14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

1

The Florida Senate Local Funding Initiative Request Fiscal Year 2024-2025

LFIR # 2553

This appropriation would support relocation and expansion of a local peer-led mental health counseling and respite center in Central Florida. The former space is being reclaimed for use by the building owner. Peer respites are a proven and effective tool for hospital diversion and suicide prevention. Peer services are an innovative, community-centered solution that can prevent mental health crises and promote holistic wellness by providing immediate support and ensuring long-term assistance.

b. What activities and services will be provided to meet the intended purpose of these funds?

Peer Support Space, Inc. will locate and renovate suitable space for programming and overnight respite stays, while at the same time, hire staff to operationalize peer support services. Peer Support Space will utilize consultants who have successfully developed other recognized peer support programs as well as develop an advisory board of community members and peers who will meet quarterly.

c. What direct services will be provided to citizens by the appropriation project?

Peer-led services; orientation, overnight respite services, peer counseling (group and individual), aftercare and other peer-led services requested and deemed appropriate for the individual seeking support.

d. Who is the target population served by this project? How many individuals are expected to be served?

Persons with poor mental health, at-risk youth, developmentally disabled, physically disabled, veterans, youth aging out of foster care. Approximately 200 individuals will be served.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Participants will maintain a 70% successful completion for all participants. Successful completion of respite services includes self-reported improved overall mental health, increased knowledge of mental health resources/tools, and decreased feelings of isolation upon completion of the check-out survey. Successful completion of respite services will be determined by check-out. This will be measured by a best practices model of self-evaluation and data monitoring based on techniques used by other peer support organizations and in the practice of program evaluation. It includes developing a logic model, identifying outcomes, selecting measures/indicators, collecting and analyzing data.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Return any unspe	nt funds to	the state.
