12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

Florida Ready to Work is a scalable, research-based foundational employability and soft skills training, assessment, and stackable credentialing solution that is developing the career readiness skills of the unemployed and underemployed, advancing completion of technical training, and responding to employer demand for work ready talent across occupations and industry sectors.

b. What activities and services will be provided to meet the intended purpose of these funds?

This comprehensive solution offers state colleges, technical centers, regional CareerSource boards, high schools, and other community-based workforce education/development partners a cost-effective method to determine jobseeker readiness for occupation-specific training and to provide targeted, step-by-step remediation for those jobseekers who are "not ready". The tool will further predict successful completion of occupation-specific training programs. Thereby maximizing the best use and return on investment of taxpayer funded training, while accelerating jobseeker transition from training to employment. The program also provides the regional CareerSource boards a mechanism to fully comply with the federal requirement to provide an "initial assessment of skill levels including literacy, numeracy and English language proficiency, as well as aptitudes, abilities (including skills gaps)" per section 134(c)(2) of WIOA and the Joint Final Rule - Reg. 678.430.

c. What direct services will be provided to citizens by the appropriation project?

The program can provide training for up to 500,000 students / jobseekers annually, so nearly every new student enrolled in a state college/technical center occupational training program and all unemployed/underemployed jobseekers receiving public assistance (SNAP and TANF) could participate.

d. Who is the target population served by this project? How many individuals are expected to be served?

Jobless persons, economically disadvantaged persons, high school and university/college students, and currently and former incarcerated persons. More than 800 individuals are expected to be served.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Provide a scalable, accessible training solution to elevate the essential soft skills and foundational career skills of high school students and underskilled/underemployed adults and to predict successful completion of occupation-specific training programs. Thereby maximizing the best use and return on investment of taxpayer funded occupational training. Number of students/jobseekers trained; training hours completed; skills gains achieved; and occupational training completion/ employment rate post program completion.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Financial penalties for not satisfying credential attainment and system uptime benchmarks.

13. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

N/A
