1. Project Title  Pasco County Lindrick area Sewer System and Water Quality Upgrades

2. Senate Sponsor  Ed Hooper

3. Date of Request  02/15/2021

4. Project/Program Description
Addresses environmental problems that impact health and safety in the Lindrick Utility System. Lindrick utility is an aged system and a majority of this system (pump stations, manholes, gravity sewer pipes, valves, etc) will need to be replaced or repaired to reduce system leaks, spills, overflows, and discharges that contribute to nutrient and other pollutant loads to springs, coastal waters, and other water bodies. These high pollutant loads can contribute to blue-green algae, red tide, and other environmental problems that can impact health and safety. Being Florida’s Sports Coast, these pollutants will have negative impacts to fishing, scalloping, and marine life cycles within our coastal ecosystem.

12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

Improve water quality for the customers in this service area and reduce the harmful impacts to the environment and coastal waters as a result of wastewater system leaks, spills, overflows, and discharges. The upgrades to the potable water infrastructure would reduce breaks, precautionary boil water notices, thus improving the water quality for our customers.

b. What activities and services will be provided to meet the intended purpose of these funds?

Wastewater collection system cleaning, CCTV, cured-in-place lining, and renewal and replace. Water leak detection study, renewal and replace potable water infrastructure, and valve replacement.

c. What direct services will be provided to citizens by the appropriation project?

Direct services to the citizens in the form of improved water quality and sewer infrastructure upgrades to a system nearing maximum life and will need immediate repair or replacement to be consistent with the County’s level of service.

d. Who is the target population served by this project? How many individuals are expected to be served?

This project will serve the nearly 8,000 citizens residing in this service area, many who are elderly or students (preschool, grade school, high school, and college), as well as the general public.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Improved water quality and a reduction in the proliferation of blue-green algae. This will be measured by frequent and strategic testing of the water quality throughout the system by the County's water quality team.
f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

NA

13. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

Pasco County Utilities would receive the funding to enhance the water and wastewater infrastructure of the Lindrick service area.
