1. Project Title

2. Senate Sponsor

3. Date of Request

4. Project/Program Description

Gulf County proposes to construct infrastructure for a new airport. The development of air transportation will kickstart the economic revitalization desperately needed in the aftermath of Hurricane Michael in the county and region. A 2019 pre-feasibility study indicated that airport development in Gulf County is feasible. The development of an airport in Gulf County compliments the road and rail infrastructure that serves the region.

12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

Gulf County will implement construction methods that emphasize quality, durability, efficiency, and sustainability. This project will also be designed to incorporate principles of resilience and mitigation against the impact of future disasters. This project is designed to help mitigate the increasing threat of coastal flooding due to weather events by providing additional evacuation opportunities for residents from future severe tropical weather events. It will also serve as a staging area for post-disaster recovery operations including air-lifts of critical supplies and arrival of first responders. With the anticipation and understanding of future coastal flooding hazards, new transportation and airport infrastructure will increase evacuation opportunities for residents of Gulf County and will enhance emergency response capabilities in the aftermath of a natural disaster.

b. What activities and services will be provided to meet the intended purpose of these funds?

This project will create an airport that will allow for tremendous opportunities in community and economic development. This project can also serve as a hub for evacuation of residents from future severe tropical weather events and it will serve as a staging area for post-disaster recovery operations, including air-lifts of critical supplies and arrival of first responders. The project will provide the general public with the benefit of accessible aviation which is especially rare in this region of Florida.

c. What direct services will be provided to citizens by the appropriation project?

A functioning airport that Gulf County does not currently have.

d. Who is the target population served by this project? How many individuals are expected to be served?

Approximately 13,639 residents of Gulf County as well as visitors that travel to Gulf County.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

New transportation and airport infrastructure will increase evacuation opportunities for residents of Gulf County and will enhance emergency response capabilities in the aftermath of a natural disaster. It will also serve as a staging area for post-disaster recovery operations, including air-lifts of critical supplies and arrival of first responders, as well as provide an alternative travel opportunity for residents and visitors to the area. Recording the number of flights to and from Gulf County would determine the impact.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Failing to meet deliverables or performance measures would impact future funding requests. Standard contract penalties are sufficient.

13. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

Gulf County will own the facility.
