17 and insert: district the current year's district cost

18 differential (DCD). The DCD shall be calculated by adding each

19 district's price level index as published in the Florida Price

20 Level Index (FPLI) for the most recent 3 years and dividing

21 the resulting sum by 3. However, if a district that has a DCD

22 of 1.0 or less is bordered by two or more districts that have

23 an average current FPLI of greater than 4 percent more than

24 the FPLI of the single district, the FPLI, for the purpose of

25 calculating the single district's DCD, shall be increased by

26 an amount equal to one-half of the difference between that

27 district's FPLI and the average of the FPLI's of the border

28 districts. The result for each district shall be
