The proposed project will improve wastewater management by ensuring continued sanitary sewer service to existing customers (13,600 residents and 165 businesses) and resilient, increased capacity to serve redeveloping properties in the service area.

c. What direct services will be provided to citizens by the appropriation project?

Replacement of the frail asbestos pipe will increase sewage flow capacity with a larger sized HDPE pipe.

d. Who is the target population served by this project? How many individuals are expected to be served?

The project directly serves 13,600 residents and 165 businesses, but also provides cross-connection in the wastewater collection system.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The need for the sewer line replacement (to increase capacity size and replace frail asbestos pipe) is included in the Wastewater Master Plan, which was adopted by the Village Council in 2019. The completion of the project (nstallation of 4000 linear feet of 12" HDPE pipe) is the metric.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?
