### 14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

To empower 911 response agencies throughout Florida, including rural underserved areas with rapid access through a digital platform to critical medical information. This will significantly enhance emergency response outcomes by facilitating timely and precise care. The primary aim is to equip clinicians with essential tools and education, ensuring confident and safe treatment of pediatric and adult patients in emergency situations.

16

### The Florida Senate Local Funding Initiative Request Fiscal Year 2024-2025

**LFIR # 2790** 

### b. What activities and services will be provided to meet the intended purpose of these funds?

The digital platform will deliver instant access to life-saving treatment information including accurate medication dosages, equipment sizing, CPR support, and detailed checklists and protocols essential for immediate care to paramedics/EMS in emergency situations throughout Florida, including rural and underserved areas.

c. What direct services will be provided to citizens by the appropriation project?

Provide EMS professionals with critical information and training to deliver prompt and effective medical care during emergencies throughout Florida, including rural and underserved areas.

d. Who is the target population served by this project? How many individuals are expected to be served?

All residents and visitors throughout the state, including rural and underserved areas in need of emergent medical attention.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Enhance physical and mental health outcomes, as well as improve education for EMS professionals throughout Florida. aims to reduce medication errors and increase pediatric cardiac arrest survival rates, as well as decrease PTSD and anxiety

disorders among EMS personnel. The educational aspect will be measured by the increase in successful resuscitations benchmarked against national rates. To measure these outcomes, the methodology includes establishing baseline medication error rates and comparing post-implementation data. The national cardiac arrest registry (CARES) will be used to assess survival rates, while standardized tools will track changes in mental health among EMS personnel. The effectiveness of training will be evaluated by comparing resuscitation success rates before and after the project's implementation, against national statistics.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Specific penalties should be clearly outlined in the contract and the parties involved should have a shared understanding of the consequences of non-performance. Suggested penalties or considerations may include performance improvement plan, contract termination, or reversion of unused portion of the appropriated funds back to the state.
