13. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The project aims to improve water quality and mitigate flooding in a hazard area.

b. What activities and services will be provided to meet the intended purpose of these funds?

The shovel-ready project aims to improve the existing drainage system by installing an additional 3,600 linear feet of exfiltration trench underneath the roadway, adding supplementary catch basins; replacing some existing catch basins, and installing additional supplementary exfiltration trenches and pipes. The existing catch basins will be modified to provide sediment traps and pollution retardant baffles to protect the French drains. Additional French drains, catch basins, and/or manholes will provide water quality and water quantity treatment.

c. What direct services will be provided to citizens by the appropriation project?

The proposed project reduces the flood risk for the residents of Cutler Bay and protects the Town's evacuation routes. Since incorporation, the Town has adopted higher regulatory standards and, currently, adheres to the base flood elevation standard, plus 1ft. above. Due to the efforts of the Public Works Department, the Town is currently rated by FEMA as a Community Rating System 3 which provides flood insurance policy holders in the Town with a 35% discount on their premiums.

d. Who is the target population served by this project? How many individuals are expected to be served?

The Town of Cutler Bay's population is 43,958 (Census 2022), this project supports the entire community.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The benefit of this Project is the decreased amounts of pollutants into Biscayne Bay & surrounding communities such as SW 207St. & SW 85 Ave., coming from the Town's outfalls which empty directly into the Bay. Methodology for measurement includes the implementation of water quality treatment data collection, which measures and quantifies the reduction load of pollutants to the bay. Proposed reductions are: 92.7% reduction in Total Phosphorus, 89.5% reduction in Total Nitrogen, and 90.6% reduction in Total Suspended Solids.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

The Town will not be reimbursed for project activities that do not meet the deliverables or performance measures.
