12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The funds requested will assist with funding of the wastewater treatment plant expansion for Phase I which includes a new headworks and master influent pump station. The City's wastewater treatment facility has exceeded its existing permitted capacity and FDEP has required that the city increase their capacity.

b. What activities and services will be provided to meet the intended purpose of these funds?

Engineering services during construction and construction costs.

c. What direct services will be provided to citizens by the appropriation project?

The appropriation project will increase the wastewater capacity within the City's service area and will allow more septic tanks to be taken offline. The project will also reduce inflow and infiltration due to gravity system surge during heavy rainfall.

d. Who is the target population served by this project? How many individuals are expected to be served?

The entire City of Lynn Haven, which has a population of 21,000.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The expected benefit of the project is a partial expansion of the capacity of the wastewater treatment plant. The ability to expand based on population growth needs, and the ability to take septic systems offline to improve water quality of North Bay will measure the outcome of the project.
