The Florida Senate
Local Funding Initiative Request
Fiscal Year 2020-2021

1. **Project Title**
   Golden Gate City Outfall Restoration Project Phase 1

2. **Senate Sponsor**
   Kathleen Passidomo

3. **Date of Request**
   10/10/2019

4. **Project/Program Description**
   The proposed project is to perform a hydrographic survey to determine the depth of silt that has accumulated in the canal network for Golden Gate City and to determine the cost to restore the canals to their original bottom elevation. This is a critical step of a large-scale infrastructure project including the rehabilitation of aging stormwater, water and sewer assets, as well as transportation and mobility enhancements. The Golden Gate City Stormwater System is composed of 103 miles of swale collecting runoff that feeds into 780 drainage structures with 135 outfalls draining into a ten mile network of canals. In developing the plans for restoration of the drainage system it has been observed that silt has accumulated in the canal network to the point that it restricts the discharge of the outfall pipes. This condition causes the outfall pipes to silt up and clog. The canals need to be restored to their original bottom to support the restoration of the Stormwater System.

5. **State Agency to receive requested funds**

11. **Program Performance**

a. What specific purpose or goal will be achieved by the funds requested?
   
   Determine the volume of silt to be removed in order to restore the canal network to its original bottom, this will result in efficiencies of stormwater conveyance which will reduce flooding and improve storm recovery time.

b. What activities and services will be provided to meet the intended purpose of these funds?
   
   Surveying and engineering study.

c. What direct services will be provided to citizens by the appropriation project?
   
   Restoration of the canal network to its original bottom.

d. Who is the target population served by this project? How many individuals are expected to be served?
   
   24,000 residents in Golden Gate City. This area is designated as a low-moderate income area.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?
   
   Restoration of the canals to support a fully functioning drainage system will reduce the amount of flooding in Golden Gate City during a storm event.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?
   
   Withdrawal of some or all appropriated funds for failing to meet agreed-upon deliverables or performance measures.
12. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.
