#### 12. Program Performance

##### a. What specific purpose or goal will be achieved by the funds requested?

The allocation will support the operation of 10 indigent adult Baker Act Beds for Lake and Sumter Counties. LifeStream's adult Baker Act system consists of 51 psychiatric beds, which have an average indigent Baker Act census of 18 beds per day. The State funds 8 of the 18 bed occupied by indigent Baker Act patients. The purpose of this funding will assure indigent care is available to individuals who are placed under the Baker Act by funding the additional 10 beds needed to meet the demand.

##### b. What activities and services will be provided to meet the intended purpose of these funds?

The funding will assure indigent care is available to individuals who are placed under the Baker Act. LifeStream provides this much needed care to individuals placed under the Baker Act by licensed professionals, the judicial system and/or law enforcement. The number of individuals receiving inpatient psychiatric care has increased over the years as the population of Lake and Sumter counties has grown from 240,000 in the year 2000, to today's census of 500,000. Sumter County continues its fast growth due to The Villages and Clermont and Lake County continues its rapid population increase as a bedroom community of Orlando. During those 18 years, there have been no appropriation increases for population growth, or cost of living. The only increase has been the nonrecurring local funding initiative funding in each of the last five legislative sessions which paid for 10 unfunded beds.

##### c. What direct services will be provided to citizens by the appropriation project?

The following services are provided: short-term inpatient treatment to individuals with serious, acute psychiatric illness who are experiencing a psychiatric crisis, psychiatric evaluation, medical history and physical to identify any medical issues that may be contributing towards the psychiatric crisis, medication management for psychiatric and medical issues, psychosocial, educational and occupational therapy groups, medication education groups, brief and intensive stabilization services, nursing assessments, family, group, and individual therapy as needed, discharge planning and referrals, appointments for follow up services and care management for up to 60 days post discharge to ensure that individuals attend aftercare services, thus reducing recidivism. After individuals are discharged, they receive outpatient medication management, primary care services, individual, family and/or group therapy, residential treatment, case management and other services deemed appropriate.

**d. Who is the target population served by this project? How many individuals are expected to be served?**

Persons with severe mental illness will benefit from treatment in these Baker Act Receiving Facility beds. Crisis Stabilization services in a state designated public Baker Act Receiving Facility are utilized for any citizen who is determined to be a danger to themselves or others in accordance with Section 394, Florida Statutes. Approximately 900 individuals will be served by these beds.

**e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?**

The expected benefit is to assure indigent care is available to individuals who are placed under the Baker Act. LifeStream provides this much needed care to individuals placed under the Baker Act by licensed professionals, the judicial system and/or law enforcement. The loss of these services will result in costly and ineffective services that are provided in emergency rooms and the jail/prison systems. Additional Baker Act capacity will allow law enforcement to spend more time protecting the community and result in cost savings. The general public will benefit due to increased public safety. The outcomes will be tracked, analyzed and reported as appropriate. This includes output data, number of admissions, number of consumers served, utilization rate, days of service provided, recidivism, cost per episode of care, successful completion, diversion from the state mental health hospitals or other expensive modalities, and individual improvement in functioning.

**f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?**

If there is an area in which LifeStream is deficient, it is suggested that a corrective action plan be implemented and monitored to ensure that the deficient area(s) is/are corrected in a timely fashion. If LifeStream is not meeting the deliverables or performance outlined in the contract, then the State has the option to cancel the contract for these services.

**13. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.**
