14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

Change Everything USA believes that diverse partnerships and collaborations are key to harnessing the synergetic power of collective impact and influence, in tackling Florida's mental health crisis. The Breaking Through Project will not only work to alleviate immediate distress but also foster long-term resilience and self-sufficiency, nurturing a generation that is equipped to navigate the complexities of today's world. Breaking Through strives to change the larger culture around mental health, using collaborative partnerships with elected officials, business, and faith leaders to implement these initiatives into our schools, communities, and society.

b. What activities and services will be provided to meet the intended purpose of these funds?

We will achieve our goal through four core projects: (1) our Breaking Through Initiative engaging leaders across our communities on these issues to influence policy and education on the best practices to tackling the mental health crisis, (2) our Breaking Through Tribe focused on creating resources for those supporting Gen Z and Millennials- parents, caregivers, schools, workplaces, etc. using practical tools to help communities better understand the challenges these demographics are facing, and foster unity and connection, (3) our Behavioral Health Model: Redesigned Mind an innovative, technological based program created in conjunction with doctors and behavioral health experts to deliver personalized, engaging content focused on improving various areas of users' lives, and (4) State of the Mental Health Crisis Data Analysis to provide communities with a scorecard for measuring success.

c. What direct services will be provided to citizens by the appropriation project?

Through the implementation of each of the four projects within Breaking Through, Change Everything USA will be providing direct dissemination of best practices in mental health tools and education and fostering the development of community partnerships that will strengthen and expand the available resources to impacted populations leading communities toward innovative strategies that foster mental wellness among Millennials and Gen Z.

d. Who is the target population served by this project? How many individuals are expected to be served?

Millennials and Gen Z that are at-risk for, or currently struggling with their mental health. Demographic list pulled from House application: Persons with poor mental health, persons with poor physical health, jobless persons, economically disadvantaged persons, at-risk youth, homeless, drug users (in health services), currently or formerly incarcerated persons, drug offenders (in criminal justice). The project is expected to serve over 100,000 persons.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The Breaking Through project will improve physical and mental health, reduce substance abuse and recidivism, dismantle stigma on mental health, improve education and protect Millennials and Gen Z from harm by steering them to break free from substances, improv relationships with social media, cultivate interpersonal relationships, discover their unique talents and skills, find their place in the world, and heal from their past. Success will be measured through comparing key data points from 2019-2023 with future year's data and aligning that with a community scorecard using future SAMSHA and State Mental Health reports, OTP capacities/censuses & justice system stats.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?
