Local Funding Initiative Request

Fiscal Year 2021-2022

LFIR # 1520

1. Project Title

2. Senate Sponsor

3. Date of Request

4. Project/Program Description

Replacement of 800 LF of corrugated metal storm drain along Martisa Road NW in the City of Fort Walton Beach to alleviate flooding issues in this neighborhood and improve water quality in Santa Rosa Sound.

This project was identified as a priority area in the City of Fort Walton Beach's Stormwater Master Plan (December 2013).

5. State Agency to receive requested funds

State Agency contacted?

6. Amount of the Nonrecurring Request for Fiscal Year 2021-2022

Type of Funding	Amount
Operations	0
Fixed Capital Outlay	500,000
Total State Funds Requested	500,000

7. Total Project Cost for Fiscal Year 2021-2022 (including matching funds available for this project)

Type of Funding	Amount	Percentage
Total State Funds Requested (from question #6)	500,000	87%
Matching Funds		
Federal	0	0%
State (excluding the amount of this request)	0	0%
Local	75,000	13%
Other	0	0%
Total Project Costs for Fiscal Year 2021-2022	575,000	100%

8. Has this project previously received state funding?

Fiscal Year (yyyy-yy)	Amount		Specific Appropriation #	Vetoed
	Recurring	Nonrecurring		

9. Is future funding likely to be requested?

a. If yes, indicate nonrecurring amount per year.

b. Describe the source of funding that can be used in lieu of state funding.

10. Has the entity requesting this project received any federal assistance related to the COVID-19 pandemic?

If yes, indicate the amount of funds received and what the funds were used for.

Fiscal Year 2021-2022

LFIR # 1520

11. Details on how the requested state funds will be expended

Spending Category	Description	Amount
Administrative Costs:		
Executive Director/Project Head Salary and Benefits		0
Other Salary and Benefits		0
Expense/Equipment/Travel/Supplies/Other		0
Consultants/Contracted Services/Study		0
Operational Costs: Other		
Salary and Benefits		0
Expense/Equipment/Travel/Supplies/Other		0
Consultants/Contracted Services/Study		0
Fixed Capital Construction/Major Renovation:		
Construction/Renovation/Land/Planning Engineering	Construction costs to replace 800 LF of corrugated metal storm drain behind Bishop Avenue NW and Martisa Road NW.	500,000
Total State Funds Requested (must equal total from question #6)		500,000

12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The City of Fort Walton Beach completed a stormwater master plan in December 2013 to identify and prioritize areas throughout the city experiencing flooding and/or water quality issues due to insufficient stormwater conveyance and treatment systems. The area along Martisa Road NW was identified in the stormwater master plan as Priority Area No. 67 with the project including the replacement of 800 LF of failing corrugated metal storm drain.

b. What activities and services will be provided to meet the intended purpose of these funds?

Funding will be used for the construction of the new storm drain on Martisa Road NW as required by the engineering design (to be completed by the City of Fort Walton Beach as the match for this funding request).

c. What direct services will be provided to citizens by the appropriation project?

The citizens would benefit from a reduction in flooding and improved water quality into Santa Rosa Sound from stormwater runoff.

d. Who is the target population served by this project? How many individuals are expected to be served?

City of Fort Walton Beach citizens in the Martisa Road NW and Bishop Avenue NW area. While residents adjacent to Martisa Road NW and Bishop Avenue NW would experience the most benefit, the entire population of Fort Walton Beach (20,000) would stand to benefit from a increased water quality.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Improve stormwater management: The city currently expends resources to patch the numerous holes that occur in the existing corrugated metal pipe on a frequent basis. A measurable goal for this repair is to reduce the amount of instances in performing repairs while protecting private property including yards and fences.
Improve surface water quality: Improve water quality in Santa Rosa Sound. A measurable goal would be to reduce the amount of sediment removed from the stormwater outfall by 75% after the project is completed.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties
