Local Funding Initiative Request

Fiscal Year 2025-2026

LFIR # 2241

1. Project Title

2. Senate Sponsor

3. Date of Request

4. Project/Program Description

The Lauderdale Lakes Drainage Improvements Project aims to enhance drainage service delivery and waterflow into the South Florida Water Management District C-12 and C-13 Canals. The city's interconnected canals and culverts play a vital role in keeping hydraulic balance. Improvements will control surface water runoff, transportation conditions on roadways, protect the environment, enhance discharge into SFWMD primary canal, and improve groundwater quality. These upgrades will reduce flooding duration, accelerate stormwater conveyance to public waterways, and ensure steady stormwater flow through the city canals into C-12 and C-13.

The project will improve the Roadway and Canals drainage system in the city. The activities will include the installation of the new drainage system and also the repair and/or replacement of the roadway and canal drainage system including the culverts and swale improvements. 1. Public Safety improvement; 2. Water Quality improvements; 3. Enhanced compliance with NPDES permit with FDEP; 4. Increase of pavement surface service lifetime; 5. Alleviation of flooding issues

b. What activities and services will be provided to meet the intended purpose of these funds?

The project scope include installation of new drainage system and also the repair and/or replacement of the roadway drainage system, culverts, outfalls and swales improvements throughout the City of Lauderdale Lakes.

c. What direct services will be provided to citizens by the appropriation project?

The project will minimize the risk of flooding in residential and commercial areas, ensuring the safety and well-being of citizens during heavy rainfall events. The project will contribute to better water quality by reducing pollutants and mitigating the impact of stormwater runoff. The repair and maintenance of existing culverts, outfalls, and swales, along with the installation of new drainage systems, will strengthen the city's infrastructure, making it more resilient. The improvements to roadway drainage systems will reduce standing water on streets.

d. Who is the target population served by this project? How many individuals are expected to be served?

About Ten thousand people are expected to be served with this project.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Roadway flooding issues in the critical areas will be resolved. It will help residents mobility and will also enhance traffic safety.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

The maintenance of the drainage/canal system is an obligation to the city per the NPDES permit with the FDEP. The failure to maintain the system may be subject to violation of the permit and FDEP may impose penalties based on their regulations.
