Project Title: HOLMES BEACH RESILIENCY PROJECT

Senate Sponsor: Debbie Mayfield

Date of Request: 12/10/2019

Project/Program Description:
The project will implement resiliency measures that will relocate all overhead power lines to underground. This project will connect to the Bradenton Beach (SR 789) and the Longboat Key Underground Electric Projects and extend to the northern city limits as funds allow.

State Agency to receive requested funds: Department of Environmental Protection

State Agency contacted?: Yes

Amount of the Nonrecurring Request for Fiscal Year 2020-2021:

11. **Program Performance**

a. What specific purpose or goal will be achieved by the funds requested?

The project will implement flood protection measures that will reduce the surface runoff discharges to Sarasota and Tampa Bays, Class II Impaired Water Bodies and increase the public safety and emergency response. Excess surface water discharging to these water bodies will have 90% reduction of pollutant loads (including Phosphorous, Nitrogen and Total Suspended Solids). Measures will be installed in critical areas along the shoreline and along the coastal evacuation route.

b. What activities and services will be provided to meet the intended purpose of these funds?

Two main travel lanes (north and south bound) shall remain 80% above flood levels during design storm events of 25 year, 24 hour. (Excludes events occurring with storm surge). Samples shall be collected not less than twice annually in at least 2 critical outfall locations. Sampling shall be collected and analyzed in accordance with the methods specified at 40 CFR Part 136 and as detailed in Rule 62-160 F.A.C.

c. What direct services will be provided to citizens by the appropriation project?

Provide Level of Service C or better to CR789 and Marina Drive as the only evacuation route during major storm events. Eliminate nuisance flooding and ponding on evacuation routes during normal storm events. Reduction of Pollutant Loads to Sarasota and Tampa Bays. Pollutants to be measured include Total Phosphorous, Total Nitrogen, Biochemical Oxygen Demand, Zinc, Total Suspended Solids, and Total Copper.

d. Who is the target population served by this project? How many individuals are expected to be served?

Approx all 5,000 citizens of Holmes Beach.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The City of Holmes Beach has held several workshops and public hearings over the past several years to identify the concerns and solutions to address the flooding issues. The City has worked closely with the water management district for cooperative funding of water quality type projects in the past. The Master Capital Improvement Plan was adopted by City Commission in October 22, 2019.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Return of unused funds.
12. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

N/A

13. Requestor Contact Information

a. First Name Judy
b. Organization City of Holmes Beach
c. E-mail Address hbmayor@holmesbeachfl.org
d. Phone Number (941)708-5800 Ext.

14. Recipient Contact Information

a. Organization City of Holmes Beach
b. Municipality and County Manatee
c. Organization Type
   - For-profit Entity
   - Non-Profit 501(c) (3)
   - Non-Profit 501(c) (4)
