#### 13. Program Performance

☐ Yes, Applied

a. What specific purpose or goal will be achieved by the funds requested?

Help prevent malnutrition and isolation among seniors in Pinellas County by supporting Meals on Wheels. With one in two seniors at risk of malnutrition, providing meals and connection to at least 500 seniors on the waiting list is crucial. Your support can make a difference and ensure seniors can thrive, and live independently at home, avoiding costly institutional care. Help prevent the waiting list from growing each month.

b. What activities and services will be provided to meet the intended purpose of these funds?

We provide regular meal delivery and wellness checks by trained volunteers or staff to support seniors to live independently and improve their quality of life. Our service is a lifeline, and drivers have even prevented suicide. Drivers may call family if they notice a change in the client, make an elder abuse report if they are concerned for their safety, or call 911 if their life is in danger.

c. What direct services will be provided to citizens by the appropriation project?

In-person meal delivery and social connection with a caring volunteer or Neighborly employee. All meals are planned by a registered dietitian to ensure they are balanced and meet the needs of older adults. Recipients may choose between hot or frozen meals and all recipients will receive hurricane meals. They also have access to nutrition counseling with a dietitian and monthly nutrition education.

d. Who is the target population served by this project? How many individuals are expected to be served?

We will serve older adults age 60 and over. We expect to serve at least 500 people. Targeted populations include clients who are low-income, minority, live alone, veterans, and at-risk for institutional care. Pinellas County is reported to be 35% age 60+, 13% minority, 30% living alone, and 14% low-income.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Food security and reduced isolation and malnutrition for seniors. We track this through evidence-based assessments and client survey data. Meal data and client welfare notes are tracked daily. Preliminary findings in an ongoing study on Pinellas County meals on wheels recipients suggest that in-person meal delivery improves health outcomes, reduces loneliness, and decreases food insecurity. Community-based Meals on Wheels programs are evidence-based, cost-effective solutions to reducing healthcare costs. institutional care, healthcare utilization, improving nutrition status, and safety.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

	is project related to mitigation, response, or recovery from a natural disaster? No
a. If Y	es, what phase best describes the project?
	Mitigation (reducing or eliminating potential loss of life or property)
	Response (addressing the immediate and short-term effects of a natural disaster)
	Recovery (assisting communities return to normal operations, including rebuilding damaged infastructure)
b. Naı	me of the natural disaster (or Executive Order # for events not under a federal declaration):
