#### 11. Program Performance

- a. What specific purpose or goal will be achieved by the funds requested?

Streets will have less standing water. Homes and garages in the subdivision will not be flooded by salt water intrusion.

- b. What activities and services will be provided to meet the intended purpose of these funds?

Draining water from the subdivision will allow residents to have less impact from heavy rainfall and high tide events.

- c. What direct services will be provided to citizens by the appropriation project?

N/A

- d. Who is the target population served by this project? How many individuals are expected to be served?

The target population is a residential subdivision that has direct impact from heavy rainfall events and water intrusion from sea level rise and high tides. There are approximately 100 homes and 300 residents in this area.

- e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The streets will have less standing water so residents can access the roadways to their properties and not have water intrude into their homes and garages. The outcome may be measured by inspection of streets during rainfall events and high tides. Additionally, counting the number of complaints from residents with flooded property.

- f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

A portion of the funds would be withheld until the error is corrected.
