### Fiscal Year 2021-2022

LFIR # 1877

1. Project Title

2. Senate Sponsor

3. Date of Request

4. Project/Program Description

The purpose of this project is to create 27.32 acres of Tape grass meadows within the Caloosahatchee River that will filter both nutrients and algae from reaching downstream waters as well as providing critically important habitat for fisheries production. The benefits of submerged vegetation meadows include critically important functions for fisheries production, reducing toxic algae blooms, sediment stabilization, absorbing nutrients, and coastal resilience.

#### 12. Program Performance

##### a. What specific purpose or goal will be achieved by the funds requested?

This project will create 27.32 acres of critically important submerged vegetation meadows. The benefits of submerged vegetation meadows have been extensively researched for their importance in recreational and commercially important fisheries production, providing critically important habitat, reducing toxic algae blooms, stabilizing sediments, absorbing nutrients, and coastal resilience.

##### b. What activities and services will be provided to meet the intended purpose of these funds?

The funds will be spent on project management, cultivation and installation of 140,000 nursery cultivated aquatic plants, protect plants with 16 aids to navigation and 683 herbivory exclusion cages, maintenance of the herbivory exclusion cages and plants, reporting, and scientific review.

##### c. What direct services will be provided to citizens by the appropriation project?

This project will create 27.32 acres of critically important submerged vegetation meadows. The benefits of submerged vegetation meadows have been extensively researched for their importance in recreational and commercially important fisheries production, providing critically important habitat, reducing toxic algae blooms, stabilizing sediments, absorbing nutrients, and coastal resilience.

##### d. Who is the target population served by this project? How many individuals are expected to be served?

Both the local and state economy will benefit from this project. This project will have direct positive impacts to the seafood industry, eco-tourism industry, recreational boating industry, real estate industry, and the tourism industry as each of these industries are dependent on healthy habitats and clean water. The indirect effects of this project will reach individuals that depend on clean water in Florida.

##### e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?
