19 pandemic, natural disasters that included hurricanes and wildfires, civil unrest, and legal challenges.[10]

The state population counts for apportionment were delivered to the President on April 26, 2021 (originally due December 31, 2020). The U.S. Census Bureau provided redistricting data as legacy format summary files, which is tabular data, for all states on August 12, 2021 (originally due April 1, 2021). The full redistricting data toolkit was delivered to all 50 states and the public on September 16, 2021 (originally due April 1, 2021).

**Redistricting Criteria and Concepts**

Florida follows various criteria and standards as it relates to drawing congressional districts, including the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions.

**The United States Constitution**

The United States (U.S.) Constitution requires the reapportionment of the U.S. House of Representatives after each decennial census to distribute each of the U.S. House of Representatives' 435 seats between the states and to equalize population among districts within each state.[11]

Article I, s. 4 of the U.S. Constitution grants to each state legislature the exclusive authority to apportion seats designated to that state by providing the legislative bodies with the authority to

determine the times, place and manner of holding elections for senators and representatives. Consistent therewith, Florida adopts its Congressional apportionment plans by legislation subject to gubernatorial approval.

In addition to state specific requirements to redistrict, states are obligated to redistrict based on provisions within the United States Constitution. In *Wesberry v Sanders*, the United States Supreme Court held that districts must be as nearly equal in population as practicable.[12] Derived from the Fourteenth Amendment, this principle is commonly referred to as "one person, one vote".[13] For Congressional districts, "as practicable" has been interpreted to mean exactly equal based on census data available at the time of redistricting.[14]

The requirement that each district be equal in population applies differently to Congressional districts than to state legislative districts. The populations of Congressional districts must achieve absolute mathematical equality (+/- one person from ideal population), with no de minimis exception.[15] Limited population variances are permitted if they are "unavoidable despite a good faith effort" or if a valid "justification is shown."[16] In practice, Congressional districting has strictly adhered to the requirement of exact mathematical equality and in *Kirkpatrick v. Preisler*, the Court rejected several justifications for violating this principle.

The Fourteenth Amendment has also been interpreted to prohibit racial predominance.[17] The U.S Supreme Court has stated: "The equal protection clause prohibits a state, without sufficient justification, from separating its citizens into different voting districts on the basis of race." A redistricting plan "that expressly distinguishes among citizens because of their race [must] be narrowly tailored to further a compelling government interest." Such strict scrutiny review applies not only to redistricting plans that expressly distinguish citizens because of race, but also those plans "that, although race neutral, are, on their face unexplainable on grounds other than race."[18]

**The Federal Voting Rights Act**

The Federal Voting Rights Act (VRA) prohibits any state or political subdivision from enacting a map that results in the denial or abridgement of any U.S. citizen's right to vote on account of race, color, or status as a member of a language minority group and purposeful discrimination.[19] The VRA also protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.[20]

Section 2 of the VRA requires the creation of a district that performs for racial and language minorities where a minority population is geographically compact and sufficiently numerous to be a majority in a single-member district, the minority population is politically cohesive, the

majority votes sufficiently as a bloc to enable it usually to defeat the minority-preferred candidate, and under all of the circumstances, the minority population has less opportunity than others to participate in the political process and elect representatives of its choice.[21]

Section 5 of the VRA prohibits purposeful discrimination and protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.[22] Section 5 contains a coverage formula that was applied to "covered jurisdictions" to determine if there was a history of discrimination against racial or language minorities.[23] Such jurisdictions had to be "precleared" before any of the changes could take effect, meaning that any substantial changes made to voting laws, including redistricting plans, in these "covered jurisdictions" could not be implemented without first obtaining federal permission.[24] In Florida, Collier, Hardee, Hendry, Hillsborough, and Monroe counties were subject to Department of Justice preclearance in regards to redistricting until the coverage formula was invalidated in 2013 in *Shelby County v. Holder*.[25] However, as *Apportionment I* states, "Florida's new constitutional provision, codified the non-retrogression principle of Section 5 (VRA) and has now extended it statewide. In other words, Florida now has a statewide non-retrogression requirement independent of Section 5."[26]

**The Florida Constitution**

In 2010, voters amended the Florida Constitution to create additional standards for establishing Congressional district boundaries.[27] The standards are set forth in two tiers.

***Tier – One Standards***

Article III, s. 20(a) of the Florida Constitution prohibits line-drawing that intentionally favors or disfavors a political party or an incumbent. It also affords protection to racial and language minorities. Districts may not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process; or to diminish their ability to elect representatives of their choice. Finally, it requires that districts must be contiguous. The order in which the tier-one standards are set out in the Constitution does not establish any priority among those standards within the tier.[28]

The tier-one standards provide that "[n]o apportionment plan or district shall be drawn with the intent to favor or disfavor a political party or an incumbent."[29] The Florida Supreme Court has held that Florida's constitutional provision "prohibits intent, not effect" because "any redrawing of lines, regardless of intent, will inevitably have an effect on the political composition of a

district and likely whether a political party or incumbent is advantaged or disadvantaged."[30] Nonetheless, there is no acceptable level of improper intent.[31]

The tier-one standards also provide protections for racial and language minorities. Districts may "not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process"; or to "diminish their ability to elect representatives of their choice."[32]

The Court has interpreted the tier-one constitutional provisions that relate to racial or language minorities' ability to participate in the political process or elect a candidate of their choice to mean that "the Legislature cannot eliminate majority-minority districts or weaken other historically performing minority districts where doing so would actually diminish a minority group's ability to elect its preferred candidates…in addition to majority-minority districts, coalition or crossover districts that previously provided minority groups with the ability to elect a preferred candidate under the benchmark plan must also be recognized."[33]

The Court went on to say, "that under Florida's provision, a slight change in percentage of the minority group's population in a given district does not necessarily have a cognizable effect on a minority group's ability to elect its preferred candidate of choice. This is because a minority group's ability to elect a candidate of choice depends upon more than just population figures."[34] In order to draw districts that comply with the tier-one standards, a functional analysis is required to be performed.

A "functional analysis," as it has been termed, is an inquiry into a racial or language minority group's ability to elect a candidate of choice that requires "consideration not only of the minority population in the districts, or even the minority voting-age population in those districts, but of political data and how a minority population group has voted in the past."[35] The map drawing application in use for the 2022 Redistricting Cycle includes 231 data points in the following categories to enable users to perform this type of analysis:[36]

The last tier-one standard requires that all districts "consist of contiguous territory." The Florida Supreme Court has previously defined contiguous as "being in actual contact: touching along a boundary or at a point.[37] A district is not contiguous if it consists of isolated parts or meets at a corner or right angle.[38] The Florida Supreme Court has also held that the presence in a district of a body of water without a connecting bridge, even if it requires land travel outside the district in order to reach other parts of the district, does not violate contiguity.[39]

***Tier – Two Standards***

The tier-two standards of the Florida Constitution encompass what are often called "traditional redistricting criteria," but make it clear these standards are subordinated to the tier-one standards. Article III, s. 20(b) states that unless compliance with these standards conflicts with tier-one standards or with federal law, districts shall be as nearly equal in population as practicable, districts shall be compact, and districts shall, where feasible, utilize existing political and geographical boundaries.[40] As with tier-one, the order in which the tier-two standards are set out in the Constitution does not establish any priority among those standards within the tier.[41]

The first tier-two standard set forth by the Florida Constitution states that districts shall be as nearly equal in population as is practicable. As interpreted by the United States Supreme Court, the Equal Protection Clause of the Fourteenth Amendment mandates that "state legislatures be apportioned in such a way that each person's vote carries the same weight—that is, each legislator represents the same number of voters."[42] Congressional districts fall under a stricter standard of variance under the United States Constitution, where Congressional districts must achieve precise mathematical equality of population of +/- one person from the ideal population.[43]

The second tier-two requirement established by Section 20 of the Florida Constitution is compactness. The constitutional amendments adopted in Florida in 2010 state that districts "shall be compact."[44]

[43] *See Kirkpatrick v. Preisler, 394 U.S. 526, 531 (1969).*
[44] Art. III, s. 20(b), Fla. Const.

The Florida Supreme Court held that "compactness is a standard that refers to the shape of the district. The goal is to ensure that districts are logically drawn and that bizarrely shaped districts are avoided. Compactness can be evaluated both visually and by employing standard mathematical measurements."[45]

Florida has historically used three scores to gauge compactness mathematically, all of which fall within a range of 0-1, where a score closer to one indicates a more compact district.[46] The first score used is the Convex Hull score, which tests for concavities or indentations in district boundaries by calculating the ratio of the area of the district to the area of the minimum convex polygon that can enclose the district's geometry.[47] The second score used is the Polsby-Popper score, which tests for jagged or squiggly district boundaries by calculating the ratio of the area of the district to the area of a circle whose circumference is equal to the perimeter of the district. The third score used is the Reock score, which indicates a district's similarity to a circle by calculating the ratio of the area of the district to the area of the smallest circle that can be drawn around the district. [48]

In the Court's interpretation of the tier-one and tier-two standards as applied to state legislative districts, they held that "since compactness is set forth in Section 21(b), the criteria of Section 21(a) must predominate to the extent that they conflict with drawing a district that is compact. However, if a district can be drawn more compactly while utilizing political and geographical boundaries and without intentionally favoring a political party or incumbent, compactness must be a yardstick by which to evaluate those other factors."[49] The same standard applies to Congressional districts given that Sections 20 and 21 within Article III of the Florida Constitution are identical.[50]

The final tier-two standard established by the Florida Constitution is that districts shall, "where feasible, utilize existing political and geographical boundaries."[51] The Florida Supreme court has defined geographic boundaries as features that are "easily ascertainable and commonly understood" such as "rivers, railways, interstates, and state roads."[52] Moreover, political boundaries primarily consist of county and municipal boundaries.[53]

The boundaries of Florida's municipalities are not static. Between January 1, 2010 and December 31, 2019, 200 cities annexed or deannexed parcels, changing their boundaries 3,552

times.[54] Additionally, while Florida Statutes[55] permit municipalities to annex contiguous and compact unincorporated territory, many of Florida's cities are not contiguous, neither visually nor mathematically compact, and contain holes or enclaves.[56] Of Florida's 412 cities, 136 are discontiguous, and 170 have holes or enclaves.[57]

Unlike other objective tier-two standards in the Florida Constitution, there is no widely accepted measurement for compliance with the requirement to, where feasible, utilize existing political and geographic boundaries.[58]

Simply counting the cities or counties kept whole, meaning they have either all geographic territory or all population in a single district[59], fails to account for the degree of usage of existing county or municipal boundaries. It also disregards the co-equal constitutional mandate to, where feasible, use political and geographical boundaries.[60]

Professional staff of the Florida House of Representatives and the Florida Senate worked to develop a set of quantitative metrics that measure the coincidence of a district's border with easily ascertainable and commonly understood political and geographic features, and make it publicly available to all users in the redistricting application. This Boundary Analysis independently measures the extent to which district boundaries overlap city boundaries, county boundaries, primary and secondary roads (interstates, U.S. highways, and State highways), railroads, and significant water bodies (contiguous area hydrography features greater than 10 acres) as defined by the U.S. Census Bureau's TIGER/Line files. Districts' coincidence with these existing political and geographic boundaries is independently calculated and presented along with the extent to which district boundaries do not follow any of the specified features.

In this way, users are presented with a Boundary Analysis that shows the degree of utilization for each type of existing political or geographic boundary as specified by the Florida Constitution and interpreted by the Florida Supreme Court. To facilitate the utilization of existing political and geographic boundaries, each of the feature layers used in the computation of the Boundary Analysis is provided in the map-drawing application.

**Judicial Review of State Legislative Districts**

The state constitution prescribes a mandated review process for state legislative redistricting plans by the Florida Supreme Court.[61] During a constitutionally mandated review, the Florida Supreme Court determines if the newly created State Senate and State House districts are valid. When the Florida Supreme Court enters a judgment that the plan is valid, the plan becomes binding upon all citizens of the state.[62]

In contrast, the process for enacting Congressional districts differs in two ways. The districts are not established in a joint resolution, but in a general bill that is subject to a Governor's veto. Additionally, the maps do not require mandatory review by the Florida Supreme Court.

## III. Effect of Proposed Changes:

Consistent with the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions, the bill apportions the state into 28 single-member Congressional districts.

Section 1 of the bill amends s. 8.0001, F.S., to provide definitions regarding Census geography and the electronic versions of districts. Additionally, it designates the United States Decennial Census of 2020 as the official census of the state for the purposes of Congressional redistricting as provided by Art. X of the Florida Constitution.

Section 2 of the bill amends s. 8.0002, F.S., to describe the state's 28 Congressional districts using Census geography.

Section 3 of the bill amends s. 8.0111, F.S., to update the use of the 2010 Decennial Census to the 2020 Decennial Census.

Section 4 of the bill reenacts s. 8.031, F.S., to establish the districts described in 8.0002 as the official congressional districts of the state.

Section 5 of the bill creates s. 8.051, F.S., to designate electronic maps as the authoritative representation of the state's Congressional districts. Additionally, it establishes the Office of Economic and Demographic Research as the official custodian of electronic maps representing the Congressional districts described in s. 8.0002, F.S.

Section 6 of the bill reenacts s. 8.0611, F.S., to provide severability if any provision of this chapter is invalidated.

Section 7 of the bill amends s. 8.07, F.S., to change the applicable starting date for the qualification, nomination, and election of the new districts from 2012 to 2022.

Section 8 of the bill repeals s. 8.08, 8.081, 8.082, 8.083, 8.084, 8.085, 8.086, 8.087, and 8.088, F.S., to remove obsolete language from a remedial apportionment session.

None.

E. Other Constitutional Issues:

None.

## V. Fiscal Impact Statement:

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

None.

C. Government Sector Impact:

The 2022 reapportionment will have an undetermined fiscal impact on Florida's election officials, including 67 Supervisor of Elections offices and the Department of State, Division of Elections. Local supervisors will incur the cost of data processing and labor to change each of Florida's approximately 14 million voter records to reflect new districts. As precincts are reconfigured for new districts, postage and printing will be required to provide each eligible voter whose precinct has changed with official notification.

## VI. Technical Deficiencies:

None.

## VII. Related Issues:

None.

## VIII. Statutes Affected:

This bill substantially amends the following sections of the Florida Statutes: 8.0001, 8.0002 and 8.0111.

This bill creates the following sections of the Florida Statute: 8.051.

This bill repeals the following sections of the Florida Statutes: 8.08, 8.081, 8.082, 8.083, 8.084, 8.085, 8.086, 8.087, and 8.088.

27-01187-22 2022102__

Section 1. Section 8.0001, Florida Statutes, is amended to read:

(Substantial rewording of section. See s. 8.0001, F.S., for present text.)

8.0001 Definitions.—In accordance with s. 8(a), Art. X of the State Constitution, the United States Decennial Census of 2020 is the official census of the state for the purposes of congressional redistricting.

(1) The following delineation of congressional districts employs areas included within official county, tract, block groups, and block boundary descriptions used by the United States Department of Commerce, Bureau of the Census, in compiling the United States Decennial Census of 2020 in this state. The populations within these census geographic units are the population figures reported in the counts of the United States Decennial Census of 2020 provided to the state in accordance with Pub. L. No. 94-171.

(2) As used in this chapter, the term:

(a) "Block" describes the smallest geographic unit for which population was tabulated in the 2020 decennial census. Blocks are nested within tracts and within block groups. A block is identified by a three-character number that is unique within a block group.

(b) "Block equivalency file" describes a list of all blocks within the state and the congressional district number designated for each block. Blocks are listed by a 15-character number that combines the five-character county-level Federal Information Processing (FIPS) code, the six-character tract

**CODING:** Words ~~stricken~~ are deletions; words underlined are additions.

number with leading zeros and an implied decimal, the single-character block group number, and the three-character block number.

(c) "Block group" describes a cluster of blocks within the same census tract. Block groups are nested within tracts, and are uniquely identified by a single character number with a valid range of 0 through 9.

(d) "County" describes a legal governmental subdivision of the state. Boundaries of counties described in this chapter reflect those boundaries in effect as of January 1, 2020.

(e) "Geographical information systems map" describes an electronic map that represents the boundaries of the congressional districts of the state in a commonly accepted and readable format.

(f) "Tract" describes a relatively permanent statistical subdivision of a county. Tracts are nested within counties, and are uniquely identified by an up to four-character number and a two-digit suffix.

Section 2. Section 8.0002, Florida Statutes, is amended to read:

(Substantial rewording of section. See s. 8.0002, F.S., for present text.)

8.0002 Division of state into congressional districts.—For the election of representatives to the United States House of Representatives, the state is divided into 28 consecutively numbered, single-member congressional districts of contiguous territory, to be designated by such numbers as follows:

Section 3. Section 8.0111, Florida Statutes, is amended to read:

8.0111 Inclusion of unlisted territory in contiguous districts.—Any portion of the state which is not stated in this chapter as being included in any district described in this chapter but which is entirely surrounded by a district shall be deemed to be included within the surrounding district. Any portion of the state which is not included in any district described in this chapter and which is not entirely surrounded by a district shall be included within that district contiguous to such portion that contains the least population per representative according to the United States Decennial Census of 2020 ~~2010~~; however, if every district contiguous to such portion has an equal population, such portion shall be included within the lowest-numbered district that is contiguous to such portion.

Section 4. Section 8.031, Florida Statutes, is reenacted to read:

8.031 Election of representatives to Congress.—The districts named in s. 8.0002 constitute and form the congressional districts of the state, and a representative to the Congress shall be selected in and for each of the congressional districts as provided by law.

Section 5. Effective upon becoming a law, section 8.051, Florida Statutes, is created to read:

8.051 Electronic maps to serve as the official maps of congressional districts; availability.—

(1) Geographical information systems maps and block equivalency files representing the boundaries of congressional

districts described in this act shall serve as the official maps of the congressional districts of the state. In the event of any conflict between the descriptions of districts set forth in this act, geographical information systems maps, or block equivalency files, the descriptions in the block equivalency files shall prevail.

(2) Within 10 days after the effective date of this act, the geographical information systems maps and block equivalency files representing the boundaries of the congressional districts described in this act shall be made available to the public by the Office of Economic and Demographic Research.

Section 6. Section 8.0611, Florida Statutes, is reenacted to read:

8.0611 Severability.—If any provision of this chapter is held invalid with respect to any person or circumstance, or if any congressional district established in this chapter is held invalid, the invalidity does not affect other provisions or applications of the chapter or any other districts established in this chapter which can be given effect without the invalid provision or application, and to this end the provisions of this chapter are severable.

Section 7. Effective upon becoming a law, section 8.07, Florida Statutes, is amended to read:

8.07 Applicability.—The congressional districts prescribed in s. 8.0002 apply with respect to the qualification, nomination, and election to the office of representative to the Congress of the United States in the primary and general elections held in 2022 ~~2012~~ and thereafter.

Section 8. Effective upon becoming a law, sections 8.08,

8.081, 8.082, 8.083, 8.084, 8.085, 8.086, 8.087, and 8.088, Florida Statutes, are repealed.

Section 9. Except as otherwise expressly provided in this act and except for this section, which shall take effect upon this act becoming a law, this act shall take effect upon the expiration of the terms of the representatives to the United States House of Representatives serving on the date that this act becomes a law.

## I. Summary:

Senate Joint Resolution 100 apportions the state into 40 single-member State Senate districts and 120 single-member State House districts as required by the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions.

## II. Present Situation:

The 2020 Census revealed an unequal distribution of population growth across Florida's state legislative districts. Therefore, districts must be adjusted to comply with the "one person, one vote" principle such that each district must be substantially equal in total population.[1]

According to the 2020 Census, 21,538,187 people resided in Florida as of April 1, 2020. That represents a population growth of 2,736,877 people from 2010 to 2020, approximately a 15 percent increase.[2]

Table 1 below shows the changes in population for each of Florida's current congressional and state legislative districts and their respective ideal populations.

**Table 1. Florida Congressional and State Legislative Districts Summary 2010 – 2020**

| Florida Fast Facts | 2010 | 2020 | Difference |
|---|---|---|---|
| Statewide Population | 18,801,310 | 21,538,187 | +2,736,877 |
| Number of Congressional Seats | 27 | 28 | +1 seat |
| Congressional District Ideal Population | 696,345 | 769,221 | +72,876 |
| Florida House of Representatives District Ideal Population *(based on 120 seats)* | 156,678 | 179,485 | +22,807 |
| Florida Senate District Ideal Population *(based on 40 seats)* | 470,033 | 538,455 | +68,422 |

According to the 2020 Census, the State Senate district with the largest population has 713,947 people (175,492 more than the ideal), and the State Senate district with the smallest population has 486,331 people (52,124 less than ideal). The State House district with the largest population has 237,134 people (57,689 more than the ideal), and the State House district with the smallest population has 153,589 people (25,896 less than the ideal).

## Background

The terms "redistricting" and "reapportionment" are often used interchangeably to describe the process of redrawing Congressional and state legislative district boundaries after each decennial census. Redrawing districts is necessary to accommodate population growth and shifts, ensuring that each district contains equal or nearly equal populations in compliance with applicable state and federal law.

The Florida Constitution requires the Legislature to apportion the state at its regular session in the second year following each decennial census into not less 30 nor more than 40 State Senate districts and into not less than 80 nor more than 120 State House districts.[3]

## The 2020 Census

Established by the U.S. Constitution, the census has been conducted every 10 years by the United States Census Bureau since 1790 to determine the number of people living in the United States. Article I, s. 2 of the U.S. Constitution states that "The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct."[4]

[3] Art. III, s. 16(a), Fla. Const.
[4] Art. I, s. 2, U.S. Const.

Florida is one of 21 states that explicitly requires the use of census data for redistricting.[5] Article X, s. 8 of the Florida Constitution designates each decennial census of the state taken by the United States as the official census of the state.[6] Florida Statutes also designate the most recent federally conducted decennial census as the official census for redistricting.[7]

Public Law (P.L.) 94-171 requires the Census Bureau to provide states the opportunity to identify the small area geography for which data is needed to conduct legislative and congressional redistricting. The law also requires the U.S. Census Bureau to furnish these tabulations of population to each state, at the county, tract, block group, and block levels, within one year of Census Day.[8]

Title 13, U.S. Code requires that the state-level apportionment population counts be delivered to the President of the United States within 9 months of the census date. In the 2020, 2010, and most 20th century censuses, the census date has been April 1, meaning that the statutory deadline for delivering the counts to the President is December 31 of the census year.[9]

The delivery of 2020 Census results was delayed due to several factors affecting the Census Bureau's collection and processing, including the COVID-19 pandemic, natural disasters that included hurricanes and wildfires, civil unrest, and legal challenges.[10]

The state population counts for apportionment were delivered to the President on April 26, 2021 (originally due December 31, 2020). The U.S. Census Bureau provided redistricting data as legacy format summary files, which is tabular data, for all states on August 12, 2021 (originally due April 1, 2021). The full redistricting data toolkit was delivered to all 50 states and the public on September 16, 2021 (originally due April 1, 2021).

**Redistricting Criteria and Concepts**

Florida follows various criteria and standards as it relates to drawing state legislative districts, including the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions.

**The United States Constitution**

In addition to state specific requirements to redistrict, states are obligated to redistrict based on provisions within the United States Constitution. In *Reynolds v. Sims*, the United States Supreme Court held that the Fourteenth Amendment required that seats in state legislature be reapportioned on a population basis. This principle is commonly referred to as "one person, one vote." The Supreme Court concluded:

…."the basic principle of representative government remains, and must remain, unchanged – the weight of a citizen's vote cannot be made to depend on where he lives. Population is, of necessity, the starting point for consideration and the controlling criterion for judgment in legislative apportionment controversies…The Equal Protection Clause demands no less than substantially equal state legislative representation for all citizens, of all places as well as of all races. We hold that, as a basic constitutional standard, the Equal Protection Clause requires that the seats in both houses of a bicameral state legislature must be apportioned on a population basis."[11]

The Court went on to state that decennial reapportionment was a rational approach to readjust legislative representation to take into consideration population shifts and growth.[12]

In practice, Congressional districting has strictly adhered to the requirement of exact mathematical equality and in Kirkpatrick v. Preisler, the Court rejected several justifications for violating this principle. For state legislative districts, the courts have permitted a greater population deviation amongst districts. The populations of state legislative districts must instead be "substantially equal."[13]

Substantial equality of population has come to generally mean that a legislative plan will not be held to violate the Equal Protection Clause if the difference between the smallest and largest district is less than ten percent.[14] Nevertheless, any significant deviation (even within the 10 percent overall deviation margin) must be "based on legitimate considerations incident to the effectuation of a rational state policy,"[15] including "the integrity of political subdivisions, the maintenance of compactness and contiguity in legislative districts, or the recognition of natural or historical boundary lines.[16]

The Fourteenth Amendment has also been interpreted to prohibit racial predominance.[17] The U.S. Supreme Court has stated: "The equal protection clause prohibits a state, without sufficient justification, from separating its citizens into different voting districts on the basis of race." A redistricting plan "that expressly distinguishes among citizens because of their race [must] be narrowly tailored to further a compelling government interest." Such strict scrutiny review applies not only to redistricting plans that expressly distinguish citizens because of race, but also those plans "that, although race neutral, are, on their face unexplainable on grounds other than race."[18]

**The Federal Voting Rights Act**

The Federal Voting Rights Act (VRA) prohibits any state or political subdivision from enacting a map that results in the denial or abridgement of any U.S. citizen's right to vote on account of race, color, or status as a member of a language minority group and purposeful discrimination.[19] The VRA also protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.[20]

Section 2 of the VRA requires the creation of a district that performs for racial and language minorities where a minority population is geographically compact and sufficiently numerous to be a majority in a single-member district, the minority population is politically cohesive, the majority votes sufficiently as a bloc to enable it usually to defeat the minority-preferred candidate, and under all of the circumstances, the minority population has less opportunity than others to participate in the political process and elect representatives of its choice.[21]

Section 5 of the VRA prohibits purposeful discrimination and protects against retrogression—or backsliding—in the ability of racial and language minorities to elect representatives of their choice.[22] Section 5 contains a coverage formula that was applied to "covered jurisdictions" to determine if there was a history of discrimination against racial or language minorities.[23] Such jurisdictions had to be "precleared" before any of the changes could take effect, meaning that any substantial changes made to voting laws, including redistricting plans, in these "covered jurisdictions" could not be implemented without first obtaining federal permission.[24] In Florida, Collier, Hardee, Hendry, Hillsborough, and Monroe counties were subject to Department of Justice preclearance in regards to redistricting until the coverage formula was invalidated in 2013 in *Shelby County v. Holder*.[25] However, as *Apportionment I* states, "Florida's new constitutional provision, codified the non-retrogression principle of Section 5 (VRA) and has now extended it statewide. In other words, Florida now has a statewide non-retrogression requirement independent of Section 5."[26]

**The Florida Constitution**

Article III, s. 16(a) of the Florida Constitution requires that "the legislature at its regular session in the second year following each decennial census," apportion the state by joint resolution "in accordance with the constitution of the state and the United States into not less than thirty nor more than forty consecutively numbered senatorial districts of either contiguous, overlapping or identical territory, and into not less than eighty nor more than one hundred twenty consecutively numbered representative districts of either contiguous, overlapping or identical territory."[27] Once

the joint resolution is adopted, the state legislative plans are then subject to review by the Florida Supreme Court determining the validity of the apportionment.[28]

A district is contiguous if no part of the district is isolated from the rest of the district by another district.[29] In a contiguous district, a person can travel from any point within the district to any other point without departing from the district.[30] A district is not contiguous if its parts touch only at a common corner, such as a right angle.[31] The Florida Supreme Court has also held that the presence in a district of a body of water without a connecting bridge, even if it requires land travel outside the district in order to reach other parts of the district, does not violate contiguity.[32]

Districts must be consecutively numbered, but it is not necessary that adjacent districts receive consecutive numbers.[33] For example, districts in a 40-district redistricting plan may be numbered from 1 to 40, but District 1 and District 2 need not be adjacent to one another.[34]
In 2010, voters amended the Florida Constitution to create additional standards for establishing state legislative district boundaries.[35] The standards are set forth in two tiers.

***Tier – One Standards***

Article III, s. 21(a) of the Florida Constitution prohibits line-drawing that intentionally favors or disfavors a political party or an incumbent. It also affords protection to racial and language minorities. Districts may not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process; or to diminish their ability to elect representatives of their choice. Finally it reiterates that districts must be contiguous. The order in which the tier-one standards are set out in the Constitution does not establish any priority among those standards within the tier.[36]

The tier-one standards provide that "[n]o apportionment plan or district shall be drawn with the intent to favor or disfavor a political party or an incumbent."[37] The Florida Supreme Court has held that Florida's constitutional provision "prohibits intent, not effect" because "any redrawing of lines, regardless of intent, will inevitably have an effect on the political composition of a district and likely whether a political party or incumbent is advantaged or disadvantaged."[38] Nonetheless, there is no acceptable level of improper intent.[39]

The tier-one standards also provide protections for racial and language minorities. Districts may "not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process"; or to "diminish their ability to elect representatives of their choice."[40]

The Court has interpreted the tier-one constitutional provisions that relate to racial or language minorities' ability to participate in the political process or elect a candidate of their choice to mean that "the Legislature cannot eliminate majority-minority districts or weaken other historically performing minority districts where doing so would actually diminish a minority group's ability to elect its preferred candidates…in addition to majority-minority districts, coalition or crossover districts that previously provided minority groups with the ability to elect a preferred candidate under the benchmark plan must also be recognized."[41]

The Court went on to say, "that under Florida's provision, a slight change in percentage of the minority group's population in a given district does not necessarily have a cognizable effect on a minority group's ability to elect its preferred candidate of choice. This is because a minority group's ability to elect a candidate of choice depends upon more than just population figures."[42] In order to draw districts that comply with the tier-one standards, a functional analysis is required to be performed.

A "functional analysis," as it has been termed, is an inquiry into a racial or language minority group's ability to elect a candidate of choice that requires "consideration not only of the minority population in the districts, or even the minority voting-age population in those districts, but of political data and how a minority population group has voted in the past. [43] The map drawing application in use for the 2022 Redistricting Cycle includes 231 data points in the following categories to enable users to perform this type of analysis:[44]

The last tier-one standard requires that all districts "consist of contiguous territory". The premise is similar to that in Article III, s. 16 of the Florida Constitution.

***Tier – Two Standards***

The tier-two standards of the Florida Constitution encompass what are often called "traditional redistricting criteria," but make it clear these standards are subordinated to the tier-one standards. Article III, s. 21(b) states that unless compliance with these standards conflicts with tier-one standards or with federal law, districts shall be as nearly equal in population as practicable, districts shall be compact, and districts shall, where feasible, utilize existing political and geographical boundaries.[45] As with tier-one, the order in which the tier-two standards are set out in the Constitution does not establish any priority among those standards within the tier.[46]

The first tier-two standard set forth by the Florida Constitution states that districts shall be as nearly equal in population as is practicable. As interpreted by the United States Supreme Court, the Equal Protection Clause of the Fourteenth Amendment mandates that "state legislatures be apportioned in such a way that each person's vote carries the same weight—that is, each legislator represents the same number of voters."[47]

The courts have allowed reasonable deviations for mathematical equality for state legislative districts to accommodate traditional redistricting objectives, such as compactness, contiguity and respect to the boundaries of political subdivisions.[48] In *Apportionment I*, the court stated that "Because obtaining equal population "if practicable" is an explicit and important constitutional mandate under the Florida Constitution, any deviation from that goal of mathematical precision must be based upon compliance with other constitutional standards." [49]

The second tier-two requirement established by Section 21 of the Florida Constitution is compactness. The constitutional amendments adopted in Florida in 2010 state that districts "shall be compact."[50]

The Florida Supreme Court held that "compactness is a standard that refers to the shape of the district. The goal is to ensure that districts are logically drawn and that bizarrely shaped districts are avoided. Compactness can be evaluated both visually and by employing standard mathematical measurements."[51]

Florida has historically used three scores to gauge compactness mathematically, all of which fall within a range of 0-1, where a score closer to one indicates a more compact district.[52] The first score used is the Convex Hull score, which tests for concavities or indentations in district boundaries by calculating the ratio of the area of the district to the area of the minimum convex polygon that can enclose the district's geometry.[53] The second score used is the Polsby-Popper score, which tests for jagged or squiggly district boundaries by calculating the ratio of the area of the district to the area of a circle whose circumference is equal to the perimeter of the district. The third score used is the Reock score, which indicates a district's similarity to a circle by calculating the ratio of the area of the district to the area of the smallest circle that can be drawn around the district. [54]

The Court also held that "Since compactness is set forth in section 21(b), the criteria of section 21(a) must predominate to the extent that they conflict with drawing a district that is compact. However, if a district can be drawn more compactly while utilizing political and geographical boundaries and without intentionally favoring a political party or incumbent, compactness must be a yardstick by which to evaluate those other factors."[55]

The final tier-two standard established by the Florida Constitution is that districts shall, "where feasible, utilize existing political and geographical boundaries."[56] The Florida Supreme court has defined geographic boundaries as features that are "easily ascertainable and commonly understood" such as "rivers, railways, interstates, and state roads."[57] Moreover, political boundaries primarily consist of county and municipal boundaries.[58]

The boundaries of Florida's municipalities are not static. Between January 1, 2010 and December 31, 2019, 200 cities annexed or deannexed parcels, changing their boundaries 3,552 times.[59] Additionally, while Florida Statutes[60] permit municipalities to annex contiguous and compact unincorporated territory, many of Florida's cities are not contiguous, neither visually nor mathematically compact, and contain holes or enclaves.[61] Of Florida's 412 cities, 136 are discontiguous, and 170 have holes or enclaves.[62]

Unlike other objective tier-two standards in the Florida Constitution, there is no widely accepted measurement for compliance with the requirement to, where feasible, utilize existing political and geographic boundaries.[63]

Simply counting the cities or counties kept whole, meaning they have either all geographic territory or all population in a single district[64], fails to account for the degree of usage of existing county or municipal boundaries. It also disregards the co-equal constitutional mandate to, where feasible, use political and geographical boundaries.[65]

Professional staff of the Florida House of Representatives and the Florida Senate worked to develop a set of quantitative metrics that measure the coincidence of a district's border with easily ascertainable and commonly understood political and geographic features, and make it publicly available to all users in the redistricting application. This Boundary Analysis independently measures the extent to which district boundaries overlap city boundaries, county boundaries, primary and secondary roads (interstates, U.S. highways, and State highways), railroads, and significant water bodies (contiguous area hydrography features greater than 10 acres) as defined by the U.S. Census Bureau's TIGER/Line files. Districts' coincidence with these existing political and geographic boundaries is independently calculated and presented along with the extent to which district boundaries do not follow any of the specified features.

In this way, users are presented with a Boundary Analysis that shows the degree of utilization for each type of existing political or geographic boundary as specified by the Florida Constitution and interpreted by the Florida Supreme Court. To facilitate the utilization of existing political and geographic boundaries, each of the feature layers used in the computation of the Boundary Analysis is provided in the map-drawing application.

**Judicial Review of State Legislative Districts**

During the regular session of the Legislature in the second year following the decennial census, the Legislature is required to adopt a joint resolution that apportions the state into State Senate and State House districts. The Legislature is directed to apportion the state into no fewer than 30, nor more than 40 State Senate districts, and into no fewer than 80, nor more than 120 State House districts. Because the Legislature adopts a joint resolution, rather than passing a general bill, the measure does not require the Governor's approval, nor is it subject to a veto.[66]

The state constitution prescribes a mandated review process for state legislative redistricting plans by the Florida Supreme Court.[67] During a constitutionally mandated review, the Florida Supreme Court determines if the newly created State Senate and State House districts are valid. When the Florida Supreme Court enters a judgment that the plan is valid, the plan becomes binding upon all citizens of the state.[68]

***If the Legislature Adopts a Joint Resolution of Apportionment during Regular Session***

Within fifteen days after the Legislature passes a joint resolution to apportion state legislative districts, the Attorney General must petition the Florida Supreme Court for a declaratory judgment that determines the validity of the apportionment.[69] The Court must allow adversary interests to present their views challenging the validity of the apportionment,[70] and must enter its judgment within thirty days after the Attorney General submits the petition.

If the Court finds the apportionment valid, the Court's judgment is binding on all citizens of the state.[71]

If the Court finds the apportionment invalid, the Governor must reconvene the Legislature, by proclamation, within 5 days, in an extraordinary apportionment session that may not exceed fifteen days.[72] The Legislature must then adopt a joint resolution of apportionment that conforms to the Court's judgment.[73]

If the Legislature adopts a joint resolution during the extraordinary apportionment session, the Attorney General must petition the Court and provide the apportionment resolution within fifteen days after adjournment of the session. The Court must then consider the validity of the resolution as though adopted at a regular or special apportionment session.[74] Again, the Court must allow adversary interests to present their views and render its judgment within thirty days after the Attorney General submits the petition.[75] If the Legislature did not adopt a joint resolution during the extraordinary apportionment session, the Attorney General must so inform the Court.[76]

If the Legislature did not adopt an apportionment resolution during an extraordinary apportionment session, or if the Court declares an apportionment resolution adopted during an extraordinary apportionment session invalid, the Court must, within sixty days after receiving the Attorney General's petition, file an order with the custodian of state records making an apportionment.[77]

***If the Legislature does not Adopt a Joint Resolution of Apportionment during Regular Session***

If the regular session of the Legislature in the second year following the decennial census is adjourned without adoption of a joint resolution apportioning the state into the necessary legislative districts, the Governor must, within thirty days, issue a proclamation reconvening the Legislature in a special apportionment session.[78] That session may not exceed thirty consecutive

days and no other business may be transacted.[79] The state constitution specifies that, "[i]t is the Legislature's mandatory duty to adopt a joint resolution of apportionment during that session."[80]

If the Legislature adjourns the special apportionment session without adopting a joint resolution of apportionment, the Attorney General must, within five days, petition the Court to make the apportionment.[81] Within sixty days after the Attorney General files the petition, the Court must file an order with the state custodian of records making the apportionment.[82]

## III. Effect of Proposed Changes:

Consistent with the United States (U.S.) Constitution, Federal Voting Rights Act, Florida Constitution, and applicable court decisions, the Joint Resolution apportions the state into 40 single-member State Senate districts and 120 single-member State House districts.

Section 1 of the Joint Resolution provides definitions regarding Census geography and the electronic versions of districts. Additionally, it designates the United States Decennial Census of 2020 as the official census of the state for the purposes of legislative redistricting as provided by Art. X of the Florida Constitution.

Section 2 of the Joint Resolution describes the state's 120 State House districts using Census geography.

Section 3 of the Joint Resolution describes the state's 40 State Senate districts using Census geography.

Section 4 of the Joint Resolution designates the process for territory not specified for inclusion in any district.

Section 5 of the Joint Resolution designates the process for assigned territory that is noncontiguous.

Section 6 of the Joint Resolution establishes the districts described in Sections 2 and 3 as the official State House and State Senate districts of the state.

Section 7 of the Joint Resolution designates electronic maps as the authoritative representation of the state's legislative districts. Additionally, it establishes the Office of Economic and Demographic Research as the official custodian of electronic maps representing the legislative districts described in Sections 2 and 3.

Section 8 provides severability if any provision of the Joint Resolution is invalidated.

Section 9 of the Joint Resolution changes the applicable starting date for the qualification, nomination, and election of the new districts from 2012 to 2022.

B. Private Sector Impact:

None.

C. Government Sector Impact:

The 2022 reapportionment will have an undetermined fiscal impact on Florida's election officials, including 67 Supervisor of Elections offices and the Department of State, Division of Elections. Local supervisors will incur the cost of data processing and labor to change each of Florida's approximately 14 million voter records to reflect new districts. As precincts are reconfigured for new districts, postage and printing will be required to provide each eligible voter whose precinct has changed with official notification.

Senate Joint Resolution

A joint resolution of apportionment; providing for the apportionment of the House of Representatives and the Senate (plans _____ and _____); adopting the United States Decennial Census of 2020 for use in such apportionment; defining terms; providing for the inclusion of omitted areas; providing contiguity for areas specified for inclusion in one district which are noncontiguous; specifying that the apportioned districts constitute the legislative districts of the state; specifying that electronic maps serve as the official maps of the legislative districts of the state; providing for the public availability of electronic maps; providing for severability of invalid portions; providing for application beginning in 2022.

Be It Resolved by the Legislature of the State of Florida:

Section 1. Official census for apportionment; definitions.—

(1) In accordance with Section 8(a), Article X of the State Constitution, the United States Decennial Census of 2020 is the official census of the state for the purposes of this joint resolution.

(2) The following delineation of representative and senatorial districts employs areas included within official county, tract, block group, and block boundary descriptions used by the United States Department of Commerce, Bureau of the Census, in compiling the United States Decennial Census of 2020 in this state. The populations within these census geographic

units are the population figures reported in the counts of the United States Decennial Census of 2020 provided to the state in accordance with Pub. L. No. 94-171.

(3) As used in this joint resolution, the term:

(a) "Block" describes the smallest geographic unit for which population was tabulated in the 2020 decennial census. Blocks are nested within tracts and within block groups. A block is identified by a three-character number that is unique within a block group.

(b) "Block equivalency file" describes a list of all blocks within the state and the representative or senatorial district number designated for each block. Blocks are listed by a 15-character number that combines the five-character county-level Federal Information Processing System (FIPS) code, the six-character tract number with leading zeros and an implied decimal, the single-character block group number, and the three-character block number.

(c) "Block group" describes a cluster of blocks within the same census tract. Block groups are nested within tracts, and are uniquely identified by a single character number with a valid range of 0 through 9.

(d) "County" describes a legal governmental subdivision of the state. Boundaries of counties described in this joint resolution reflect those boundaries in effect as of January 1, 2020.

(e) "Geographical information systems map" describes an electronic map that represents the boundaries of representative and senatorial districts in a commonly accepted and readable format.

**CODING:** Words ~~stricken~~ are deletions; words underlined are additions.

(f) "Tract" describes a relatively permanent statistical subdivision of a county. Tracts are nested within counties, and are uniquely identified by an up to four-character number and a two-digit suffix identified by a decimal.

Section 2. Representative districts.—For the election of members to the House of Representatives of this state, the state is apportioned into 120 consecutively numbered, single-member, representative districts of contiguous territory, to be designated by such numbers as follows:

Section 3. Senatorial districts.—For the election of members to the Senate of this state, the state is apportioned into 40 consecutively numbered, single-member senatorial districts of contiguous territory, to be designated by such numbers as follows:

Section 4. Territory not specified for inclusion in any district.—Any portion of the state which is not stated in this joint resolution as being included in any district described in this joint resolution but which is entirely surrounded by a district shall be deemed to be included within the surrounding district. Any portion of the state which is not included in any district described in this joint resolution and which is not entirely surrounded by a district shall be included within that district contiguous to the portion that contains the least population per legislator according to the United States Decennial Census of 2020; however, if every district contiguous to such portion has an equal population, such portion shall be included within the lowest-numbered district that is contiguous

to such portion.

Section 5. Territory specified for inclusion in one district which is noncontiguous.—If any district described in this joint resolution is composed of noncontiguous territory, the noncontiguous portion that has the least population shall be included in the district that is contiguous to such portion and that has the least population; however, if every district contiguous to such portion has an equal population, such portion shall be included within the lowest-numbered district that is contiguous to such portion.

Section 6. Districts to constitute representative and senatorial districts of state.—The districts created by this joint resolution constitute and form the representative and senatorial districts of the state, and members of the Legislature shall be elected in and for these representative and senatorial districts as provided by law.

Section 7. Electronic maps to serve as the official maps of representative and senatorial districts; availability.—

(1) Geographical information systems maps and block equivalency files representing the boundaries of representative and senatorial districts described in this joint resolution shall serve as the official maps of the representative and senatorial districts of the state. In the event of any conflict between the descriptions of districts set forth in this joint resolution, geographical information systems maps, or block equivalency files, the descriptions in the block equivalency files shall prevail.

(2) Within 10 days of a judgment of the Florida Supreme Court determining the apportionment provided for in this joint

resolution to be valid, the geographical information systems maps and block equivalency files representing the boundaries of the representative and senatorial districts described in this joint resolution shall be made available to the public by the Office of Economic and Demographic Research.

Section 8. Severability.—If any provision of this joint resolution or the application thereof to any person or circumstance is held invalid, or if any representative or senatorial district established in this joint resolution is held invalid, the invalidity does not affect other provisions or applications of this joint resolution, or any other districts established in this joint resolution, which can be given effect without the invalid provision or application, and to this end the provisions of this joint resolution are severable.

Section 9. Applicability.—This joint resolution applies with respect to the qualification, nomination, and election of members of the Legislature in the primary and general elections held in 2022 and thereafter.

# Cards Used to Determine Staggered Elections

Senators shall be elected for terms of four years, those from odd-numbered districts in the years the numbers of which are multiples of four and those from even-numbered districts in even-numbered years the numbers of which are not multiples of four; except, at the election next following a reapportionment, some senators shall be elected for terms of two years when necessary to maintain staggered terms. – Article III, Section 15 (a), Florida Constitution

**Production of Cards**

40 cards were created by Senate Professional Staff using Adobe Creative Cloud Express Software. The cards were laid out to standard business card size of 3.5 x 2 inches. The first card produced was the even card. The file was then duplicated and then edited to odd, using the same fonts, colors and layout. The finished files were exported to .JPGs for printing. The .JPG files were centered on a standard digital letter size paper format for printing. The cards were printed with one per sheet of paper. All 40 cards were printed in the same run with the same paper on the same machine, and were then cut using a digital aligned laser guided precision cutter to ensure each card is exactly the same size. The cards fit #3 manila, gummed seal, coin envelopes. Manila was used in to fully conceal the contents of each envelope.

**Resources Utilized in Production**

**Printer:** Ricoh - Pro C7210s
**Paper:** COUGAR DIGITAL – 8.5X11; Grain Long; Smooth; Cover; 80#; White
**Cutter:** CE – Model: E490R; SN: 810612172224; Year of Manufacture: 21.06
**Envelope:** JAM Paper Coin Envelopes, #3, Gummed Seal, Manila
**Software:** Adobe Creative Cloud Express

**Attestation of Inspection**

I inspected 40 cards. Each card is the same size and weight. There are 20 even district cards and 20 odd district cards.

I inspected each envelope. There are no distinguishing features on any envelope.

I placed one card in each envelope. No card is visible in any way from the outside of any envelope.

I placed 40 envelopes in a glass container with a lid. By manually mixing the cards before and after placing them in the container, I ensured there was no possibility of an intentional pattern with which the cards were laid in the container.

I presented the closed container to Chair Rodrigues. The jar was in my custody and control and no other person had access to the jar between the time I inspected the cards and presented the closed container to Chair Rodrigues.
