

**HOUSE OF REPRESENTATIVES
FINAL BILL ANALYSIS**

BILL #:	CS/CS/HB 1175 (CS/CS/SB 1502)	FINAL HOUSE FLOOR ACTION:	
SPONSOR(S):	Judiciary Committee; Criminal Justice Subcommittee; Ingram and others (Health Regulation; Criminal Justice and Evers)	116 Y's	0 N's
COMPANION BILLS:	CS/CS/SB 1502	GOVERNOR'S ACTION:	Approved

SUMMARY ANALYSIS

CS/CS/HB 1175 passed the House on February 22, 2012. The bill was amended by the Senate on March 7, 2012, and subsequently passed the House on March 7, 2012.

The bill amends s. 893.03, F.S., to add synthetic cannabinoid and bath salt substances to Schedule I of Florida's controlled substance schedules. As a result, possession of these substances is a third degree felony ranked in Level 3 of the ranking chart. However, possession of 3 grams or less of synthetic cannabinoids is a first degree misdemeanor, unless the synthetic cannabinoid is in powdered form. The offense of sale, manufacture or delivery or possession with intent to sell, manufacture or deliver synthetic cannabinoid and bath salt substances is a third degree felony ranked in Level 3 of the ranking chart. The purchase of these substances is a third degree felony ranked in Level 2 of the ranking chart.

According to FDLE, this bill could potentially increase the number of evidence submissions into FDLE's Crime Laboratory System. The lab system will need to acquire all of the required standards necessary to test the proposed chemical substances. However, FDLE's fiscal analysis stated that no new expenditures would be required to implement the bill.

The Criminal Justice Impact Conference met on January 17, 2012, and determined the bill will have an insignificant impact on state prison beds.

The bill was approved by the Governor on March 23, 2012, ch. 2012-23, Laws of Florida. The effective date of the bill is upon becoming a law.

I. SUBSTANTIVE INFORMATION

A. EFFECT OF CHANGES:

Background

Synthetic Cannabinoids

Synthetic cannabinoids (also known as “K2” or “Spice”) are chemically engineered substances, similar to tetrahydrocannabinol (THC)—the active ingredient in marijuana—that, when smoked or ingested, can produce a high similar to marijuana.¹ Synthetic cannabinoids have been developed over the last 30 years for research purposes to investigate the cannabinoid system. No legitimate non-research uses have been identified for synthetic cannabinoids and they have not been approved by the U.S. Food and Drug Administration for human consumption.²

Bath Salts

3,4-Methylenedioxymethcathinone, 3,4-Methylenedioxypropylvalerone (MDPV), Methylmethcathinone, Methoxymethcathinone, Fluoromethcathinone, and Methylethcathinone, are psychoactive substances that, when used improperly, offer alternatives to illegal drugs.³ Much like the marketing of [synthetic cannabinoids](#) as incense, these synthetic stimulant substances are commercially available and are being marketed as “bath salts.”⁴ While these substances have become popular under the guise of being sold as bath salts, they are sometimes sold as other products such as insect repellent or plant food, with names like “Bonsai Grow,” among others.⁵

Substance Abuse

Despite being labeled “not for human consumption,” synthetic cannabinoids and bath salts have begun being used as recreational drugs and have been marketed as legal and safer alternatives to illegal methods of getting “high.”⁶ They have been found accessible at convenience stores, discount tobacco outlets, gas stations, pawnshops, tattoo parlors, and truck stops, amongst other locations.⁷ These substances are reportedly being used predominately by the youth population.⁸

Synthetic cannabinoids and bath salts are abused typically by smoking. However, bath salts have also been abused by injection, snorting and by the use of an atomizer.⁹ Reports of side effects from synthetic cannabinoids and bath salts include: tachycardia, hypertension, anxiety, high blood pressure,

and hallucinations.¹⁰ Additionally, there have been cases in which these substances have caused individuals to behave inappropriately, and in some instances cause public danger.¹¹

Drug Schedules

Chapter 893, F.S., sets forth the Florida Comprehensive Drug Abuse Prevention and Control Act and classifies controlled substances into five categories, known as schedules. These schedules are used to regulate the manufacture, distribution, preparation and dispensing of the substances listed therein.

The distinguishing factors between the different drug schedules are the “potential for abuse”¹² of the substance listed therein and whether there is a currently accepted medical use for the substance. Schedule I substances have a high potential for abuse and have no currently accepted medical use in the United States.¹³ Cannabis and heroin are examples of Schedule I drugs.¹⁴

Florida law

Synthetic Cannabinoids (Spice/K2)

During the 2011 Legislative Session, the following synthetic cannabinoids and synthetic cannabinoid-mimicking compounds were added to Schedule I of Florida’s controlled substance schedules:

- 2-[(1R, 3S) -3-hydroxycyclohexyl] -5- (2-methyloctan-2-yl) phenol, also known as CP 47, 497 and its dimethyloctyl (C8) homologue;
- (6aR, 10aR) -9- (hydroxymethyl) -6, 6-dimethyl-3- (2-methyloctan-2-yl) -6a, 7, 10, 10a-tetrahydrobenzo [c] chromen-1-ol, also known as HU-210;
- 1-Pentyl-3- (1-naphthoyl) indole, also known as JWH-018;
- 1-Butyl-3- (1-naphthoyl) indole, also known as JWH-073; and
- 1-[2-(4-morpholinyl)ethyl]-3-(1- naphthoyl) indole, also known as JWH-200.¹⁵

As a result, possession of these synthetic cannabinoids is a third degree felony¹⁶ in conformity with other Schedule I hallucinogens.¹⁷ This offense is ranked in Level 3 of the offense severity ranking chart (ranking chart). The offense of sale, manufacture or delivery or possession with intent to sell, manufacture or deliver synthetic cannabinoids is a third degree felony ranked in Level 3 of the ranking chart. The offense of purchase of synthetic cannabinoids is a third degree felony ranked in Level 2 of the ranking chart.

Bath Salts

During the 2011 Legislative Session, the following synthetic substances (bath salts) were added to Schedule I of Florida’s controlled substance schedules:

- 3,4-Methylenedioxymethcathinone;
- 3,4-Methylenedioxypyrovalerone (MDPV);
- Methylenedioxymethcathinone;
- Methoxymethcathinone;
- Fluoromethcathinone; and
- Methylethcathinone.¹⁸

¹⁰ *Supra* note 6. *See also, supra* note 2.

¹¹ According to Panama City Beach police, one of the most shocking cases of bath salts abuse involved a woman who burst into her 71-year-old mother’s room swinging a machete. Alexia Campbell and Aaron Deslatte, Sun Sentinel, *Florida bans 'bath salt' drugs after violent outbursts*. January 27, 2011. (http://articles.sun-sentinel.com/2011-01-27/news/fl-bath-salts-florida-20110126_1_salts-fake-cocaine-bath) (last visited on January 12, 2012).

¹⁵ Chapter 2011-73, L.O.F.

¹⁶ A third degree felony is punishable by up to five years imprisonment and a \$5,000 fine. Sections 775.082 and 775.083, F.S.

¹⁷ Possession of 3 grams or less of synthetic cannabinoids will be a first degree misdemeanor, unless the synthetic cannabinoid is in powdered form. *See*, ch. 2011-73, L.O.F.

¹⁸ Chapter 2011-90, L.O.F.

As a result, possession of these substances is a third degree felony ranked in Level 3 of the ranking chart. The offense of sale, manufacture or delivery or possession with intent to sell, manufacture or deliver these substances is a third degree felony ranked in Level 3 of the ranking chart. The purchase of these substances is a third degree felony ranked in Level 2 of the ranking chart.

Recent Issues

Since the 2011 Legislative Session, new formulas of synthetic cannabinoids and bath salts have been developed that are made up of chemicals not covered by current law.¹⁹ According to the Florida Department of Law Enforcement (FDLE), state and local law enforcement agencies are currently limited in their ability to intercede in cases involving any of the these chemical substances, thus creating an environment where individuals feel free to possess, distribute, and/or use these harmful substances without fear of intervention by state and local law enforcement.²⁰

Effect of the Bill

The bill amends s. 893.03, F.S., to add additional synthetic cannabinoid and bath salt substances to Schedule I of Florida's controlled substance schedules. As a result, possession of these substances is a third degree felony ranked in Level 3 of the ranking chart. However, possession of 3 grams or less of synthetic cannabinoids will be a first degree misdemeanor, unless the synthetic cannabinoid is in powdered form. The offense of sale, manufacture or delivery or possession with intent to sell, manufacture or deliver synthetic cannabinoid and bath salt substances is a third degree felony ranked in Level 3 of the ranking chart. The purchase of these substances is a third degree felony ranked in Level 2 of the ranking chart.

The bill also reenacts ss. 893.13(1) – (6) and 921.0022(3)(b) – (e), F.S., to incorporate changes made to s. 893.03, F.S.

II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT

A. FISCAL IMPACT ON STATE GOVERNMENT:

1. Revenues:

The bill does not appear to have any impact on state revenues.

2. Expenditures:

The bill adds additional chemical substances to Schedule I of Florida's controlled substance schedules. According to FDLE, this could potentially increase the number of evidence submissions into FDLE's Crime Laboratory System.²¹ The lab system will need to acquire all of the required standards necessary to test the proposed chemical substances.²² However, FDLE's fiscal analysis stated that no new expenditures would be required to implement the bill.²³

The Criminal Justice Impact Conference met on January 17, 2012, and determined the bill will have an insignificant impact on state prison beds.

¹⁹According to the FDLE, over 90 chemicals related to synthetic cannabinoids and bath salts have been discovered that have no accepted medical use or a legitimate industrial or commercial purpose. Although similar in structural make up, these chemical compounds differ by rearrangement of the molecules, creating a different drug. *See*, Florida Department of Law Enforcement. Analysis to HB 1175 relating to Controlled Substances. January 12, 2012. (On file with House Criminal Justice Subcommittee).

B. FISCAL IMPACT ON LOCAL GOVERNMENTS:

1. Revenues:

The bill does not appear to have any impact on local government revenues.

2. Expenditures:

Because the bill adds certain chemical substances to Schedule I, local agencies which fund and maintain their own crime lab with a chemistry section would potentially be facing a rise in evidence submissions associated with the additions of the proposed chemical substances.²⁴

The bill makes possession of 3 grams or less of new synthetic cannabinoids a first degree misdemeanor, unless the synthetic cannabinoid is in a powdered form. This may have a fiscal impact on local jail beds.

C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:

The bill prohibits the possession, sale, manufacture, delivery and purchase of related synthetic cannabinoids and bath salts chemical substances. As a result, the bill could have a negative fiscal impact on retailers currently profiting from the sale of such chemical substances.

D. FISCAL COMMENTS:

None.
