The Florida Senate Local Funding Initiative Request Fiscal Year 2024-2025

10. Has the entity requesting this project received any federal assistance related to the COVID-19 pandemic?

If yes, indicate the amount of funds received and what the funds were used for.

with clients in their homes to communicate with the doctors/therapist via Telemedicine.

In 2021, CASL received \$442,500 for pandemic relief. The funds were used to hire additional staff as we opened Arbor Village which increased our capacity by 88 additional beds along with providing additional support in our homes. During the pandemic, CASL increased its support staff by 20%. Additionally, CASL purchased 500 COVID testing kits and equipment for staff to work

14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

Over half of the people served by CASL are homeless prior to admission in addition to their mental illness or co-occurring disorders. From CASL's experience, as well as supported by numerous studies, when supportive housing services are incorporated into their housing, it dramatically reduces the burden on the acute care system. The model that we have developed has proven to dramatically reduce recidivism to the emergency rooms, forensic hospitals, jails and Crisis Stabilization Units. Over the past several years, the recidivism rate of our residents is at our below 5% annually. A study in Lee County showed that persons with severe and persistent mental illness or co-occurring disorders who did not have housing coupled with the supportive service consumed, on average \$54,625/year.

b. What activities and services will be provided to meet the intended purpose of these funds?

The case managers in collaboration with each resident, develops an Individual Service Plan (ISP) based on personal goals and three distinct program objectives; 1) Obtain and remain in permanent housing; 2) Achieve self-determination; 3) Increase life skills, income and overall quality of life. Our organization uses the Functional Assessment Rating Scale (FARS) to establish a benchmark of the resident's initial functional ability. The FARS enables the case manager to encourage further independence through metered goals that are primarily driven by the resident. We provide comfortable residential settings in the community which offer security and stabilization, enhancing the confidence and safety felt by our residents. Individualized service plans are utilized to set short and long term goals which are essential to maintaining stability and recovery. Our residents have a case manager who advocate and assist in resolving challenges, barriers, obstacles, and assure goals.

c. What direct services will be provided to citizens by the appropriation project?

Three services are provided - Recovery Peer, Housing and the supportive services essential to sustain persons with SPMI in community-based housing. Our residents have a case manager who advocate and assist in resolving challenges, barriers, obstacles and assure goals are met. This assistance enables our residents to access community resources essential to resiliency, self-determination and independence. Our case mangers provide other types of assistance by working with our clients to develop literacy skills, skills to search for job/volunteer opportunities, budgeting, healthcare access, transportation, community services, crisis intervention, accessing clothing resources, computers skills, nutrition, social skills, hygiene management, security management, safety management and housekeeping skills. Residents receive ongoing encouragement and feedback from our case managers, helping them improve their daily living skills, socialization, personal appearance and living pace upkeep.

d. Who is the target population served by this project? How many individuals are expected to be served?

Typically, CASL targets the Severe and Persistently Mentally III (SPMI0 or Adults with Mental Health Problems (AMHP) as defined by DCF Pamphlet 155-2. Over 50% not only have a mental health diagnosis, but a substance abuse diagnosis as well, co-occurring. In addition to this population, CASL assist local forensic diversion programs. This includes but not limited to individuals from state forensic hospitals and local goals through Comprehensive Treatment Court (CTC), as well as, each of the local Florida Assertive Community Treatment (FACT) teams in each County we serve. Most of these clients typically have a mental Health Diagnosis and (ICD10) code between F20-39 and need to receive services for their current MH Problem for 12 months or more. CASL expects to serve 800+ people.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

LFIR # 2346

Services provided by CASL assist the State in the management of a system of care for persons with mental illness most of whom were homeless, chronically homeless, previously incarcerated due to a disability and extremely low or no income. This care is designed to reduce the occurrence, severity, duration and disabling aspects of mental and behavioral disorders. CASL helps individuals to progress towards recovery and self-fulfillment/actualization through the provision of support services and housing. CASL and its assisted living facility (ALF), Renaissance Manor, seek to assist each individual with the services best suited to each client's individual progress. The outcomes will be measured by individuals served and remaining in an independent living situation.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

The managing entities, Central Florida Behavioral Health Network (CFBHN) and Central Florida Cares, require services and people served to be unloaded/maintained in the Electronic Records Systems (CHDS). Both ME's requires for this information to be uploaded to their systems to ensure the amount of services provided equals or exceeds the invoiced amount ensuring that billing matches data. If there is not enough data uploaded into their system to indicated services provided per contract requirements, CFHBN will reduce the payment to the provider. CASL has consistently exceed the outcomes and contract requirements with the 100% reporting compliance. For the past four years, CASL has expanded capacity by 30% per year. This year we expanded by 400 beds in Orange, Polk and Charlotte counties.
