

1 A bill to be entitled

2 An act relating to the Lake Okeechobee Protection Program;  
3 amending s. 373.4595, F.S.; providing legislative findings  
4 with respect to implementation and funding of the Lake  
5 Okeechobee Watershed Phosphorus Control Program and the  
6 Lake Okeechobee Protection Program; revising a definition;  
7 providing that the Department of Agriculture and Consumer  
8 Services, the Department of Environmental Protection, and  
9 the South Florida Water Management District be jointly  
10 responsible for implementing the Lake Okeechobee  
11 Protection Plan; requiring that annual funding priorities  
12 be jointly established; providing criteria for determining  
13 funding priorities; repealing obsolete provisions;  
14 providing an effective date.

15  
16 Be It Enacted by the Legislature of the State of Florida:

17  
18 Section 1. Subsections (1), (2), and (3) of section  
19 373.4595, Florida Statutes, are amended to read:

20 373.4595 Lake Okeechobee Protection Program.--

21 (1) FINDINGS AND INTENT.--

22 (a) The Legislature finds that Lake Okeechobee is one of  
23 the most important water resources of the state, providing many  
24 functions benefiting the public interest, including  
25 agricultural, public, and environmental water supply; flood  
26 control; fishing; navigation and recreation; and habitat to  
27 endangered and threatened species and other flora and fauna.

28 (b) The Legislature finds that land uses in the Lake  
29 Okeechobee watershed and the construction of the Central and  
30 Southern Florida Project have resulted in adverse changes to the  
31 hydrology and water quality of Lake Okeechobee. These hydrology  
32 and water quality changes have resulted in algal blooms and  
33 other adverse impacts to water quality both in Lake Okeechobee  
34 and in downstream receiving waters.

35 (c) The Legislature finds that improvement to the  
36 hydrology and water quality of Lake Okeechobee is essential to  
37 the protection of the Everglades.

38 (d) The Legislature also finds that it is imperative for  
39 the state, local governments, and agricultural and environmental  
40 communities to commit to restoring and protecting Lake  
41 Okeechobee and downstream receiving waters, and that a  
42 watershed-based approach to address these issues must be  
43 developed and implemented immediately.

44 (e) The Legislature finds that phosphorus loads from the  
45 Lake Okeechobee watershed have contributed to excessive  
46 phosphorus levels in Lake Okeechobee and downstream receiving  
47 waters and that a reduction in levels of phosphorus will benefit  
48 the ecology of these systems. The excessive levels of phosphorus  
49 have also resulted in an accumulation of phosphorus in the  
50 sediments of Lake Okeechobee. If not removed, internal  
51 phosphorus loads from the sediments are expected to delay  
52 responses of the lake to external phosphorus reductions.

53 (f) The Legislature finds that the Lake Okeechobee  
54 phosphorus loads set forth in the South Florida Water Management  
55 District's Technical Publication 81-2 represent an appropriate

56 basis for the initial phase of phosphorus load reductions to  
57 Lake Okeechobee and that subsequent phases of phosphorus load  
58 reductions shall be determined by the total maximum daily loads  
59 established in accordance with s. 403.067.

60 (g) The Legislature finds that this section, in  
61 conjunction with s. 403.067, provides a reasonable means of  
62 achieving and maintaining compliance with state water quality  
63 standards.

64 (h) The Legislature finds that the implementation of the  
65 programs contained in this section is for the benefit of the  
66 public health, safety, and welfare and is in the public  
67 interest.

68 (i) The Legislature finds that sufficient research has  
69 been conducted and sufficient plans developed to immediately  
70 initiate the first phase of a program to address the hydrology  
71 and water quality problems in Lake Okeechobee and downstream  
72 receiving waters.

73 (j) The Legislature finds that in order to achieve the  
74 goals and objectives of this section and to effectively  
75 implement the Lake Okeechobee Watershed Phosphorus Control  
76 Program pursuant to paragraph (3)(c), the state must  
77 expeditiously implement the Lake Okeechobee Protection Plan  
78 developed pursuant to paragraph (3)(a).

79 (k) The Legislature finds that a continuing source of  
80 funding is needed to effectively implement a phosphorus control  
81 program that initially targets the most significant sources  
82 contributing to phosphorus loads within the watershed and

83 continues to address other sources as needed to achieve the  
84 phased phosphorus load reductions required under this section.

85 (l)~~(j)~~ It is the intent of the Legislature to achieve and  
86 maintain compliance with water quality standards in Lake  
87 Okeechobee and downstream receiving waters through a phased,  
88 comprehensive, and innovative protection program to reduce both  
89 internal and external phosphorus loads to Lake Okeechobee  
90 through immediate actions to achieve the phosphorus load  
91 reductions set forth in Technical Publication 81-2 and long-term  
92 solutions based upon the total maximum daily loads established  
93 in accordance with s. 403.067. This program shall be watershed-  
94 based, shall provide for consideration of all potential  
95 phosphorus sources, and shall include research and monitoring,  
96 development and implementation of best management practices,  
97 refinement of existing regulations, and structural and  
98 nonstructural projects, including public works.

99 (m)~~(k)~~ It is the intent of the Legislature that the Lake  
100 Okeechobee Protection Program be developed and implemented in  
101 coordination with and, to the greatest extent practicable,  
102 through the implementation of Restudy project components and  
103 other federal programs in order to maximize opportunities for  
104 the most efficient and timely expenditures of public funds.

105 (n)~~(l)~~ It is the intent of the Legislature that the  
106 coordinating agencies encourage and support the development of  
107 creative public-private partnerships and programs, including  
108 opportunities for pollutant trading and credits, to facilitate  
109 or further the restoration of Lake Okeechobee, consistent with  
110 s. 403.067.

111 (2) DEFINITIONS.--As used in this section:

112 (a) "Best management practice" means a practice or  
 113 combination of practices determined by the coordinating  
 114 agencies, based on research, field-testing, and expert review,  
 115 to be the most effective and practicable on-location means,  
 116 including economic and technological considerations, for  
 117 improving water quality in agricultural and urban discharges.  
 118 Best management practices for agricultural discharges shall  
 119 reflect a balance between water quality improvements and  
 120 agricultural productivity.

121 (b) "Coordinating agencies" means the Department of  
 122 Agriculture and Consumer Services, the Department of  
 123 Environmental Protection, and the South Florida Water Management  
 124 District.

125 (c) "Corps of Engineers" means the United States Army  
 126 Corps of Engineers.

127 (d) "Department" means the Department of Environmental  
 128 Protection.

129 (e) "District" means the South Florida Water Management  
 130 District.

131 (f) "District's WOD program" means the program implemented  
 132 pursuant to rules adopted as authorized by this section and ss.  
 133 373.016, 373.044, 373.085, 373.086, 373.109, 373.113, 373.118,  
 134 373.451, and 373.453, entitled "Works of the District Basin."

135 (g) "Lake Okeechobee Construction Project" means the  
 136 construction project developed pursuant to paragraph (3)(b).

137 (h) "Lake Okeechobee Protection Plan" means the plan  
 138 developed pursuant to this section and ss. 373.451-373.459.

139 (i) "Lake Okeechobee watershed" means Lake Okeechobee and  
 140 the area surrounding and tributary to Lake Okeechobee, composed  
 141 of the 39 surrounding hydrologic basins, as defined by the Lake  
 142 Okeechobee Protection Plan dated January 1, 2004 ~~South Florida~~  
 143 ~~Water Management District SWIM Plan Update dated August 8, 1997.~~

144 (j) "Lake Okeechobee Watershed Phosphorus Control Program"  
 145 means the program developed pursuant to paragraph (3)(c).

146 (k) "Project component" means any structural or  
 147 operational change, resulting from the Restudy, to the Central  
 148 and Southern Florida Project as it existed and was operated as  
 149 of January 1, 1999.

150 (l) "Restudy" means the Comprehensive Review Study of the  
 151 Central and Southern Florida Project, for which federal  
 152 participation was authorized by the Federal Water Resources  
 153 Development Acts of 1992 and 1996 together with related  
 154 Congressional resolutions and for which participation by the  
 155 South Florida Water Management District is authorized by s.  
 156 373.1501. The term includes all actions undertaken pursuant to  
 157 the aforementioned authorizations which will result in  
 158 recommendations for modifications or additions to the Central  
 159 and Southern Florida Project.

160 (m) "Total maximum daily load" means the sum of the  
 161 individual wasteload allocations for point sources and the load  
 162 allocations for nonpoint sources and natural background. Prior  
 163 to determining individual wasteload allocations and load  
 164 allocations, the maximum amount of a pollutant that a water body  
 165 or water segment can assimilate from all sources without  
 166 exceeding water quality standards must first be calculated.

167 (3) LAKE OKEECHOBEE PROTECTION PROGRAM.--A protection  
168 program for Lake Okeechobee that achieves phosphorus load  
169 reductions for Lake Okeechobee shall be immediately implemented  
170 as specified in this subsection. The program shall address the  
171 reduction of phosphorus loading to the lake from both internal  
172 and external sources. Phosphorus load reductions shall be  
173 achieved through a phased program of implementation. Initial  
174 implementation actions shall be technology-based, based upon a  
175 consideration of both the availability of appropriate technology  
176 and the cost of such technology, and shall include phosphorus  
177 reduction measures at both the source and the regional level.  
178 The initial phase of phosphorus load reductions shall be based  
179 upon the district's Technical Publication 81-2 and the  
180 district's WOD program, with subsequent phases of phosphorus  
181 load reductions based upon the total maximum daily loads  
182 established in accordance with s. 403.067. In the development  
183 and administration of the Lake Okeechobee Protection Program,  
184 the coordinating agencies shall maximize opportunities provided  
185 by federal cost-sharing programs and opportunities for  
186 partnerships with the private sector.

187 (a) Lake Okeechobee Protection Plan.--~~By January 1, 2004,~~  
188 The district, in cooperation with the other coordinating  
189 agencies, shall complete a Lake Okeechobee Protection Plan in  
190 accordance with this section and ss. 373.451-373.459. The plan  
191 shall contain an implementation schedule for subsequent phases  
192 of phosphorus load reduction consistent with the total maximum  
193 daily loads established in accordance with s. 403.067. The plan

194 shall consider and build upon a review and analysis of the  
 195 following:

196 1. The performance of projects constructed during Phase I  
 197 of the Lake Okeechobee Construction Project, pursuant to  
 198 paragraph (b).

199 2. Relevant information resulting from the Lake Okeechobee  
 200 Watershed Phosphorus Control Program, pursuant to paragraph (c).

201 3. Relevant information resulting from the Lake Okeechobee  
 202 Research and Water Quality Monitoring Program, pursuant to  
 203 paragraph (d).

204 4. Relevant information resulting from the Lake Okeechobee  
 205 Exotic Species Control Program, pursuant to paragraph (e).

206 5. Relevant information resulting from the Lake Okeechobee  
 207 Internal Phosphorus Management Program, pursuant to paragraph  
 208 (f).

209 (b) Lake Okeechobee Construction Project.--To improve the  
 210 hydrology and water quality of Lake Okeechobee and downstream  
 211 receiving waters, the district shall design and construct the  
 212 Lake Okeechobee Construction Project.

213 1. Phase I.--Phase I of the Lake Okeechobee Construction  
 214 Project shall consist of a series of project features consistent  
 215 with the recommendations of the South Florida Ecosystem  
 216 Restoration Working Group's Lake Okeechobee Action Plan.  
 217 Priority basins for such projects include S-191, S-154, and  
 218 Pools D and E in the Lower Kissimmee River. In order to obtain  
 219 ~~immediate~~ phosphorus load reductions to Lake Okeechobee as soon  
 220 as possible, the following actions shall be implemented:

221 a. The district shall serve as a full partner with the  
222 Corps of Engineers in the design and construction of the Grassy  
223 Island Ranch and New Palm Dairy stormwater treatment facilities  
224 as components of the Lake Okeechobee Water Retention/Phosphorus  
225 Removal Critical Project. The Corps of Engineers shall have the  
226 lead in design and construction of these facilities. ~~However,~~  
227 ~~the district shall encourage the Corps of Engineers to complete~~  
228 ~~a detailed design document by July 1, 2001.~~ Should delays be  
229 encountered in the implementation of either of these facilities,  
230 the district shall notify the department and recommend  
231 corrective actions.

232 b. ~~By January 1, 2001,~~ The district shall obtain permits  
233 and complete construction of two of the isolated wetland  
234 restoration projects that are part of the Lake Okeechobee Water  
235 Retention/Phosphorus Removal Critical Project. The additional  
236 isolated wetland projects included in this critical project  
237 ~~shall be permitted and constructed by January 1, 2003, to~~  
238 further reduce phosphorus loading to Lake Okeechobee.

239 ~~e. By January 31, 2002, the district shall design and~~  
240 ~~complete implementation of the Lake Okeechobee Tributary~~  
241 ~~Sediment Removal Pilot Project. This project shall consist of~~  
242 ~~testing two alternative technologies for trapping and collecting~~  
243 ~~phosphorus laden sediment in the secondary drainage system prior~~  
244 ~~to its discharge into the primary canal system and Lake~~  
245 ~~Okeechobee, thereby further reducing the total sediment loading~~  
246 ~~to the lake.~~

247 c.d. The district shall work with the Corps of Engineers  
248 to expedite initiation of the design process for the Taylor

249 Creek/Nubbins Slough Reservoir Assisted Stormwater Treatment  
250 Area, a project component of the Restudy. The district shall  
251 propose to the Corps of Engineers that the district take the  
252 lead in the design and construction of the Reservoir Assisted  
253 Stormwater Treatment Area and receive credit towards the local  
254 share of the total cost of the Restudy.

255 2. Phase II.--~~By January 1, 2004,~~ The district, in  
256 cooperation with the other coordinating agencies and the Corps  
257 of Engineers, shall develop an implementation plan for Phase II  
258 of the Lake Okeechobee Construction Project. Phase II shall  
259 include construction of additional facilities in the priority  
260 basins identified in subparagraph (b)1., as well as facilities  
261 for other basins in the Lake Okeechobee watershed. The  
262 implementation plan shall:

263 a. Identify Lake Okeechobee Construction Project  
264 facilities to be constructed to achieve a design objective of 40  
265 parts per billion (ppb) for phosphorus measured as a long-term  
266 flow weighted average concentration, unless an allocation has  
267 been established pursuant to s. 403.067 for the Lake Okeechobee  
268 total maximum daily load.

269 b. Identify the size and location of all such Lake  
270 Okeechobee Construction Project facilities.

271 c. Provide a construction schedule for all such Lake  
272 Okeechobee Construction Project facilities, including the  
273 sequencing and specific timeframe for construction of each Lake  
274 Okeechobee Construction Project facility.

275 d. Provide a land acquisition schedule for lands necessary  
276 to achieve the construction schedule.

277 e. Provide a detailed schedule of costs associated with  
278 the construction schedule.

279 f. Identify, to the maximum extent practicable, impacts on  
280 wetlands and state-listed species expected to be associated with  
281 construction of such facilities, including potential  
282 alternatives to minimize and mitigate such impacts, as  
283 appropriate.

284 3. Evaluation.--By January 1, 2004, and every 3 years  
285 thereafter, the district, in cooperation with the coordinating  
286 agencies, shall conduct an evaluation of any further phosphorus  
287 load reductions necessary to achieve compliance with the Lake  
288 Okeechobee total maximum daily load established pursuant to s.  
289 403.067. Additionally, the district shall identify modifications  
290 to facilities of the Lake Okeechobee Construction Project as  
291 appropriate if the design objective of 40 parts per billion  
292 (ppb) or the allocation established pursuant to s. 403.067 for  
293 the Lake Okeechobee total maximum daily load established  
294 pursuant to s. 403.067 is not being met. The evaluation shall be  
295 included in the applicable annual progress report submitted  
296 pursuant to paragraph (h) ~~(g)~~.

297 4. Coordination and review.--To ensure the timely  
298 implementation of the Lake Okeechobee Construction Project, the  
299 design of project facilities shall be coordinated with the  
300 department and other interested parties to the maximum extent  
301 practicable. Lake Okeechobee Construction Project facilities  
302 shall be reviewed and commented upon by the department prior to  
303 the execution of a construction contract by the district for  
304 that facility.

305 (c) Lake Okeechobee Watershed Phosphorus Control  
306 Program.--The Lake Okeechobee Watershed Phosphorus Control  
307 Program is designed to be a multifaceted approach to reducing  
308 phosphorus loads by improving the management of phosphorus  
309 sources within the Lake Okeechobee watershed through continued  
310 implementation of existing regulations and best management  
311 practices, development and implementation of improved best  
312 management practices, improvement and restoration of the  
313 hydrologic function of natural and managed systems, and  
314 utilization of alternative technologies for nutrient reduction.  
315 The coordinating agencies shall facilitate the application of  
316 federal programs that offer opportunities for water quality  
317 treatment, including preservation, restoration, or creation of  
318 wetlands on agricultural lands.

319 1. Agricultural nonpoint source best management practices,  
320 developed in accordance with s. 403.067 and designed to achieve  
321 the objectives of the Lake Okeechobee Protection Program, shall  
322 be implemented on an expedited basis. ~~By March 1, 2001,~~ The  
323 coordinating agencies shall develop an interagency agreement  
324 pursuant to ss. 373.046 and 373.406(5) that assures the  
325 development of best management practices that complement  
326 existing regulatory programs and specifies how those best  
327 management practices are implemented and verified. The  
328 interagency agreement shall address measures to be taken by the  
329 coordinating agencies during any best management practice  
330 reevaluation performed pursuant to sub-subparagraph d. The  
331 department shall use best professional judgment in making the  
332 initial determination of best management practice effectiveness.

333 | a. As provided in s. 403.067(7)(d), ~~by October 1, 2000,~~  
334 | the Department of Agriculture and Consumer Services, in  
335 | consultation with the department, the district, and affected  
336 | parties, shall initiate rule development for interim measures,  
337 | best management practices, conservation plans, nutrient  
338 | management plans, or other measures necessary for Lake  
339 | Okeechobee phosphorus load reduction. The rule shall include  
340 | thresholds for requiring conservation and nutrient management  
341 | plans and criteria for the contents of such plans. Development  
342 | of agricultural nonpoint source best management practices shall  
343 | initially focus on those priority basins listed in subparagraph  
344 | (b)1. The Department of Agriculture and Consumer Services, in  
345 | consultation with the department, the district, and affected  
346 | parties, shall conduct an ongoing program for improvement of  
347 | existing and development of new interim measures or best  
348 | management practices for the purpose of adoption of such  
349 | practices by rule.

350 | b. Where agricultural nonpoint source best management  
351 | practices or interim measures have been adopted by rule of the  
352 | Department of Agriculture and Consumer Services, the owner or  
353 | operator of an agricultural nonpoint source addressed by such  
354 | rule shall either implement interim measures or best management  
355 | practices or demonstrate compliance with the district's WOD  
356 | program by conducting monitoring prescribed by the department or  
357 | the district. Owners or operators of agricultural nonpoint  
358 | sources who implement interim measures or best management  
359 | practices adopted by rule of the Department of Agriculture and  
360 | Consumer Services shall be subject to the provisions of s.

361 403.067(7). The Department of Agriculture and Consumer Services,  
362 in cooperation with the department and the district, shall  
363 provide technical and financial assistance for implementation of  
364 agricultural best management practices, subject to the  
365 availability of funds.

366 c. The district or department shall conduct monitoring at  
367 representative sites to verify the effectiveness of agricultural  
368 nonpoint source best management practices.

369 d. Where water quality problems are detected for  
370 agricultural nonpoint sources despite the appropriate  
371 implementation of adopted best management practices, the  
372 Department of Agriculture and Consumer Services, in consultation  
373 with the other coordinating agencies and affected parties, shall  
374 institute a reevaluation of the best management practices and  
375 make appropriate changes to the rule adopting best management  
376 practices.

377 2. Nonagricultural nonpoint source best management  
378 practices, developed in accordance with s. 403.067 and designed  
379 to achieve the objectives of the Lake Okeechobee Protection  
380 Program, shall be implemented on an expedited basis. ~~By March 1,~~  
381 ~~2001,~~ The department and the district shall develop an  
382 interagency agreement pursuant to ss. 373.046 and 373.406(5)  
383 that assures the development of best management practices that  
384 complement existing regulatory programs and specifies how those  
385 best management practices are implemented and verified. The  
386 interagency agreement shall address measures to be taken by the  
387 department and the district during any best management practice  
388 reevaluation performed pursuant to sub-subparagraph d.

389 a. The department and the district are directed to work  
390 with the University of Florida's Institute of Food and  
391 Agricultural Sciences to develop appropriate nutrient  
392 application rates for all nonagricultural soil amendments in the  
393 watershed. As provided in s. 403.067(7)(c), ~~by January 1, 2001,~~  
394 the department, in consultation with the district and affected  
395 parties, shall develop interim measures, best management  
396 practices, or other measures necessary for Lake Okeechobee  
397 phosphorus load reduction. Development of nonagricultural  
398 nonpoint source best management practices shall initially focus  
399 on those priority basins listed in subparagraph (b)1. The  
400 department, the district, and affected parties shall conduct an  
401 ongoing program for improvement of existing and development of  
402 new interim measures or best management practices. The district  
403 shall adopt technology-based standards under the district's WOD  
404 program for nonagricultural nonpoint sources of phosphorus.

405 b. Where nonagricultural nonpoint source best management  
406 practices or interim measures have been developed by the  
407 department and adopted by the district, the owner or operator of  
408 a nonagricultural nonpoint source shall implement interim  
409 measures or best management practices and be subject to the  
410 provisions of s. 403.067(7). The department and district shall  
411 provide technical and financial assistance for implementation of  
412 nonagricultural nonpoint source best management practices,  
413 subject to the availability of funds.

414 c. The district or the department shall conduct monitoring  
415 at representative sites to verify the effectiveness of  
416 nonagricultural nonpoint source best management practices.

417           d. Where water quality problems are detected for  
418 nonagricultural nonpoint sources despite the appropriate  
419 implementation of adopted best management practices, the  
420 department and the district shall institute a reevaluation of  
421 the best management practices.

422           3. The provisions of subparagraphs 1. and 2. shall not  
423 preclude the department or the district from requiring  
424 compliance with water quality standards or with current best  
425 management practices requirements set forth in any applicable  
426 regulatory program authorized by law for the purpose of  
427 protecting water quality. Additionally, subparagraphs 1. and 2.  
428 are applicable only to the extent that they do not conflict with  
429 any rules promulgated by the department that are necessary to  
430 maintain a federally delegated or approved program.

431           4. Projects which reduce the phosphorus load originating  
432 from domestic wastewater systems within the Lake Okeechobee  
433 watershed shall be given funding priority in the department's  
434 revolving loan program under s. 403.1835. The department shall  
435 coordinate and provide assistance to those local governments  
436 seeking financial assistance for such priority projects.

437           5. Projects that make use of private lands, or lands held  
438 in trust for Indian tribes, to reduce nutrient loadings or  
439 concentrations within a basin by one or more of the following  
440 methods: restoring the natural hydrology of the basin, restoring  
441 wildlife habitat or impacted wetlands, reducing peak flows after  
442 storm events, increasing aquifer recharge, or protecting range  
443 and timberland from conversion to development, are eligible for  
444 grants available under this section from the coordinating

445 agencies. For projects of otherwise equal priority, special  
446 funding priority will be given to those projects that make best  
447 use of the methods outlined above that involve public-private  
448 partnerships or that obtain federal match money. Preference  
449 ranking above the special funding priority will be given to  
450 projects located in a rural area of critical economic concern  
451 designated by the Governor. Grant applications may be submitted  
452 by any person or tribal entity, and eligible projects may  
453 include, but are not limited to, the purchase of conservation  
454 and flowage easements, hydrologic restoration of wetlands,  
455 creating treatment wetlands, development of a management plan  
456 for natural resources, and financial support to implement a  
457 management plan.

458 6.a. The department shall require all entities disposing  
459 of domestic wastewater residuals within the Lake Okeechobee  
460 watershed and the remaining areas of Okeechobee, Glades, and  
461 Hendry Counties to develop and submit to the department an  
462 agricultural use plan that limits applications based upon  
463 phosphorus loading. By July 1, 2005, phosphorus concentrations  
464 originating from these application sites shall not exceed the  
465 limits established in the district's WOD program.

466 b. Private and government-owned utilities within Monroe,  
467 Dade, Broward, Palm Beach, Martin, St. Lucie, Indian River,  
468 Okeechobee, Highlands, Hendry, and Glades Counties that dispose  
469 of wastewater residual sludge from utility operations and septic  
470 removal by land spreading in the Lake Okeechobee watershed may  
471 use a line item on local sewer rates to cover wastewater  
472 residual treatment and disposal if such disposal and treatment

473 is done by approved alternative treatment methodology at a  
474 facility located within the areas designated by the Governor as  
475 rural areas of critical economic concern pursuant to s.  
476 288.0656. This additional line item is an environmental  
477 protection disposal fee above the present sewer rate and shall  
478 not be considered a part of the present sewer rate to customers,  
479 notwithstanding provisions to the contrary in chapter 367. The  
480 fee shall be established by the county commission or its  
481 designated assignee in the county in which the alternative  
482 method treatment facility is located. The fee shall be  
483 calculated to be no higher than that necessary to recover the  
484 facility's prudent cost of providing the service. Upon request  
485 by an affected county commission, the Florida Public Service  
486 Commission will provide assistance in establishing the fee.  
487 Further, for utilities and utility authorities that use the  
488 additional line item environmental protection disposal fee, such  
489 fee shall not be considered a rate increase under the rules of  
490 the Public Service Commission and shall be exempt from such  
491 rules. Utilities using the provisions of this section may  
492 immediately include in their sewer invoicing the new  
493 environmental protection disposal fee. Proceeds from this  
494 environmental protection disposal fee shall be used for  
495 treatment and disposal of wastewater residuals, including any  
496 treatment technology that helps reduce the volume of residuals  
497 that require final disposal, but such proceeds shall not be used  
498 for transportation or shipment costs for disposal or any costs  
499 relating to the land application of residuals in the Lake  
500 Okeechobee watershed.

501 c. No less frequently than once every 3 years, the Florida  
502 Public Service Commission or the county commission through the  
503 services of an independent auditor shall perform a financial  
504 audit of all facilities receiving compensation from an  
505 environmental protection disposal fee. The Florida Public  
506 Service Commission or the county commission through the services  
507 of an independent auditor shall also perform an audit of the  
508 methodology used in establishing the environmental protection  
509 disposal fee. The Florida Public Service Commission or the  
510 county commission shall, within 120 days after completion of an  
511 audit, file the audit report with the President of the Senate  
512 and the Speaker of the House of Representatives and shall  
513 provide copies to the county commissions of the counties set  
514 forth in sub-subparagraph b. The books and records of any  
515 facilities receiving compensation from an environmental  
516 protection disposal fee shall be open to the Florida Public  
517 Service Commission and the Auditor General for review upon  
518 request.

519 7. The Department of Health shall require all entities  
520 disposing of septage within the Lake Okeechobee watershed and  
521 the remaining areas of Okeechobee, Glades, and Hendry Counties  
522 to develop and submit to that agency, ~~by July 1, 2003,~~ an  
523 agricultural use plan that limits applications based upon  
524 phosphorus loading. By July 1, 2005, phosphorus concentrations  
525 originating from these application sites shall not exceed the  
526 limits established in the district's WOD program.

527 8. The Department of Agriculture and Consumer Services  
528 shall initiate rulemaking requiring entities within the Lake

529 Okeechobee watershed and the remaining areas of Okeechobee,  
 530 Glades, and Hendry Counties which land-apply animal manure to  
 531 develop conservation or nutrient management plans that limit  
 532 application, based upon phosphorus loading. Such rules may  
 533 include criteria and thresholds for the requirement to develop a  
 534 conservation or nutrient management plan, requirements for plan  
 535 approval, and recordkeeping requirements.

536 9. Prior to authorizing a discharge into works of the  
 537 district, the district shall require responsible parties to  
 538 demonstrate that proposed changes in land use will not result in  
 539 increased phosphorus loading over that of existing land uses.

540 10. The district, the department, or the Department of  
 541 Agriculture and Consumer Services, as appropriate, shall  
 542 implement those alternative nutrient reduction technologies  
 543 determined to be feasible pursuant to subparagraph (d)6.

544 (d) Lake Okeechobee Research and Water Quality Monitoring  
 545 Program. ~~By January 1, 2001,~~ The district, in cooperation with  
 546 the other coordinating agencies, shall establish a Lake  
 547 Okeechobee Research and Water Quality Monitoring Program that  
 548 builds upon the district's existing Lake Okeechobee research  
 549 program. The program shall:

550 1. Evaluate all available existing water quality data  
 551 concerning total phosphorus in the Lake Okeechobee watershed,  
 552 develop a water quality baseline to represent existing  
 553 conditions for total phosphorus, monitor long-term ecological  
 554 changes, including water quality for total phosphorus, and  
 555 measure compliance with water quality standards for total  
 556 phosphorus, including the total maximum daily load for Lake

557 Okeechobee as established pursuant to s. 403.067. The district  
558 shall also implement a total phosphorus monitoring program at  
559 all inflow structures to Lake Okeechobee.

560 2. ~~By July 1, 2003,~~ Develop a Lake Okeechobee water  
561 quality model that reasonably represents phosphorus dynamics of  
562 the lake and incorporates an uncertainty analysis associated  
563 with model predictions.

564 3. ~~By July 1, 2003,~~ Determine the relative contribution of  
565 phosphorus from all identifiable sources and all primary and  
566 secondary land uses.

567 4. ~~By July 1, 2003,~~ Conduct an assessment of the sources  
568 of phosphorus from the Upper Kissimmee Chain-of-Lakes and Lake  
569 Istokpoga, and their relative contribution to the water quality  
570 of Lake Okeechobee. The results of this assessment shall be used  
571 by the coordinating agencies to develop interim measures, best  
572 management practices, or regulation, as applicable.

573 5. ~~By July 1, 2003,~~ Assess current water management  
574 practices within the Lake Okeechobee watershed and develop  
575 recommendations for structural and operational improvements.  
576 Such recommendations shall balance water supply, flood control,  
577 estuarine salinity, maintenance of a healthy lake littoral zone,  
578 and water quality considerations.

579 6. ~~By July 1, 2003,~~ Evaluate the feasibility of  
580 alternative nutrient reduction technologies, including sediment  
581 traps, canal and ditch maintenance, fish production or other  
582 aquaculture, bioenergy conversion processes, and algal or other  
583 biological treatment technologies.

584 (e) Lake Okeechobee Exotic Species Control Program.--~~By~~  
585 ~~June 1, 2002,~~ The coordinating agencies shall identify the  
586 exotic species that threaten the native flora and fauna within  
587 the Lake Okeechobee watershed and develop and implement measures  
588 to protect the native flora and fauna.

589 (f) Lake Okeechobee Internal Phosphorus Management  
590 Program.--~~By July 1, 2003,~~ The district, in cooperation with the  
591 other coordinating agencies and interested parties, shall  
592 complete a Lake Okeechobee internal phosphorus load removal  
593 feasibility study. The feasibility study shall be based on  
594 technical feasibility, as well as economic considerations, and  
595 address all reasonable methods of phosphorus removal. If methods  
596 are found to be feasible, the district shall immediately pursue  
597 the design, funding, and permitting for implementing such  
598 methods.

599 (g) Lake Okeechobee Protection Plan implementation.--The  
600 coordinating agencies shall be jointly responsible for  
601 implementing the Lake Okeechobee Protection Plan, consistent  
602 with the statutory authority and responsibility of each agency.  
603 Annual funding priorities shall be jointly established and the  
604 highest priority shall be assigned to programs and projects that  
605 address phosphorus sources that have the highest relative  
606 contribution to phosphorus loading and the greatest potential  
607 for phosphorus reduction. In determining funding priorities, the  
608 coordinating agencies shall also consider the need for  
609 regulatory compliance, the extent to which the program or  
610 project is ready to proceed, and the availability of federal  
611 matching funds or other nonstate funding, including public-

612 private partnerships. Federal and other nonstate funding shall  
613 be maximized to the greatest extent practicable.

614 (h)~~(g)~~ Annual progress report.--Each January 1, ~~beginning~~  
615 ~~in 2001~~, The district shall submit to the Governor, the  
616 President of the Senate, and the Speaker of the House of  
617 Representatives annual progress reports regarding implementation  
618 of this section. The annual report shall include a summary of  
619 water quality and habitat conditions in Lake Okeechobee and the  
620 Lake Okeechobee watershed and the status of the Lake Okeechobee  
621 Construction Project. The district shall prepare the report in  
622 cooperation with the other coordinating agencies.

623 Section 2. This act shall take effect July 1, 2005.
