Local Funding Initiative Request

Fiscal Year 2026-2027

LFIR # 1185

1. Project Title Brevard County - North Banana River Dr (South Bridge) (#704014) Replacement

2. Senate Sponsor Debbie Mayfield

3. Date of Request 10/17/2025

4. Project/Program Description

The purpose of the project is to replace the North Banana River Drive South Bridge (#704014), a single span bridge built in 1965. The bridge, at approximately 18.5ft in length crosses navigable Canal #3 which is connected to the Banana River. With noticeable deterioration of the structure and supporting walls, it has been determined that rehabilitation costs will continue to rise making replacement of the bridge necessary. The bridge connects residents and local businesses to SR-528, SR-A1A and SR-520.

LFIR # 1185

The requested funding will replace a bridge crossing a navigable canal connected to the Banana River and connects residents to SR-528, SR-A1A, and SR-520. The North Banana River Drive South Bridge is one of a cluster of four bridges in Merritt Island that have reached their potential lifespan. Other bridges in the area also requiring replacement include Girard Blvd Bridge and the North Banana River Drive North Bridge. The West Central Ave Bridge (#704024) Replacement Project was awarded State FY26 funds through FDOT in the amount of \$1.2M to complete the construction of that new bridge, with a 50% match by the County.

b. What activities and services will be provided to meet the intended purpose of these funds?

New drainage improvements and a new bridge span consisting of two (2) 12-foot travel lanes with 16-inch shoulders and two (2) 6-foot sidewalks will be constructed. The superstructure will consist of Florida Slab beams and 24 sq-inch prestressed concrete pile foundation elements.

c. What direct services will be provided to citizens by the appropriation project?

New ADA compliant sidewalks will be provided to accommodate pedestrians and other active transportation options to aid in safely traversing the bridge.

d. Who is the target population served by this project? How many individuals are expected to be served?

The replacement project targets the general population in the area and will serve approximately 5000 residents and local businesses

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The replacement of the North Banana River Drive South Bridge will provide various benefits to the community by providing safe accommodations for multi-modal transportation users and will also alleviate drainage issues occurring on the existing bridge span. Since the bridge has reached its lifespan, a new structure in place will allow residents to get to and from their homes without the potential for failure or collapse.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

The County's contracts for construction include comprehensive provisions that address failure to perform, including liquidated damages for not achieving Substantial Completion, and termination. In addition, the County will complete a post-construction evaluation of the contractor and submit the form to the County's Purchasing Services.

14. Is this project related to mitigation, response, or recovery from a natural disaster?
