By Senator Diaz de la Portilla

36-1788-07

1	A bill to be entitled
2	An act relating to a tax credit for research
3	and development expenses; creating s. 220.194,
4	F.S.; providing legislative intent regarding a
5	state research and development tax credit;
6	defining the terms "base amount," "business
7	enterprise, " and "qualified research expenses";
8	providing a tax credit for businesses having
9	qualified research expenses; providing that the
10	tax credit is 10 percent of the excess over the
11	base amount; providing that the credit taken in
12	any one taxable year may not exceed a certain
13	amount; providing that any unused credit may be
14	carried forward for up to 10 years following
15	the close of the tax year in which the
16	qualified expenses were incurred; providing
17	that any unused credit may be assigned or sold
18	to another taxpayer under certain conditions;
19	providing for a maximum credit amount;
20	requiring the Department of Revenue to adopt
21	rules and guidelines; providing an effective
22	date.
23	
24	Be It Enacted by the Legislature of the State of Florida:
25	
26	Section 1. Section 220.194, Florida Statutes, is
27	created to read:
28	220.194 Research and development tax credit
29	(1)(a) The Legislature finds that research and
30	development has become the underlying source of wealth in the
31	21st century by generating ideas and technologies that

encourage productivity and economic growth. Furthermore, 2 companies generate the main body of growth-stimulating innovations, making current ideas and technologies more 3 4 market-sensitive than other sources of research and 5 development. 6 (b) The Legislature further finds that research and 7 development tax credits are proven to provide incentives for 8 corporate research and development beyond expected levels. Research shows that, not only is the federal research and 9 10 development tax credit an effective tool for stimulating additional research and development, which in turn leads to 11 12 faster economic growth, but that state research and 13 development tax credit programs are nearly as important to corporate research and development as the federal research and 14 development tax credit program, and that the typical state 15 research and development tax credit program has been shown to 16 increase general, company-funded research and development 18 within a state, often enhancing the state's competitiveness by enabling it to draw research and development activity away 19 from other states. 2.0 21 (c) Additionally, the Legislature finds that this 2.2 state needs a state research and development tax credit 23 program to ensure economic competition. Unlike Florida, more than half of the states have a research and development tax 2.4 credit program. Without a state research and development tax 2.5 credit, Florida lags behind the nation in important corporate 26 2.7 research and development. 2.8 (d) The Legislature therefore creates the research and development tax credit to encourage corporate research and 29 development activity within the state, sharpen the state's 30

competitive edge by leveling the playing field with the

31

30 <u>credits have been applied.</u>

1	state's regional and national economic competitors, support
2	the state's vibrant innovation economy, and attract high-wage,
3	professional research jobs to the state.
4	(2) As used in this section, the term:
5	(a) "Base amount" means the amount resulting from the
6	following calculations:
7	1. The division of a business enterprise's research
8	and development expenditures by its gross receipts for a
9	predetermined base period.
10	2. The multiplication of the ratio resulting from the
11	calculation in subparagraph 1. by the average of the business
12	enterprise's research and development expenses over the 4-year
13	period before the current tax year.
14	(b) "Business enterprise" means any business or the
15	headquarters of any business that is engaged in the
16	manufacturing, warehousing and distribution, processing,
17	telecommunications, tourism, or research and development
18	industries. The term does not exclude retail businesses.
19	(3) A tax credit is allowed for a business enterprise
20	that has qualified research expenses in this state in a
21	taxable year exceeding the base amount, if the business
22	enterprise for the same taxable year claims and is allowed a
23	research credit under s. 41 of the Internal Revenue Code of
24	1986, as amended.
25	(4) The tax credit provided in subsection (3) shall be
26	10 percent of the excess over the base amount.
27	(5) The credit taken in any one tax year may not
28	exceed 50 percent of the business enterprise's remaining net
29	income tax liability under this chapter after all other

1	(6) Any unused credit claimed under this section may
2	be carried forward for up to 10 years following the close of
3	the taxable year in which the qualified research expenses were
4	incurred.
5	(7) Any unused credit claimed under this section may
6	be assigned or sold to another taxpayer in the state if there
7	has been no claim for allowance filed within 1 year following
8	the date that the Department of Revenue approved the credit.
9	The purchaser or assignee must use the newly obtained research
10	and development tax credit in the taxable year in which the
11	purchase or assignment of the credit is made. The purchased or
12	assigned research and development credit may not be used to
13	offset more than 75 percent of a tax liability for a taxable
14	year. The purchased or assigned credit may not be carried
15	over, carried back, resold, or refunded.
16	(8) The maximum credit amount that may be approved
17	during any calendar year is \$ million.
18	(9) The Department of Revenue shall adopt rules
19	governing the manner and form of applications for credit and
20	may establish quidelines concerning the requisites for an
21	affirmative showing of qualification for the credit under this
22	section.
23	Section 2. This act shall take effect July 1, 2007.
