11. Status of Construction

If yes, indicate the amount of funds received and what the funds were used for.

The Escambia County Sheriff's Office (ECSO) did not request any direct funding. The Escambia County Board of County Commissioners received money through the American Rescue Plan and the ECSO received indirect funds in the total of \$265,107. The funds were utilized for law enforcement purposes.

14. Program Performance

LFIR # 1392

a. What specific purpose or goal will be achieved by the funds requested?

The goal is to mitigate gun violence throughout Escambia County, to include the incorporated City of Pensacola through the usage of crime intelligence software in the form of ShotSpotter.

b. What activities and services will be provided to meet the intended purpose of these funds?

ShotSpotter is a subscription service that uses strategically placed sensors within a 6 mile radius of the County's targeted area, and uses software to detect and locate gunfire with an increased officer response time by 90%. ShotSpotter will provide comprehensive data to protect officers by providing critical situational awareness and increased life-saving aid to victims.

c. What direct services will be provided to citizens by the appropriation project?

ShotSpotter provides critical information in real-time allowing responding law enforcement more accurate crime location information. The program will also assist in prevention of crimes, increase forensic evidence collection capabilities, and render potential life-saving aid to victims. This program will increase community safety by reporting potential unreported gun crimes to local law enforcement through an automated sensory system.

d. Who is the target population served by this project? How many individuals are expected to be served?

The targeted population of Escambia County, to include the incorporated cities of Pensacola and Century, with an approximate population of 322,000 residence.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The benefit of this project will be to reduce gun violence by more than 60%. The methodology by which this outcome will be measured is through data supporting detailed forensic analysis of gunfire incidents as reported through Detailed Forensic Report (DFR) documentation. DFR is court-admissible to verify timing, sequence and location of each shot fired as well as to obtain search warrants or to investigate shootings. An additional benefit is an increase in self dispatching of law enforcement to gun related violence and critical incidents. In turn this will decrease response times, provide accurate actionable information, and increases community safety.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Penalties include written notification to correct within 30 days. If still not corrected the agency shall submit termination of agreement in writing to include effective termination date. If terminated prior to project completion the Agency shall only pay for the percentage of the project satisfactorily performed for which cost can be substantiated.
