The Florida Senate Local Funding Initiative Request Fiscal Year 2026-2027

LFIR # 2028

Complete questions 10 and 11 for Fixed Capital Outlay Projects

a. What is the cu	urrent phase of t	he project?							
Planning	O Design	Construction	O N/A						
b. Is the project	"shovel ready"	(i.e permitted)?							
c. What is the es	stimated start da	te of construction?							
d. What is the es	d. What is the estimated completion date of construction?								
e. What funding	stream will be u	sed for ongoing ope	rations a	and maintenanc	e of the project	?			
	ist the owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the elationship between the owners of the facility and the entity.								
		,							

12. Details on how the requested state funds will be expended

Spending Category	Description	Amount			
Administrative Costs:					
Executive Director/Project Head Salary and Benefits	Project Director Salary and Benefits	90,000			
Other Salary and Benefits		0			
Expense/Equipment/Travel/Supplies/Other		0			
Consultants/Contracted Services/Study		0			
Operational Costs					
Salary and Benefits	Technical Director, Accounting and Bookkeeping, Managing Directors	135,000			
Expense/Equipment/Travel/Supplies/ Other	Staff travel for visiting schools and stakeholder meetings, Cloud & Al Infrastructure, software licenses, regional training & research. Travel expenses associated with industry engagements, training and conferences.	50,000			
Consultants/Contracted Services/Study	Industry mentors from businesses and academia	25,000			
Fixed Capital Construction/Majo	or Renovation:				
Construction/Renovation/Land/ Planning Engineering		0			
Total State Funds Requested (must equal total from question #6)					

13. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

LFIR # 2028

The funds requested will support the launch of an artificial intelligence education and workforce readiness program designed to prepare students for careers in the growing AI and technology sectors. The program's goal is to build a sustainable talent pipeline by providing college students with applied, industry-aligned AI experiences while introducing high school students to foundational AI concepts and real-world applications.

b. What activities and services will be provided to meet the intended purpose of these funds?

Our organization will use the funding to plan, administer, and deliver a structured artificial intelligence education program serving collegiate and high school students. Program activities include designing and managing industry-aligned, project-based AI learning experiences; coordinating professional mentorship and instructional support; and facilitating applied learning pathways for college participants. At the high school level, activities include implementing foundational AI instruction and organizing team-based projects and AI-related competitions in future years.

c. What direct services will be provided to citizens by the appropriation project?

The appropriation project will deliver direct educational and workforce readiness services to students through structured artificial intelligence training and applied learning opportunities. Services include hands-on AI instruction, project-based skill development, facilitated mentorship, and guided exposure to real-world technology applications. High school and college students will receive organized instruction and participate in collaborative AI projects designed to build foundational knowledge, technical competencies, and career awareness aligned with current and emerging workforce needs.

d. Who is the target population served by this project? How many individuals are expected to be served?

The target population served by this project includes high school students and college students with an interest in artificial intelligence, technology, and workforce readiness. The program is expected to directly serve approximately 100 - 200 students, with capacity to scale in future years as additional cohorts, partnerships, and learning opportunities are added.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The expected benefit of this project is increased student readiness for AI- and technology-related education and careers through strengthened foundational knowledge, applied technical skills, and real-world project experience. Participants will gain exposure to collaborative problem-solving and industry-relevant applications of artificial intelligence. Outcomes will be measured through participant enrollment and completion rates, evaluation of student project deliverables, pre- and post-program skill assessments, and feedback from mentors or instructors.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

	this project related to mitigation, response, or recovery from a natural disaster? No
a. 11	Mitigation (reducing or eliminating potential loss of life or property)
	Response (addressing the immediate and short-term effects of a natural disaster)
	Recovery (assisting communities return to normal operations, including rebuilding damaged infastructure)
b. N	lame of the natural disaster (or Executive Order # for events not under a federal declaration):
