

The Florida Senate Local Funding Initiative Request Fiscal Year 2024-2025

LFIR # 1426

1. Project Title DeBary Benson Junction Road Reconstruction 2. Senate Sponsor Tom Wright 3. Date of Request 11/09/2023 4. Project/Program Description The project will reconstruct Benson Road, an arterial road, built in the 1960s that is in disrepair. It has no formal stormwater system and floods during heavy rains, impacting our industrial district. The runoff also dumps into Ge Springs, designated by the state as an outstanding spring. There are no curbs or sidewalks making it extremely of for pedestrians and bicyclists. The intersection of Central Florida's three major bike trails meet on Benson Junctive bringing thousands of bicyclists to this area annually. The road is a major economic thoroughfare between the City's industrial district and DeBary's new downtown. The reconstruction will add sidewalks, gutters, and install a stormwater system to prevent flooding and improve water Gemini Springs. It will significantly improve pedestrian and bicycle safety, by adding sidewalks and trails. As the for our downtown, this road will see significant increase in pedestrian, bike, and golf cart traffic. 5. State Agency to receive requested funds State Agency contacted? No 6. The Florida Senate Local Funding Initiative Request Fiscal Year 2024-2025

LFIR # 1426

a. What specific purpose or goal will be achieved by the funds requested?

Reconstruction of the road will make it compliant with safety & storm water standards. Funding will be adding curbs, gutters, turning lanes, and sidewalks for better traffic flow and pedestrian safety in commercial/industrial areas. Installation of a storm water system to prevent flooding of the road and adjacent businesses from storms. Untreated storm water will no longer flow into Gemini Springs.

b. What activities and services will be provided to meet the intended purpose of these funds?

Road reconstruction, including installing a storm water system, gutters, curbs, and sidewalks, will allow us to meet the goals.

c. What direct services will be provided to citizens by the appropriation project?

The improvement makes the road safer for citizens as they walk, bike or cart. Benson Junction is a major arterial road for our new downtown development and industrial sector in the City and will be an economic driver, increasing investment and diversification in our tax base. The improvement of the road will contribute to the clean up of Gemini Springs, currently an Outstanding Florida Spring

d. Who is the target population served by this project? How many individuals are expected to be served?

The immediate beneficiaries are the thousands of trail users, pedestrians, and industrial businesses located at this location. Within the next year, our downtown will break ground adding about 800 residences next to this project.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

There are several immediate benefits of this project. 1) By redirecting storm water appropriately, the nutrient load, measured by DEP, in Gemini Springs will decrease. 2)flooding will be eliminated 3)safety will be increased for all road users, measured by a decrease in accidents. The city and the sheriff's office will monitor traffic safety.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?
