Construction/Renovation/Land/ Planning Engineering		0			
Total State Funds Requested (must equal total from question #6)					

14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

15

16

The Florida Senate Local Funding Initiative Request Fiscal Year 2024-2025

LFIR # 2842

Students with disabilities often face barriers that limit academic success and affect future employment. This project ensures better preparation for transition from high school to post-secondary education. The program is evidenced-based and aligns with state educational goals including those of the REACH Act and First Lady DeSantis' Hope Florida Initiative to provide better guidance and remove barriers to self-sufficiency and pathways to economic opportunities.

b. What activities and services will be provided to meet the intended purpose of these funds?

Pre-employment and transition services for high school youth with disabilities and their families. These services will be provided through grants to local school districts, charter and private schools for career exploration and career pathing, leading students into CTE programs, post-secondary education, and careers. Data on Florida's in-demand/growing industries will be used to guide this work.

c. What direct services will be provided to citizens by the appropriation project?

Students will participate in industry tours and presentations, connections to career support resources including Vocational Rehabilitation services, Career and Technical Education, apprenticeships, and other post-secondary education programs. Parents will receive guidance on post-secondary resources and supports to avoid the "service cliff" after high school graduation.

d. Who is the target population served by this project? How many individuals are expected to be served?

High school students, at-risk youth, individuals with physical/developmental disabilities, economically disadvantaged persons. Expect to serve between 400-800 individuals throughout those populations.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Enhance specific individual's economic self-sufficiency by improving graduation rates, CTE enrollment, and access to vocational rehabilitation. The Able Trust has seen a 90% graduation rate for students served, 70% of students enrolled in CTE, apprenticeship, or other post-secondary programs, and 100% of students referred to the state Vocational Rehabilitation Program. These outcomes can be measured by tracking graduation rates, enrollments of students by grantee, and referrals of students by The Able Trust and VR.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Return of unspent funds/return of funds not spent in accordance with the contract.
