12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

Camp Gilead is requesting \$150,000 to renovate its gymnasium which was constructed in the early 1970s. Camp Gilead's gymnasium is the only gym in Polk City. The goal is to increase recreational opportunities for the youth and families in Polk City. In the past, Camp Gilead has attempted to use the gym for recreational leagues, but its use was and is limited to daylight hours with not as much night time use due to mosquitoes, improper lighting, and heat since it is open air and doesn't have HVAC to accommodate the participants.

b. What activities and services will be provided to meet the intended purpose of these funds?

The investment into this gymnasium renovation will allow many opportunities for our community to hold youth and adult recreation leagues, give participants opportunities to exercise and play while interacting with others, provide a place to train youth and adults with self-confidence and character with the goal of keeping them connected to each other so opportunities of criminal activities diminish.

c. What direct services will be provided to citizens by the appropriation project?

This investment will allow direct services at Camp Gilead to occur via summer camp programming and retreats, workshops, conferences, and recreational leagues throughout the year for grade through high school students, college students, and adults. Activities will occur to encourage spiritual, physical, social, and emotional growth through character building while fostering leadership development among the participants.

d. Who is the target population served by this project? How many individuals are expected to be served?

The target population served by this project will include, but is not limited to grade school through high school students, college students and adults. Camp Gilead also serves local at-risk youth, foster care children, and children having one or both parents incarcerated. Upon completion of the gymnasium renovation, Camp Gilead will be able to use it to serve approximately 4,000 persons annually.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The expected benefit of this project will be that participants will come to Camp Gilead and separate themselves from distractions, be encouraged, and equipped to flourish as sound (physically, spiritually, emotionally, and mentally) productive leaders in their corresponding communities. A survey tool or evaluation will collect data as a means to provide both objective and subjective feedback about events that occurred. The information obtained from the responses will guide and determine areas needing to be addressed for upcoming events.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Penalties for failing to meet deliverables or performance measures provided for in the aforementioned contract and as stated in this document seem to be sufficient. Camp Gilead possesses a strong understanding of the expectations related to the project, its performance, and deliverables. Camp Gilead is prepared to meet the expectations to adjust implementation plans, and provide all necessary information and documentation to demonstrate a good faith effort to meet department requirements.

13. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.
