**1. Project Title**

**2. Senate Sponsor**

**3. Date of Request**

**4. Project/Program Description**

The funds will serve to replace the structurally deficient corrugated metal pipe (CMP) culvert located at SW 64th Ct. within the Twin Lakes Canal in South Miami, Florida with a new bridge. A Visual inspections outlined in the Routine Inspection Report prepared by Marlin Engineering, Inc., dated December 16, 2019, illustrates the corrugated metal pipe (CMP) culvert is experiencing extreme deterioration and is structurally deficient with additional roadway pavement cracking and settlement above the culvert. In addition, the City of South Miami desires to provide pedestrian connectivity between the Manor Lane neighborhood and the existing metrorail and businesses in the area but due to the limited right of way adjacent to the existing culvert prevents the construction of the new sidewalk. A new bridge at this location would provide the desire connectivity and safety to the residents and visitors of the area.
